*Help students appreciate texts and write about them with conviction. Responding to a comprehension question is a surprisingly complex task. It draws on multiple skills: students must be able to read and analyze a text passage; consider what aspect of the text the question addresses; and then quickly and concisely write about their ideas, citing evidence to support them. Hence the prominence of constructed-response questions in standardized testing. In this refreshingly clear and upbeat guide, literacy consultant Nancy Boyles gives a step-by-step demonstration of how to help students achieve success with this task—and in the process of unpacking the steps involved, demonstrates how the instruction can inspire teachers’ creativity as well as deepen students’ literacy skills. *'We should write because it is human nature to write' Julia Cameron In The Right to Write, Julia Cameron's most revolutionary book, the author asserts that conventional writing wisdom would have you believe in a false doctrine that stifles creativity. This isn't a book of rules and certainly not about how to write that query letter, how to find a market for your work, or how to find an agent. It's about using writing to bring clarity and passion to the act of living. The secrets in breaking loose from the grip of your established thought process, to unleash the wave of creativity striving to express itself within. Here are techniques and illustrative stories to help you make writing a natural, intensely personal part of life. And this book includes the details of Cameron's own writing processes when creating her best selling books, which include the phenomenal and world famous The Artist's Way and Vein of Gold. For those jumping into the writing life for the first time and for those already living it, the art of writing will never be the same after reading this book. Having “the talk” can sometimes be an awkward experience for both parent and child. Even so, I didn’t want to wait until my children’s hormones kicked in, and I didn’t want to be caught off guard when they had questions, but most of all, I didn’t want them growing up with misconceptions concerning sex. I wanted my children to be informed about the facts of life, yet without being too sexually explicit in the process, because some of the facts weren’t good such as pornography, diseases, and predators, but these subjects needed to be addressed as well. As a result, I told them what I have written in Your Special Gift, by using the analogy of a gift, a lock, and a key to define commonly used sexual terms, and to caution them about possible consequences, and to warn them of potential predators. I also used Scripture as the basis of defining true love. The simplicity of the gift analogy opens the door of communication between parent and child in an effective straightforward, and yet sensitive way, so that any question concerning sex can be answered by using this method. Your Special Gift is well-suited for children in the 8-to-12 year-old range.

Time and again, the authors have observed how a great program faculty creates unique learning experiences to everybody ' s satisfaction. They have experienced the pleasure that all involved feel when great learning has taken place, when the program participants leave the sessions with an enhanced skill set and co-created answers to pending and future challenges. They are also aware that creating such moments of truth, involving the value proposition of business schools, corporate universities or other training institutions, has not been mastered everywhere. They have written this book to contribute to the ongoing professionalization of business education and aim to share some of the key lessons learned when creating unique learning experiences entailing learning that sticks. A great means to this end is using cases in executive education. While the variety of what can still be called a case is extremely wide, the authors by no means preach that cases are the only way forward. Like every tool, cases must be applied wisely and with a minimum amount of skill. There is also a bigger toolset available and there are also additional contextual factors to consider. They include teaching and learning traditions in different local settings. They comprise individual ' s learning preferences. As the authors outline in this book, the case-based method nonetheless offers tremendous potential. The art and science of case writing are still known to too few of those involved in delivering executive education seminars.

Designed to provide activities for teachers who wish to foster cooperative learning and collaboration in their classrooms.

Write Your Own Nonfiction is a Capstone Press publication.

An advocate submits a brief to a court or tribunal to persuade it to decide the cause or matter in favor of the advocates client or position. The key word is persuade. Too often, advocates forget this and write to please themselves. They write to themselves instead of to the court. They write in chest-thumping prose and style. Advocates will do well to keep in mind that in advocacy, persuasion is all that matters.

This book teaches persuasive written advocacy. It shows advocates of all ranks, in all jurisdictions, in all proceedings, before all courts or tribunals how to prepare and present winning and winsome arguments.

Because of its emphasis on winning, the books pedagogy blends law, linguistics, logic, psychology, rhetoric, and semantics.
