***The European Union (EU) has sought to establish itself as a global environmental leader but was hit by the combined effects of the economic and financial crisis from 2007-8 leading some to question whether the EU could continue to adopt ambitious environmental policy. This volume brings together leading environmental policy scholars to analyse the impacts of the crisis upon environmental policy in the EU and its member states. Authors analyse whether environmental policy has been***

***dismantled, expanded or stayed the same. If policy has been dismantled, the kind of strategy adopted is analysed (active, symbolic, arena-shifting, or dismantling by default), and at what levels change has occurred. The Index of Policy Activity (IPA) is applied systematically across the cases, which combine quantitative with qualitative analysis. Non-European cases are also included to provide a counterpoint for comparison. The book finds that whilst the EU has not actively dismantled environmental policy, its economic policies have had negative effects upon some***

***Member States, prompting policy dismantling. Climate and energy policies have seen some policy expansion but there are examples, most notably the UK, where there has also been active policy dismantling. The main trend is one of stasis - environmental policy in Europe is judged to have plateaued calling into question Europe's much-vaunted environmental leadership. The book contributes to scholarship on environmental policy and public administration, combining empirical and methodological insights to give an up to date perspective on the impact of crisis upon European environmental policy.***

This edited collection examines the relationship between three central terms—capitalism, feminism, and critique—while critically celebrating the work and life of a thinker who has done the most to address this nexus: Nancy Fraser. In honor of her seventieth birthday, and in the spirit of her work in the tradition of critical theory, this collection brings together scholars from different disciplines and theoretical approaches to address this conjunction and evaluate Fraser ' s lifelong contributions to theorizing it. Scholars from philosophy, political science, sociology, gender studies, race

theory and economics come together to think through the vicissitudes of capitalism and feminism while also responding to different elements of Nancy Fraser ' s work, which weaves together a strong feminist standpoint with a vibrant and complex critique of capitalism. Going beyond conventional disciplinary distinctions and narrow debates, all the contributors to this project share a commitment to critically understanding the connection between capitalism, exploitation, and the viable roads for emancipation. Since the eighteenth century, few schools of historical thought have exerted a more lasting impact than Marxism, and this impact extends far beyond the Western world within which it is most commonly analysed. Edited by two highly respected authors in the field, this book deals with the effect of Marxism on historical writings not only in parts of Europe, where it originated, but also in countries

Rather than presenting the chapters geographically, it is structured with respect to how Marxist influence was shown in the works of historians in a particular area. This title takes a dual approach to the subject; some chapters are national in scope, addressing the Marxist impact on historical practices within a country, whereas others deal with the varied expressions of Marxist historiography throughout a wider region. This book offers a critical assessment of the history of the euro, its crisis, and the rescue measures taken by the European Central Bank and the community of states. The euro induced huge capital flows from the northern to the southern countries of the Eurozone that triggered an inflationary credit bubble in the latter, deprived them of their competitiveness, and made them vulnerable to the financial crisis that spilled over from the US in 2007 and 2008. As private capital shied away from the southern countries,

the ECB helped out by providing credit from the local money-printing presses. The ECB became heavily exposed to investment risks in the process, and subsequently had to be bailed out by intergovernmental rescue operations that provided replacement credit for the ECB credit, which itself had replaced the dwindling private credit. The interventions stretched the legal structures stipulated by the Maastricht Treaty which, in the absence of a European federal state, had granted the ECB a very limited mandate. These interventions created a path dependency that effectively made parliaments vicarious agents of the ECB's

Governing Council. This book describes what the author considers to be a dangerous political process that undermines both the market economy and democracy, without solving southern Europe's competitiveness problem. It argues that the Eurozone has to rethink its rules of conduct by limiting the role of the ECB, exiting the regime of soft budget constraints and writing off public and bank debt to help the crisis countries breathe again. At the same time, the Eurosystem should become more flexible by offering its members the option of exiting and re-entering the euro - something between the dollar and the Bretton Woods system - until it eventually

This Casebook deals with the horizontal effects of EU law, which is to say its effects on relationships between individuals. To a large extent, these effects have been created by the Court of Justice of the European Union (CJEU) on the basis of the European Treaties. The main focus of the Casebook is on the developments relating to primary EU law and their influence on national private law. It studies instances where EU primary law has already directly or indirectly influenced the case law in the Member States, or where it is

