

Karakas The Most Complete Collection Of The Significations Of The Planets Signs And Houses As Used In Vedic Or Hindu Astrology

This wide-ranging book presents the linguistic achievements of four major cultures to readers presumably conversant with modern theoretical linguistics. The chapter on India discusses in detail P?n?ini's (c. 400 B.C.) grammar Ast-adhy-ay-i as well as the work of his commentators K?ty?yana, Patanjali, and Bhartr?hari. In the Chinese tradition, the Confucian doctrine of the Rectification of Names' is singled out for treatment. Arabic linguistics is represented by Sibawaihi's (d. 793) grammar al-Kit?b, in particular its syntax, as well as the subsequent commentary tradition. The chapter on Europe, which is the most comprehensive of the four, covers the time span from antiquity to the 20th century; special attention is devoted to the contributions of Plato, Aristotle, the Stoics, Varro, Apollonius Dyscolus, and the Modistae. The achievements of the cultures in linguistics are treated throughout from a deliberately value-laden point of view. The achievements of Western antiquity and the Middle Ages are shown to be much more than the average linguist is inclined to believe. Even more importantly, it is shown that the Indian and the Arab traditions have been superior to the European tradition at least until the 20th century. The fact that a linguistic theory created some 2,400 years ago is fully as adequate as our best theories today must have far-reaching implications for the notion of 'scientific progress'. More precisely, it proves necessary to distinguish between 'progress in the human sciences' and 'progress in the natural sciences'. These issues, which pertain to the general philosophy of science, are treated in the final chapter of the book.

Birhat Jatak from time immemorial has been considered as the standard textbook on Astrology. The English translation of Varahamihira's Brihat Jataka is a monumental work in completing which the difficulties in translating a beautiful, technical and suggestive work in sanskrit had to surmounted by hard labour, profound research and want of adequate expressions. It is not mere a translation work; the ripe experience of Mr. Rao for over 60 years in the field of Astrology and his sound judgment on doubtful points have substantiated its value further.

Jaimini System : An Introduction

"Karakas" is Sanskrit for "Causes..". as in what is instrumental in causing something to happen or exist. In one famous verse, "Kara," the root word, is used in describing the One Supreme God Krishna as the "Cause of Everything." Saturn rules over "Obstacles," so Saturn is the Karaka of Obstacles. Riches are ruled by Jupiter, Beauty by Venus, and so on. This book gives the student and professional astrologer a listing of what each Planet, Sign and House rules over - of what people, subjects and areas of life it is the 'Karaka', 'Significator', 'Ruler' or 'Indicator'. Karakas are the root of astrological readings. The astrologer studies the placement of planets in specific signs and houses and paints a picture of the native's life using a blending of what those placements indicate. The better the astrologer understands all the possible Karakas, the more accurate and rich the reading can be. This collection of Karakas was assembled by Das Goravani, creator of the popular astrology software "Goravani Jyotish," and to gather them, he used as many authoritative, recognized books as he could find, including the Vedic Classics like the Brihat Parashara Hora Sastra, and Jataka Parijata, and Saravali, as well as so many more. By an exhaustive effort, he compiled this listing, from the most original and reliable sources. For ease of use, the Karakas are listed four ways: alphabetically, by House, by Planet and by Sign. A glossary explains Sanskrit and astrological terms. This is THE Karaka Desk Reference to own, as it contains the most complete collection that we know of to date of Karakas derived from the classics, as they relate to Vedic or Hindu Astrology.

