** Outboard motor repair (or the average guy * Fix up an old outboard and SAVE \$1000 or more compared to buying a new motor! With a little know-how and a few common tools, you can fix an old motor—bring it back from the dead. Sometimes all it takes is a squirt of WD-40 into the cylinder and a new spark plug. Or a new set of points and condensers—which do not require expert knowledge or black magic to install. Maybe the carburetor needs cleaning and adjusting. You can do it! Max E. Wawrzyniak III is an outboard motor guru. He advises you to find an old motor at a yard sale for \$100 or so (and he tells you exactly which ones to look for), and fix it up—rather than spending \$1500*

or more on a new motor. He is a big fan of "cheap power." Get on the water with money left in your pocket. With a basic understanding of how these motors work, a little logical thinking, and a few hours' work, you can go boating for a fraction of what everyone else has to pay. Also—for the boater who already owns an outboard motor of any age—this book demystifies these internal-combustion marvels that can bring such frustration if they malfunction. You'll learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will make anyone into a capable outboard mechanic. INCLUDES: What to Buy, Where to Find It, Tools Needed and Where to Begin, The Ignition System, Carburetors, Water Pump Repairs, Recoil Starters, Fuel Tanks, Propellers, Lower Units, Emergency Shut-Down, Fuel Pump Conversion, Remote Controls: Shift and Throttle, Remote Control: Steering, Tiller Conversion, Trouble-Shooting, and Onboard Spares and Tools. This book has always been very popular and well-used in its print edition. Now it's available as an e-book so you can load it into your phone or tablet and always have this wealth of repair /maintenance

information at your fingertips, even when out on your boat.

Occasionally, a reader will happen upon a book that is excellent as a bedtime sleeping aid—but not this one. With nearly five score different events, happenings, and adventures with dozens of related and pertinent rabbit trails leading credence to the excursions, the reader will be "thumb ready" to eagerly flip a page, seeking the outcome of the last daring deed of the adventuresome author. Wide is the variety of decent and noble escapades at a time when seat belts were unknown, standing up in the center aisle of the school bus for six miles was permitted, and unwritten laws of the land promoted unlimited homemade adventures and the unshackled variety of down-to-earth fun. Youthful minds,

unabashedly, often ran rampant in the myriad of rare adventures that were available to pursue. We attempted many and lived to tell about our assorted and varied shenanigans—most of them with a grin!

The Art, Practice and Enjoyment of Boating

Famed yacht designer and author L. Francis Herreshoff takes us on family style cruises in American waters, during which all sorts of boats and boating skills are explained while they are used. He tells about the adventures of the crews of the catboat Piscator, the ketch Viator, and the engineless whaleboat-style ketch Rozinante. There are anecdotes and examples and a wide variety of boat lore in each chapter, as well as adventures, races and coastwise cruises and historical harbors to visit.

Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, Righteous Porkchop chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.
