A NEW YORK TIMES BESTSELLER "The fights against hunger, homelessness, poverty, health disparities, poor schools, homophobia, transphobia, and domestic violence are feminist fights. Kendall offers a feminism rooted in the livelihood of everyday women." —Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist*, in an important book of the current moment.—Time "A rousing call to action... It should be required reading for everyone."—Gabrielle Union, author of *We're Going to Need More Wine* A potent and electrifying critique of today's feminist movement announcing a fresh new voice in black feminism Today's feminist movement has a glaring blind spot: Mainstream feminists rarely talk about meeting basic needs as a feminist issue, argues Mikki Kendall, but food insecurity, access to quality education, safe neighborhoods, a living wage, and medical care are all feminist issues. All too often, however, the focus is not on basic survival for the many, but on increasing privilege for the few. That's only exacerbated the age-old problem of both internecine discord and women who rebuff at carrying the title. Moreover, prominent white feminists broadly suffer from their own myopia with regard to how things like race, class, sexual orientation, and ability intersect with gender. How can we stand in solidarity as a movement, Kendall asks, if some women are oppressing others? In her searing collection of essays, Mikki Kendall takes aim at the legitimacy of the modern feminist movement, arguing that it has chronically failed to address the needs of all but a few women. Drawing on her own experiences with hunger, violence, and hypersexualization, along with incisive comment on today's culture, the stigma of mental health, and more, Hood Feminism delivers an irrefutable indictment of a movement in flux. An unforgettable debut, Kendall has written a ferocious clarion call to all would-be feminists to live out the true mandate of the movement in thought and in deed.

Learning about social problems can be a highly rewarding experience. Although we live in challenging times, a course on social problems provides an excellent avenue for developing critical thinking skills and for learning how to use sociological concepts and perspectives to analyze specific social concerns ranging from war and terrorism, media concentration, drug addiction, and violence to the inequalities of racism, sexism, classism, ageism, homophobia, and ableism. The fourth Canadian edition of Social Problems in a Diverse Society focuses on the significance of racialization and ethnicity, age, sexual orientation, class, ability, and gender in understanding social problems in Canada and around the globe. Throughout the text, people - especially those from marginalized groups--are shown not merely as "victims" of social problems, but also as individual actors with agency who resist discrimination and inequality and seek to bring about change in families, schools, workplaces, and the larger society.

'Expert Determination' has been revised and updated, and includes a number of changes such as hanged perceptions of where expert determination fits into ADR, and the continuing battles about challenges to references before decision.

This is the first collection of essays focused on the many-faceted work of Kendall L. Walton. Walton has shaped debate about the arts for the last 50 years. He provides a comprehensive framework for understanding arts in terms of the human capacity of make-believe that shows how different arts - visual, photographic, musical, literary, or poetic - can be explained in terms of complex structural and aesthetic work. This book is a landmark work that addresses foundational issues concerning linguistic and scientific representations - for example, about the nature of scientific modelling or to explain how much of what we say is quite different from the literal meanings of our words. Contributions from a diverse group of philosophers probe Walton's detailed proposals and the themes for debates that have Walton's work at their core. This book will be of interest to scholars and graduate students working on aesthetics across the humanities, as well as those interested in the topic of representation and its intersection with perception, language, science, and metaphysics.

High Temperature Solid Oxide Fuel Cells: Fundamentals, Design and Applications provides a comprehensive discussion of solid oxide fuel cells (SOFCs). SOFCs are the most efficient devices for the electrochemical conversion of chemical energy of hydrocarbon fuels into electricity, and have been gaining increasing attention for clean and efficient distributed power generation. The book explains the stack designs and fabrication processes, cell and stack performance, and applications of SOFCs. Individual chapters are written by internationally renowned authors in their respective fields, and the text is supplemented by a large number of references for further information. The book is primarily intended for use by researchers, engineers, and other technical people working in the field of SOFCs.

the information contained in most of the chapters is fundamental enough for the book to be useful even as a text for SOFC technology at the graduate level.

Social Problems in a Diverse Society, Fourth Canadian Edition

A text with a unique compilation with a three-part focus: persuasion, writing, and speaking. Professors can adapt the order of chapters to meet the needs of their course structure. Students can study current theory and research in persuasion while sharpening their research, writing, and speaking skills.

"Social Problems in a Diverse Society" focuses on the significance of race, class, and gender; uses personal narratives to convey how problems are experienced by individuals and groups; and applies sociological perspectives throughout to examine social issues. The text includes five chapters on problems based on inequalities: wealth and poverty, race and ethnicity, gender, age, and sexual orientation. In the third edition, Diana Kendall, who specializes in social theory, continues to blend contemporary feminist and humanist perspectives with the three main sociological perspectives. The third edition also includes new boxes entitled "Social Problems and Statistics," which look at how statistics are used (or misused) to inform the public about social problems. Additionally, Kendall has added important new coverage of terrorism and national security, and white collar crime.

Now in its fourth edition, Communication and Human Behavior continues to offer students a broad introduction to the study of communication which is expansive yet integrated, that links theory to practice, and that is rigorous yet readable. Neither a watered-down treatment of the subject nor a how-to text, this volume presumes that the study of communication in human affairs is a complex phenomenon with important and far-reaching effects. Employing a thorough description of a variety of approaches and using the cohering insights of systems theory, the text presents to students the broad and colorful landscape of the field, outlines the history of communication study, and focuses on communication as a basic life process. Further, it develops an awareness of verbal and nonverbal codes used in sending and receiving messages, and examines the role of media in multiple contexts of human life.
