This year's WWDC was all about software. That meant no new Mac announcements, no low-cost HomePod, no iPhone SE... nothing but iOS, tvOS, watchOS, and macOS. There was still plenty to get excited about, though. Apple's upcoming operating systems are going to deliver a host of improvements and new features when they are released this autumn. Here's everything Apple announced at its keynote presentation. iOS 12 This is the big one. Apple's most popular devices run iOS, and they are getting a big, fat pile of improvements. Here's a quick list of everything announced, but for a deeper dive. Performance: Apple is paying special attention to performance, particularly on older devices. The company says that, on an iPhone 6s Plus, app launch up to 40 percent faster, and twice as fast when there's lots of heavy multitasking going on. The camera launches 70 percent faster, the keyboard pops up 50 percent quicker, and the share menu is twice as fast, all on an iPhone 6S Plus.

Apple introduced the newest version of its iOS operating system, iOS 13, on June 3 at the keynote event of the 2019 Worldwide Developers Conference. iOS 13 is a huge overhaul to iOS, with a long list of new features. First up, Apple continued on with its optimization trend introduced in iOS 12, making iOS 13 faster and more efficient than ever. App update times have improved, app launch times are two times faster, app download sizes have been reduced by up to 50 percent, and Face ID is 30 percent faster. There's a new system-wide Dark Mode option, which changes the entire look of the operating system from light to dark. You can choose either option, or have Dark Mode come on at sunset or on a custom schedule. iOS 13, offers a heap of new features. But using new software can be a little overwhelming, and getting stuck in fully can initially seem like a full-time job. Don't worry about doing the digging yourself, we've already done it. This book contains all the tips & tricks that you need to master the new iOS 13 like a pro. Here is a preview of what you will learn: -What is new in iOS 13-How to Enable Dark Mode in iOS 13-How to Create a Custom iMessage Profile in iOS 13-How to Silence Unknown Callers on Your iPhone in iOS 13-How to Save or Share a Safari Web Page as a PDF in iOS-How to Reduce Your iPhone or iPad Network Data Usage With iOS 13's Low Data Mode-How to Mute Email Threads in iOS 13-How to Block People From Sending You Mail in iOS 13-How to add Siri Shortcuts-iOS 13 Features-Hidden iOS Tips and Tricks-Much, much, more!
