PEN / ESPN Award for Literary Sports Writing (2015 LONGLIST) "[P]erversely entertaining... In a truly intoxicating read that was hard to put down, Matt Higgins has managed to make real a world about as far removed from daily life as it gets." --Daily Beast "Matt Higgins cracks open this astonishingly dangerous sport and captures the spectacular adrenaline surges it delivers."--The Wall Street Journal "[R]iveting... a must-read. A highflying, electrifying story." --Kirkus (STARRED) A heart-stopping narrative of risk and courage, Bird Dream tells the story of the remarkable men and women who pioneered the latest advances in aerial exploration—from skydiving to BASE jumping to wingsuit flying—and made history with their daring. By the end of the twentieth century BASE jumping was the most dangerous of all the extreme sports, with thrill-seeking jumpers parachuting from bridges, mountains, radio towers, and even skyscrapers. Despite numerous fatalities and legal skirmishes, BASE jumpers like Jeb Corliss of California thought they had discovered the ultimate rush. But all this changed for Corliss in 1999, when, high in the mountains of northern Italy, he and other jumpers watched in wonder as a stranger—wearing a cunning new jumpsuit featuring “wings” between the arms and legs—leaped from a ledge and then actually flew from the vertiginous cliffs. Drawing on intimate access to Corliss and other top pilots from around the globe, Bird Dream tracks the evolution of the wingsuit movement through the larger than life characters who, in an age of viral video, forced the sport onto the world stage. Their exploits—which entranced millions of fans along the way—defied imagination. They were flying; not like the Wright brothers, but the way we do in our dreams. Some dared to dream of going further yet, to a day when a wingsuit pilot might fly, and land, all without a parachute. A growing number of wingsuit pilots began plotting ways in which a human being might leap from the sky and land. A half dozen groups around the

world were dedicated to this quest for a "wingsuit landing," conjuring the pursuit of nations that once inspired the race to first summit Everest. Given his fame as a stuntman, the brash, publicity-hungry Corliss remained the popular favorite to claim the first landing. Yet Bird Dream also tracks the path of another man, Gary Connery—a forty-two-year-old Englishman—who was quietly plotting to beat Corliss at his own game. Accompanied by an international cast of wingsuit devotees—including a Finnish magician, a parachute tester from Brazil, an Australian computer programmer, a gruff hang-gliding champion-turned-aeronautical engineer, a French skydiving champion, and a South African costume designer—Corliss and Connery raced to leap into the unknown, a contest that would lead to triumph for one and nearly cost the other his life. Based on five years of firsthand reporting and original interviews, Bird Dream is the work of journalist Matt Higgins, who traveled the world alongside these extraordinary men and women as they jumped and flew in Europe, Africa, Asia, and the Americas. Offering a behind-the-scenes take on some of the most spectacular and disastrous events of the wingsuit movement, Higgins's Bird Dream is a riveting, adrenaline-fueled adventure at the very edge of human experience.

It's hard to imagine there's a more extreme sport than skydiving. Jumping from a plane at 13,000 feet (3,962 m) or higher seems crazy to some, but those who try it are often hooked for life. Readers of this book step off the plane and into the high-flying world of skydiving, including tandem skydiving, accelerated free fall, BASE jumping, and competitive skydiving. The history and hazards of the sport are also considered, with midair photographs adding an even greater sense of amazement to this high-interest topic.

Jesse Rodriguez has a pretty exciting job for a 13-year-old, working for his friend Buck at a small flight and skydiving school near Seattle. But he still can't wait to turn 16 and finally be old enough to make his first free-fall jump from a plane. Buck has been like a father to him ever since Jesse's dad died, and has made sure that Jesse picks up all he needs to know about skydiving while he does odd jobs around the airport. But Jesse and his friend Robin Waterford have also learned something very disturbing. Someone's been using the airport to smuggle members of a Central American drug cartel into the United States, and Jesse's worried that Buck is involved. Jesse and Robin find themselves in the middle of a dangerous international situation, and are forced to make their first jumps sooner than they ever expected!

The product of a lifetime of research and reflection, *Transcending Fear* is Brian Germain's most important work. The book addresses the most significant challenge of human kind to date: the process of recognizing and moving beyond fear. In an age in which fear has literally brought our world to the brink of destruction, understanding why we contract in fear and how we can go beyond this instinctive reaction is essential for our survival as a species. As a World Champion skydiver, test pilot and psychologist, Brian Germain offers a unique personalized perspective on the phenomenon of fear. Reflecting on his many intense experiences with fear, Brian sorts through the most current psychology research on fear, and presents the ways to de-escalate the emotional response in provocative situations. The fundamental premise of the book is simple: Fear makes us stupid. If we are to transcend the limitations imposed by a contracted perspective, we must develop our ability to remain calm. Specific methods for relaxing in dangerous situations are covered in detail, as well as scientific evidence to support the reasons for this unusual and powerful approach to dealing with fear.
