Criteria, Evidence, and Treatment
While the Internet is a relatively new
technology, that has impacted the
world, and provided many benefits, it

Read PDF Journal Of Cognitive Net Addiction

has also had negative ramifications. Individuals unable to control their use are jeopardizing school, employment and relationships. The concept of "Internet Addiction" is used to explain uncontrollable, damaging use of technology. It is characterized as an

Read PDF Journal Of Cognitive Net Addiction

impulse control disorder, comparable to pathological gambling, because of overlapping diagnostic criteria and symptomatology. Based on these studies, the IAT was constructed to capture the problematic behavior associated with compulsive use of

Read PDF Journal Of Cognitive Net Addiction

technology, including online porn, internet gambling and compulsive use of online games and social media. The Internet Addiction Test emerged as the first validated measure of Internet and technology addiction. The assessments can be administered in a variety of

Read PDF Journal Of Cognitive Net Addiction

mental health settings, including private practice clinics, schools, hospitals and residential programs.

They can be used when there is suspicion of Internet addiction, as part of a broad intake assessment, or for use in a wellness curriculum to help

Read PDF Journal Of Cognitive Net Addiction

participants evaluate their own Internet behavior. The IAT can also be a valuable pre-employment screening device, to detect internet addiction among job candidates, to improve productivity and reduce corporate liability. Based on 20 self-report items,

Read PDF Journal Of Cognitive Net Addiction

the IAT assesses for the presence of addiction to the Internet, electronic entertainment, social media, and general use of electronic devices, and also measures the severity of addiction, in terms of mild, moderate or severe. Furthermore, because Internet

Read PDF Journal Of Cognitive Net Addiction

addiction may be driven by different reasons and manifest in different ways, requiring different types of treatment, the IAT produces scores related to the following areas:

EscapeCompulsionNeglecting dutiesAnticipationLack of
