Christopher Nolan's caped crusader trilogy—Batman Begins, The Dark Knight, and The Dark Knight Rises—is considered by many to be one of the finest translations of comic book characters to the big screen. The second film in the series, The Dark Knight, was both a critical and commercial success, featuring an Oscar-winning performance by Heath Ledger as the Joker. The score—by Academy Award winner Hans Zimmer and eight-time Oscar nominee James Newton Howard—also received accolades, including a Grammy. Intricately interwoven with the sound design—and incorporating Mel Wesson's ground-breaking ambient music design, —Zimmer's and Howard's music gives the film an added layer of ominous tones that makes palpable the menace facing Gotham City. In Hans Zimmer and James Newton Howard's The Dark Knight: A Film Score Guide, Vasco Hexel delves into the composers' backgrounds to reveal the many facets of meaning in the highs and lows of the score. This book also highlights the working methods of Zimmer and Howard and how they collaborated with each other and the filmmaking team to create such a memorable soundtrack. By drawing on unprecedented access to some of the key creators of the film, the author provides unique insights into the score's composition. Hans Zimmer and James Newton Howard's The Dark Knight: A Film Score Guide will be of interest to cinema and music scholars, as well as fans of both composers.

Married for nearly 38 years, author Deborah DeArmond and her husband have made the spoken declaration, "I choose you today" a regular part of their communication. It's when we least feel like saying it that we need to remind ourselves that love is a choice, not a feeling. I Choose You Today features 31 scriptural principles that support marriage and help couples develop healthy biblically based behavior. Built on an introductory anecdotal story, each chapter has an inspirational takeaway of not only what to do, but how to begin applying the principles immediately. Thought provoking questions create talking points for couples to explore their own choices and experiences in each area serve to generate open dialogue of discovery. I Choose You Today is not a book of "shoulds," but one of clearly identified choices that each individual can make to grow their marriage and align it with the word of God. Every saying ends with a conventional wisdom quote.

This quasi-autobiography began when I concluded my nightly prayer in The Home, "Enough is enough. Please take me back, God." My intention was a one-way ticket to heaven. However, God sets me straight. "Luke, you have never been to heaven. Believe me, I AM never forgets a face." But God does take me back, back to the day I was born, eventually. However, whoever was in charge, ignored any close consideration for chronology, duration of events or individuals actually involved was ignored. Nevertheless, I got what every man, woman and child, covets, and dying to get. A second first-chance!

American composers are at the forefront of a renaissance in concert music, in the process expanding the very definition of the category. The impact of digital technology on the creative process and the unprecedented diversity of contemporary composers are arguably among the catalysts driving the rebirth. In this series of personal interviews with some of the most prominent composers of art music currently working on the American music scene, composer and educator Robert Raines leads the intimate conversations through subjects ranging from the source of inspiration to work habits, the realities of the business of music, and the impact of technology on music and life in the 21st century. The musicians who participated in these conversations are as different from one another as might be imagined, both in styles of music and approaches to life and art, resulting in a series of stories that offer a kaleidoscopic view of the many paths to creativity, yet a common thread that runs through the interviews is the passionate artistic drive that is shared by all. The inspirational stories of struggles and successes, told in the artists' own words and distinctively framed by their individual personalities - humorous, curmudgeonly, serious, serene, and playful by turns - is a delightful and thought-provoking journey full of personal insights, advice, and sharp observations on composing music in a changing, technology-driven world. A loving homage to the artistic spirit, this book is a must-read for students of composition, professors and scholars of music, composers and aspiring composers, and anyone interested in the subjective process of writing music. This rich and entertaining collection provides a unique glimpse into the workings of the creative spirit in the digital age.

It begins with a sealed envelope. Chad Breckinridge is a successful attorney who is pushing fifty and is trying to find some sense in his life. After a heartwrenching tragedy, he begins to look back on his existence from his days in high school as a football star and all around popular guy, to his time fighting in the jungles of Vietnam, the hazing, party life of college, and later the struggles of marriage, fatherhood and finally having to grow up and be responsible. The guy who lived most of his life, in the moment must now reflect back on it all to draw a picture of a life most profound. For all the zany adventures, and good times, and life changing events that Chad has been part of, true love was always just out of reach. Chad must come to grips with himself and discover HIS true meaning, and then, and only then, can he open the sealed envelope and find out what it all means. Chads story is a story of life and of love. And as always, its not the destination that matters, but the journey.

