Aircraft Communications Addressing and Reporting System (ACARS) is a digital datalink system for transmission of short, and relatively simple messages between aircraft and ground stations using the airband VHF radio link. The message protocol was designed by Aeronautical Radio Incorporated (ARINC) to replace their VHF voice service and deployed in 1978 using telex type format.

SITA, a multinational information technology company, later augmented their worldwide data network by adding ground radio stations to provide ACARS service.

Amateur astronomers of all skill levels are always contemplating their next telescope, and this book points the way to the most suitable instruments. Similarly, those who are buying their first telescopes - and these days not necessarily a low-cost one - will be able to compare and contrast different types and manufacturers. This exciting and revised new guide provides an extensive overview of binoculars and telescopes. It includes detailed up-to-date information on sources, selection and use of virtually every major type, brand, and model on today's market, a truly invaluable treasure-trove of information and helpful advice for all amateur astronomers. Originally written in 2006, much of the first edition is inevitably now out of date, as equipment advances and manufacturers come and go. This second edition not only updates all the existing sections of "A Buyer's and User's Guide to Astronomical Telescopes and Binoculars" but adds two new ones: Astro-imaging and Professional-Amateur collaboration. Thanks to the rapid and amazing developments that have been made in digital cameras - not those specialist cool-chip astronomical cameras, not even DSLRs, but regular general-purpose vacation cameras - it is easily possible to image all sorts of astronomical objects and fields. Technical developments, including the Internet, have also made it possible for amateur astronomers to make a real contribution to science by working with professionals. Selecting the right device for a variety of purposes can be an overwhelming task in a market crowded with observing options, but this comprehensive guide clarifies the process. Anyone planning to purchase binoculars or telescopes for astronomy - whether as a first instrument or as an upgrade to the next level - will find this book a treasure-trove of information and advice. It also supplies the reader with many useful hints and tips on using astronomical telescopes or binoculars to get the best possible results from your purchase.

The Book of Five Rings is a text on kenjutsu and the martial arts in general, written by the Japanese swordsman Miyamoto Musashi around 1643. Written over three centuries ago by a Samurai warrior, the book has been hailed as a limitless source of psychological insight for businessmen-or anyone who relies on strategy and tactics for outwitting the competition.

Wonder Woman, Harley Quinn, Shuri, and Black Widow. These four characters portray very different versions of women: the superheroine, the abuse victim, the fourth wave princess, and the spy, respectively. In this in-depth analysis of female characters in superhero media, the author begins by identifying ten eras of superhero media defined by the way they portray women. Following this, the various archetypes of superheroines are classified into four categories: boundary crossers, good girls, outcasts, and those that reclaim power. From Golden Age comics through today's hottest films, heroines have been surprisingly assertive, diverse, and remarkable in this celebration of all the archetypes.

*The Samurai sword of Japan is probably the finest edged weapon ever made. This volume by leading Samurai expert Stephen Turnbull reveals the story of how and why it achieved this distinction. Particular attention is paid to the development of the familiar curved blade from the original straight blades, the associated development of Japan's famous steel-making techniques and the challenges from contemporary warfare. Together with the technical details of forging, polishing, mounting and testing; this volume is brought to life with details of the great swordmakers themselves. Moreover, no history of the sword would be complete without a detailed examination of its use in combat, from the greatest Samurai armies to individual duels and revenge killings. Personal accounts allow the reader to discover the art of Japanese swordsmanship in the hands of masters such as Miyamoto Musashi to the unnamed Japanese warrior defending his family's honour. This lively text is perfectly complemented by artwork reconstructions of the sword in use and colour photographs of the swords in use.*