*child sexual abuse by the Catholic Church has been occurring under the pontificate of six popes since 1922. For 1500 years, the Catholic Church accepted that clergy who sexually abused children deserved to be stripped of their status as priests and then imprisoned. A series of papal and Council decrees from the twelfth century required such priests to be dismissed from the priesthood, and then handed over to the civil authorities for further punishment. That all changed in 1922 when Pope Pius XI issued his decree Crimen Sollicitationis that created a de facto privilege of clergy by imposing the secret of the Holy Office on all information obtained through the*

If the State did not know about these crimes, then there would be no State trials, and the matter could be treated as a purely canonical crime to be dealt with in secret in the Church courts. Pope John Paul II confirmed the application of pontifical secrecy in 2001, and in 2010, Benedict XVI even extended it to allegations about priests sexually abusing intellectually disabled adults. This book analyzes the interaction of European social models -- the institutions structuring labor markets' supply side -- and their turbulent macroeconomic environment from the deep Europe-wide recession, ending Germany's post-unification boom, through monetary union's establishment, to the Great Recession following the recent financial crisis. The analysis reaches two conclusions challenging the dominant view that the social models caused unemployment by impairing labor markets' efficiency in the name of equity. First, the social models' employment and distributive effects

prohibitions. For the past decade, academic publications have focused on the proposal for a Directive on damages actions, then the Directive 2014/104/EU of 26 November 2014 itself, and finally the transposition texts. However, this understandable interest should not lead to overlook the fact that the Directive has been applied very little until now. This is mainly due to its application *ratione temporis*. In addition to the fact that Member States only transposed the Directive between the end of 2016 and 2018, Article 22 of the Directive provides that the substantive rules contained in the Directive cannot be applied to infringements subsequent to the national laws

transposing them, while the procedural rules of the Directive apply to proceedings commenced on or after 26 December 2014. Thus, it is prior domestic law that continues to govern the vast majority of cases before national courts in the “Pre-Directive era.” In addition, a number of issues of the utmost importance have not been addressed by the Directive, such as questions of international jurisdiction or the quantification of “interests.” For these reasons, it seemed necessary not to limit this book to commenting on the Directive, important as it is, but to go beyond it. Directed by Rafael Amaro, this book contains the contributions from leading

academics, attorneys, jurists and economists in the field of the private enforcement of competition law. It is composed of thematic chapters dealing with matters such as applicable law in international litigation, limitation, quantification of damages, from both a European Union and a national perspective, as well as national chapters presenting the state of play in several European States.

Spain is at the epicentre of a crisis that threatens the future of the Eurozone. This book explains the deep historical and structural roots of the current crisis in Spain. It analyses the nexus between European circuits of financial capital, urbanisation, and the emergent dynamics of state austerity and popular revolt. forum for the scrutiny of significant issues in EU Law, the law of the European Convention on Human Rights, and Comparative Law with a 'European' dimension, and particularly those issues which have come to the fore during the year preceding publication. The contributions appearing in the collection are commissioned by the Centre for European Legal Studies (CELS) Cambridge, a research centre in the Law Faculty of the University of Cambridge specialising in European legal issues. The papers presented are at the cutting edge of the fields which they address, and reflect the views of recognised experts drawn from the University world, legal practice, and

the institutions of both the EU and its Member States. Inclusion of the comparative dimension brings a fresh perspective to the study of European law, and highlights the effects of globalisation of the law more generally, and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders. The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration. offers complete coverage of the Cambridge IGCSE Mathematics (0580/0980) syllabus. It contains detailed explanations and clear worked examples, followed by practice exercises to allow students to consolidate the required mathematical skills. The coursebook offers opportunities for checking prior knowledge before starting a new chapter and testing knowledge with end-of-chapter and exam-practice exercises. Core and Extended materials are presented within the same book and are clearly signposted to allow students to see the range of mathematics required for study at this level. Answers are at the back of the book.

*the Pecos River is one of the most storied waterways in the American West. It is also one of the most troubled. In 1942, the National Resources Planning Board observed that the Pecos River basin "probably presents a greater aggregation of problems associated with land and water use than any other irrigated basin in the Western U.S." In the twenty-first century, the river's problems have only multiplied. Bitter Waters, the first book-length study of the entire Pecos, traces the river's*
