FORENSIC INVESTIGATOR Geoff Bernasconi had always been passionate about his job as a policeman in rural New South Wales and, from the earliest days of his career, went the extra mile, both for victims of crime

and for their families. But one night in 1984, he was called to investigate the scene of an horrific car accident in which an entire family had been wiped out – and which it was impossible for him to forget. Geoff's day-to-day working life became a catalogue of tragedies, some of which involved people close to him, and he found himself spiralling downwards in the grip of post-traumatic stress disorder. When Esther Mckay, fellow forensic investigator and author of the best-selling Crime Scene, heard that Geoff has been awarded

maximum compensation for his suffering, she knew immediately this was a story that needed to be told. This is a harrowing account of what it is like to work on the front-line of crime and tragedy as a forensic investigator. But it is also the inspiring story of someone who has been exposed to sights and experiences many of us can hardly even imagine, yet has emerged from the darkness to begin his journey to recovery.

In Indonesia, the legacy of Raden Ajeng Kartini (1879–1904) is celebrated on Kartini Day, every year on April 21. Around the world, Kartini is recognized as a major figure in the history of the advancement of women: a tireless and effective advocate of women's education and emancipation. However, this book is the first complete and unexpurgated collection of Kartini's published articles, memoranda, and

correspondence ever published in any language. This collection reveals Kartini's importance as a pioneer of the Indonesian nationalist movement. Claiming, in her letters and petitions, her people's right to national autonomy well before her male compatriots did so publicly, Raden Ajeng Kartini used her writing in an attempt to educate the Netherlands and Dutch colonialists about Java and the aspirations of its people. Had she lived, she would have been one of Indonesia's leading pre-independence writers, as well as an educationist. In 1964, she was elevated to

the status of national hero by Indonesia's first president, Sukarno. She has become one of the most well known Asian figures in the international women's movement. The product of several decades' study and based on archival sources, *Kartini: The Complete Writings, 1898-1904* is extensively annotated and provided with an authoritative historical introduction by one of the world's leading Kartini authorities. The book will be the essential resource for scholars and students of Kartini and her place in Indonesian history, around the world, for many years to come. (Series: Monash Asia) [Subject:

Indonesia, Japan, and the Netherlands have shaped the memory of that episode. Comparison of the memories in the three countries brings out the national patterns of memory. This volume gives an impression of the layered and pluriform nature of memory, and of the different forms of expression of memory, from the most personal level of oral testimony to the most public representation in monuments and films.

The favourable and warm reception, which the previous editions and reprints of this popular book has enjoyed all over India and abroad has been a matter of great satisfaction for me.

Taking on a subject that is still largely avoided in Japan, this powerful thriller explores the threat posed by an emperor, even in a ceremonial role, to a democratic government. Set in a fictional island country, the novel is told from the perspective of a group of young adults who are embroiled in their private problems of friendship, work, and sex. Much of the plot is revealed through their internet postings, which gradually become a tool of resistance when the country's popular young emperor dies and his sister is next in line to the throne. In the confusion that follows, martial law is declared and the populace, obsessed with fears about personal and national security, agrees to accept a new authoritarian

"This book is an introduction to automotive technology, with specific reference to battery electric, hybrid electric, and fuel cell electric vehicles. It could serve electrical engineers who need to know more about automobiles or automotive engineers who need to know about electrical propulsion systems. For example, this reviewer, who is a specialist in electric machinery, could use this book to better understand

the automobiles for which the reviewer is designing electric drive motors. An automotive engineer, on the other hand, might use it to better understand the nature of motors and electric storage systems for application in automobiles, trucks or motorcycles. The early chapters of the book are accessible to technically literate people who need to know something about cars. While the first chapter is historical in nature, the second chapter is a good introduction to automobiles, including dynamics of propulsion and braking. The third chapter discusses, in some detail, spark ignition and compression ignition (Diesel) engines. The fourth chapter discusses the nature of transmission systems.”
