Britain is in the midst of a fierce battle over government spending. With debts mounting rapidly, the ?700 billion annual bill is no longer sustainable. But cuts face a wall of opposition, with dire warnings that they will ravage our society: hospital waiting lists will grow, schools will close and the poor will tumble into a new Dickensian abyss. Yet much of what the government currently spends is wasted, and public sector performance is often woeful. In Burning Our Money, Mike Denham casts a critical eye over the services we receive for our hard-earned cash, and finds them radically - often shockingly - wanting. For all the media insistence that the NHS is 'the envy of the world', it stacks up poorly against European healthcare systems. For all our apparently soaring exam grades, our children significantly underperform their future competitors in China, Korea and elsewhere. And for all our hand-wringing about abolishing poverty, our huge welfare system actually damages many of the poor it's supposed to help. Drawing on extensive research and up-to-the-minute reporting, Burning Our Money comprehensively debunks the myth that more public spending means better public services, and shows how we can - and must - get more for less.

Opposites Attract...and can thrive in a marriage built on God. The book starts with the results of a survey detailing the ten most important qualities that each man or woman wants in a spouse, then teaches us how we can be the person who breeds that quality in our husband or wife. Throughout the book the authors use their own personalities and experience with marriage to demonstrate how to do marriage right.

Unstoppable is a word defined as "difficult or impossible to preclude or stop." As a human quality, it is something that we associate with people such as sports superstars, those who do whatever it takes to inspire others and lead teams to the greatest of victories. Sometimes, an idea or person can become unstoppable. Unstoppable, like Charles Lindbergh crossing the Atlantic in a solo flight when no one had thought it was possible, or track star Roger Bannister breaking the four-minute mile barrier. Not everyone can be an explorer or a great athlete, but anyone can be unstoppable in their chosen endeavors in life. If you are willing to possess an unwavering determination to succeed and a consistent willingness to learn and evolve, you can become unstoppable and triumph too. This book is about a personal struggle, one in which the author awoke from a coma after a terrible accident and faced a life of permanent paralysis. A long battle of driven determination resulted in Yanni Raz regaining his health and becoming a self-made millionaire after migrating from his native Israel to the United States. Through careers as a musician, a Starbucks barista, a salesman, a real estate whiz, a professional poker player and a hard money lender, Yanni learned reliable principles and the skills necessary for success. Unstoppable covers many topics including controlling your life, making the best decisions, creating new opportunities, properly assessing signals, expertly negotiating, and succeeding by storytelling across the media landscape. You'll learn about integrity in business, asset diversification, and many other life tips that thousands of people learn from Yanni on a daily basis. It is time to become fearless and lead a powerful life. With Yanni's new book Unstoppable, you can do just that.

Almost the only indisputable fact about Colonel Tom Parker is that he was the manager of the greatest performer in popular music: Elvis Presley. His real name wasnâ€™t Tom Parker â€œ indeed, he wasnâ€™t an American at all, but a Dutch immigrant called Andreas van Kujik. And he certainly wasnâ€™t a proper military colonel: he purchased his title from a man in Louisiana. But while the Colonel has long been acknowledged as something of a charlatan, this book is the first to reveal the extraordinary extent of the secrets he concealed, and the consequences for the career, and ultimately the life, of the star he managed. As Alanna Nashâ€™s prodigious research has discovered, the Colonel left Holland most probably because, at the age of twenty, he bludgeoned a woman to death. Entering the US illegally, he then enlisted in the army as â€˜Tom Parkerâ€™. But, with supreme irony for someone later styling himself as Colonel, Parkerâ€™s military career ended in desertion, and discharge after a psychiatrist had certified him as a psychopath. He then became a fairground barker, working sideshows with a zeal for small-scale huckstering and the casual scam that never left him. And by the height of Elvisâ€™s success, Parker had become a pathological gambler who, at the same time as he was taking, amazingly, a full 50% of Presleyâ€™s earnings, frittered away all his wealth in the casinos of Las Vegas. As Nash shows, therefore, the often baffling trajectory of Elvis Presleyâ€™s career makes perfect sense once the secret imperatives of the Colonelâ€™s life are known. Parker never booked Presley for a tour of Europe because of the dark secret that ensured he himself could never return there. Even at his most famous, Elvis was still being booked to play out-of-the-way towns in North Carolina â€œ because the former fairground barker (who shamelessly negotiated as such even with top record company and film executives) knew them from his days on the circus circuit. And Elvis was trapped playing years of arduous seasons in Las Vegas â€œ two shows nightly, seven days a week, until boredom and despair brought on the excessive drug use that killed him â€œ because for Parker he was â€œan open chitâ€ whose huge earnings prevented his managerâ€™s losses at the gambling tables being called in. Alanna Nash knew Parker towards the end of his life, and has now uncovered the whole story, improbable, shocking, and never less than compelling, of how this larger-than-life man made, and then unmade, popular musicâ€™s first and greatest superstar.

After more than six years of active fighting in the Far East and over two years of open war between Japan and the Anglo-Saxon powers, Japanese political warfare was still a factor largely unknown in the Western world. Overshadowed by the much nearer and more closely felt exertions of the Nazi propaganda machine, it came to be regarded as too remote to have any noticeable bearing on the general course of the war. In the months leading up to Pearl Harbour, Tokyo Radio, the official Domei News Agency and the Japanese press jointly conducted an efficient war of nerves which, for all its alleged clumsiness effectively deceived many in Britain and the USA. The attack on Pearl Harbour showed how Tokyo's political warfare achieved its object: the creation of a political smoke-screen. During the period of Japan's conquests in 1942 following Pearl Harbour, and before that in China, Japan's political warfare showed itself quite capable of producing useful results.The volume is divided into two parts: the first deals with machinery and methods and gives as full and detailed a survey of the various government organs directing and controlling political warfare, the structure of the Japanese press, the organisation of Japanese broadcasting, the functioning of censorship and the extent to which education, science, literature, the arts and the cinema are being employed for purposes of propaganda, both in the Japanese homeland and in the wider area of the conquered empire. The second part deals with the aims and policies of Japanese propaganda, and attempts to give an outline of the way in which the machinery is being operated. It includes an analysis of the main groups of standard slogans and catchphrases which recur everywhere in Japanese propaganda and a special chapter is devoted to the use made of religion for purposes of political warfare.

Accompanied by hundreds of previously unpublished archival and contemporary photographs, award-winning historian Daniel Francis delivers a fascinating account of the first hundred years of trucking in BC. Beginning in Vancouver with James Starks first delivery van in 1907, motorized transport exploded in the province, soon traversing every dirt track, hauling logs on temporary plank roads and leading to a frenzy of experimentation and innovation from the failed Renard Road Train and early battery-operated vehicles to some truly impressive purpose-built trucks, many of them manufactured in BC.