There is no greater reward for a hockey player than winning the Stanley Cup. The Ultimate Prize chronicles the evolution of the sport from the first recorded game played in 1875 to the 2002 Champion Detroit Red Wings. Photographs and statistics of teams, coaches, players, owners, and hockey executives are listed year by year. Facts, legends, and lore will engross the reader. Unique among team sports trophies, the Stanley Cup has been called "the people's trophy." It travels the globe making public appearances up to 300 days of the year. The names of the men (and some women!) who have won it are engraved right on the Cup itself. Hockey players of all ages dream not just of winning the championship but of actually hoisting the glittering silver trophy high above their heads. It is one of sport's ultimate icons and perhaps the world's best-known piece of folk art. Included in The Ultimate Prize are chapters on Stanley Cup heroes, top play-off moments, and the history of the Stanley family. Did you know that Lord Stanley never watched a team that won his trophy, nor ever played the game himself? All seven of his sons played hockey as a team and were outstanding athletes. Daughter Isobel Stanley played the game, too. In truth, the Stanley family is every bit as responsible for the "Stanley Cup legacy" as his Lordship himself. The Ultimate Prize—misspelled player and team names, wrong names, erroneous years won, and even double listing of players. Every hockey fan or sports enthusiast will want a copy of this treasure.

Technical Challenges and Design Issues in Bangla Language Processing

Puspika 2 is the outcome of the second International Indology Graduate Research Symposium and presents the results of recent research by young scholars into pre-modern South Asian cultures with papers covering a variety of topics related to the intellectual traditions of the region. Focusing on textual sources in the languages in which they were composed, different disciplinary perspectives are offered on intellectual history, linguistics, philosophy, literary criticism and religious studies.

Many take advantage of software and hardware accessibility in the English language. However, for non native speakers, this inevitably becomes a problem; specifically for the complex Bangla language which is not easily integrated into the world of technology. Technical Challenges and Design Issues in Bangla Language Processing addresses the difficulties as well as the overwhelming benefits associated with creating programs and devices that are accessible to the speakers of the Bangla language. Professionals, students, and researchers interested in expanding the fields of computing, information and knowledge management, and communication technologies in the non-English realm will benefit from this comprehensive collection of research.

This book deals with the fundamentals of Jaimini Astrology. Second to 'PARASHAR; JAIMINI' is the greatest giant of Vedic Astrology. Parashar laid down the great principle of Vedic Astrology, while Jaimini went a step further and refined them. "JAIMINI UPDESH SUTRAS" were composed by Maharishi Jaimini. "SUTRAS" are very short sanskrit Stanzas with very vast and profound meaning. They are like a ball of thread. The more they are opened out, the more meaning they reveal, and they are so brief that they can even be memorised. Who was Jaimini Maharishi? No one knows for sure! Some learned men think that he was a disciple of the famous Maharishi Ved Vyas, who was Parashar's Son. They also feel that he is the famous author of 'Poorva Mimansa' and 'Jaimini Bharat'. Others feel that he is a later author who was very familiar with mantras. Whoever he was! His genius is reflected in the sutras he composed. These sutras are probably five thousand years old. They have stood the test of time and time has turned them into beautiful Gems of prediction. The centuries have proved their authenticity and soundness. These sutras are 936 in number, spread over four Adhyayas. The Greatest principle of Jaimini System is that the Study of Lagna is not enough. Apart from, studying the horoscope from the regular Lagna, Moon and Sun; one must study it in the light of karakamsa Lagna, Arudha, Up-pada, Hora lagna and the different karakas. In this way the personality of the Jatak is split up into its fundamentals and studied. Next is the karakatvas of the planets and houses. Parashar allotted permanent karakatvas to planets and houses. He also gave conditional karakatvas to the planets according to their lordship over different houses. Jaimini made prediction simpler, sharper and quicker by establishing limits of these karakatvas through the different char karakas. Another striking feature Jaimini is the Jaimini Drishti or Aspects. Every student of Astrology knows that both planets and Rashis affect us and yet we consider the aspects of only the planets! What about the Rashis ? This factor was taken into account by Jaimini. He established that the rashis also aspected each other and the planets placed in them also cast their Aspects along with their respective rashis. These aspects are quite different from Parashari aspects. Apart from these main features Jaimini has its own Yogas, Argalas and dashas. The most popular dasha for General use is Char dasha. Some of the other dashas as are Sthir dasha, Mandook dasha, Trikona dasha, Nirayan shoola dasha, Brahma dasha, Varnada dasha and Yogardha dasha. Some of them are conditional dashas while the others are used for a specific purpose. We shall be confining ourselves to Char dasha only in this book. On the face of it, it may appear that Jaimini contradicts Parashar. This is a misconception. If studied in-depth, it becomes clear that Jaimini is only a refinement of Parashari principles. Traditional Astrologers mostly use Jaimini for 'Ayurdaya' or assessment of longevity. The time is ripe for us to make an effort to revive this great system, so that it can be used for the entire reading of the horoscope and for bringing fineness or sookshmata in prediction. The main purpose behind introducing Jaimini Astrology is to encourage the use of composite techniques of prediction. These have been adopted superbly by shri Mahadeva pathak in his Jatak Tatva. He has used Jaimini principles alongside the Parashari principles to produce very good composite Techniques. In the end I would like to point out that most of the Astrological classics stress more on Negativity. As modern Astrologers we need to conduct researches to bring out the positive aspects of these principles and to modify and update them.

