Palmer discovered that previous editors had misinterpreted an important note in Sinfonia No. 11. Such careful research is a hallmark of Palmer's Bach editions.

J. S. Bach: The 15 (Two-part) Inventions

*It would appear that J.S. Bach really composed his two- and three-part inventions (Sinfonias) on purpose to prepare his pupils for his larger works. - especially for his "Well-Tempered Clavier", - and as such they cannot be too urgently recommended. And to this day, a diligent study of these Inventions will greatly benefit every talented student of the piano who desires to rise above mediocrity; they will cultivate his musical taste and develop his technic. For in no modern, easy piece of music is the left hand given so independent of a treatment of the theme as in these Inventions.Edited By:Carl*