Students need more than just academic skills for success in college and career, and the lack of an explicit instructional focus on the “soft skills” critical to postsecondary success poses a challenge for many students who enter college, especially the underprepared. Based upon a multi-campus, cross-disciplinary collaboration, this book presents the resulting set of habits-of-mind-based strategies that demonstrably help not only low-income, ESL, and first-generation college students overcome obstacles on the path to degree completion; these strategies equally benefit all students. They promote life-long, integrative learning and foster intellectual qualities such as curiosity, openness, flexibility, engagement, and persistence that are the key to developing internalized and transferrable competencies that are seldom given direct attention in college classrooms. This contributed volume, written with full-time and adjunct faculty in mind, provides the rationale for this pedagogical approach and presents the sequential instructional cycle that begins by identifying students’ assets and progressively focusing on specific habits to develop their capacity to transfer their learning to new tasks and situations. Faculty from both two-year and four-year colleges provide examples of how they implement these practices in English, math, and General Education courses, and demonstrate the applicability of these practices across course types and disciplines. Chapters address key factors of college success, including: * The link between habits of mind and student retention and achievement * Using an assets-based approach to teaching and learning * Supporting and engaging students * Creating inclusive learning communities * Building confidence and self-efficacy * Promoting transfer of learning * Teacher networks and cross-disciplinary collaboration By foregrounding habits of mind as an instructional lens, this book makes a unique contribution to teaching in developmental and general education settings.

U.S. public schools are responsible for educating large numbers of English language learners and students with disabilities. This book considers policies for including students with disabilities and English language learners in assessment programs. It also examines the research findings on testing accommodations and their effect on test performance. Keeping Score for All discusses the comparability of states' policies with each other and with the National Assessment of Educational Progress (NAEP) policies and explores the impact of these differences on the interpretations of NAEP results. The book presents a critical review of the research literature and makes suggestions for future research to evaluate the validity of test scores obtained under accommodated conditions. The book concludes by proposing a new framework for conceptualizing accommodations. This framework would be useful both for policymakers, test designers, and practitioners in determining appropriate accommodations for specific assessments and for researchers in planning validity studies.

During my fourth year of teaching, I had the great privilege of working with an amazing educator by the name of Miss Bezanson. She taught a grade four class to whom I taught Physical Education. Therefore, I had the opportunity to socialize with her on a daily basis. About six months into the school year, Miss Bezanson gave me something that would forever change my teaching techniques and my life, although I did not realize it at that moment. One afternoon, I was in Miss Bezanson's class discussing a student who was displaying increasing behavioural problems in my Physical Education class. Sensing that I was experiencing tremendous stress as a result of this student, she gave me something that touched my heart and reinforced an important life lesson. She handed me a small paper card entitled "Hug Someone You Love Today". That was it! No preachy sermon or fancy teaching strategies. At that moment, I realized that maybe all that child needed was a simple hug. A sign of affection which he may or may not have been receiving at home. So the next day, I gave him a "Hug Someone You Love Today" card. From that day forward, I never had another major problem with that student. It was absolutely amazing. In this book, I will share with you some of the heart-felt, true stories that I have accumulated over the years as a result of passing out these "Hug Someone You Love Today" cards along to those in need. These are stories about normal folks like you and I, whose lives have been positively changed as a result of receiving this simple card. As you read these stories, hopefully you will begin to feel more peaceful and loving yourself.

How to Keep Score in Business

Keeping Score ensures that you look at the right measurements. The author contends that your measurements must focus on the past, present, and future and be based on the needs of customers, shareholders, and employees.

Measuring everything is more damaging than measuring nothing - pinpointing the vital few key measures is the key to success. Following a Baldrige approach, Mark Brown shows you how to evaluate your current approach to measurement and redesign inadequate metrics and systems used to collect and report data.

Developing an accurate measurement system ensures that you correctly measure customer satisfaction and value, the quality of products and services before they reach the customer, and employee satisfaction. In addition, you'll improve the accuracy of your metrics by linking them to key success factors as well as learn how to select the right financial metrics, perform process measurement, and track supplier performance.

Understanding Game Scoring explores the unique collaboration between gameplay and composition that defines musical scoring for video games. Using an

array of case studies reaching back into the canon of classic video games, this book illuminates the musical flexibility, user interactivity and sound programming that make game scoring so different from traditional modes of composition. Mack Enns explores the collaboration between game scorers and players to produce the final score for a game, through case studies of the Nintendo Entertainment System sound hardware configuration, and game scores, including the canonic scores for Super Mario Bros. (1985) and The Legend of Zelda (1986). This book is recommended reading for students and researchers interested in the composition and production of video game scores, as well as those interested in ludo-musicology.