Light on Life: An Introduction to the Astrology of India

This is the first study of the modern history, experience, and ethno-religious identity of the Dönme, the descendants of seventeenth-century Jewish converts to Islam, in Ottoman and Greek Salonica and in Turkish Istanbul.

A New York Times Notable Book for 2011 In 1989, the year the Wall came down, a university student in Berlin on his morning run finds a corpse on a park bench and alerts the authorities. This scene opens a novel of extraordinary scope and depth, a masterpiece that traces the fate of myriad Europeans—Hungarians, Jews, Germans, Gypsies—across the treacherous years of the mid-twentieth century. Three unusual men are at the heart of Parallel Stories: Hans von Wolkenstein, whose German mother is linked to secrets of fascist-Nazi collaboration during the 1940s; Ágost Lippay Lehr, whose influential father has served Hungary's different political regimes for decades; and András Rott, who has his own dark record of mysterious activities abroad. The web of extended and interconnected dramas reaches from 1989 back to the spring of 1939, when Europe trembled on the edge of war, and extends to the bestial times of 1944–45, when Budapest was besieged, the Final Solution devastated Hungary's Jews, and the war came to an end, and on to the cataclysmic Hungarian Revolution of October 1956. We follow these men from Berlin and Moscow to Switzerland and Holland, from the Mediterranean to the North Sea, and of course, from village to city in Hungary. The social and political circumstances of their lives may vary greatly, their sexual and spiritual longings may seem to each of them entirely unique, yet Péter Nádas's magnificent tapestry unveils uncanny reverberating parallels that link them across time and space. This is Péter Nádas's masterpiece—eighteen years in the writing, a sensation in Hungary even before it was published, and almost four years in the translating. Parallel Stories is the first foreign translation of this daring, demanding, and momentous novel, and it confirms for an even larger audience what Hungary already knows: that it is the author's greatest work.

Have you ever wondered why one born with S?rya in Me?a R??i is adept in ??stras, famous in arts, fond of war, attached to duty, fond of travelling, engage in righteous deeds, glorious, powerful and kingly? Why would Candra in Me?a R??i indicate one with a complexion that of molten gold, steady wealth, strong libido, weak knee, ugly nails and bodily hair? Why the person has danger from watery places and suffers from injuries and weaknesses on the head? Almost all ??stras are filled with the results arising out of a Graha's R??i disposition. This is a fundamental building block in analysing a Ku??al?. However, hardly much explanation is found on why such and such results occur. This book is about decoding the results of Graha's R??i positions and examining how they impact us. This provides a systematic approach in understanding the basis on which the results are derived. Besides this, the results arising from Bh?va positions are examined. An important component of the book is delineating the effects of 7 Grahas from S?rya to ?ani in 12 Bh?vas for all the 12 Lagnas, i.e., 1008 combinations. The effects of R?hu and Ketu in the R??is and Bh?vas are also examined in detail. This book is for one who wishes to build a robust foundation on the application of a Graha's R??i and Bh?va results in analysing a Ku??al?.
