The adoption and enforcement of national laws to address and punish all forms of violence against women and girls, in line with international human rights standards, is one of the five key outcomes which the Secretary-General's campaign "UNiTE to End Violence against Women" aims to achieve in all countries by 2015. In May 2008, the United Nations Division for the Advancement of Women of the Department of Economic and Social Affairs (UNDAW/DESA) and the United Nations Office on Drugs and Crime (UNODC) organized an expert group meeting in Vienna, Austria, on good practices in legislation on violence against women. That meeting prepared a model framework for legislation on violence against women, including detailed recommendations, commentaries and examples of promising practices. The framework contained two types of recommendations: those that are applicable to all forms of violence against women; and those that are specific to domestic violence or sexual violence. In 2009, based on the work of the expert group meeting in Vienna, UNDAW/DESA developed a Handbook for Legislation on Violence against Women. This Handbook, with a foreword by Deputy Secretary-General, Dr. Asha-Rose Migiro, intends to provide all stakeholders with detailed guidance to support the adoption and effective implementation of legislation which prevents violence against women, punishes perpetrators, and ensures the rights of survivors everywhere. It is specifically hoped that the Handbook will be of use to government officials, parliamentarians, civil society, staff of United Nations entities and other actors in their efforts at ensuring that a solid legal basis is in place for

WHO and UNICEF jointly developed this global strategy to focus world attention on the impact that feeding practices have on the nutritional status, growth and development, health, and thus the very survival of infants and young children. The strategy is the result of a comprehensive two-year participatory process. It is based on the evidence of nutrition's significance in the early months and years of life, and of the crucial role that appropriate feeding practices play in achieving optimal health outcomes. The strategy is intended as a guide for action; it identifies interventions with a proven positive impact; it emphasizes providing mothers and families the support they need to carry out their crucial roles, and it explicitly defines the obligations and responsibilities in this regards of governments, international organizations, and other concerned parties.
