Now, at the dawn of 4001 A.D., the latest Rai is about to inherit the dark truth behind the origin of his kind...and discover the sinister secret at the heart of Father's existence. The Bond That Never Was Two decades ago, the producers of the James Bond movies hired legendary crime novelist Donald E. Westlake to come up with a story for the next Bond film. The plot Westlake dreamed up – about a Western businessman seeking revenge after being kicked out of Hong Kong when the island was returned to Chinese rule – had all the elements of a classic Bond adventure, but political concerns kept it from being made. Never one to let a good story go to waste, Westlake wrote an original novel based on the premise instead – a novel he never published while he was alive. Now, nearly a decade after Westlake's death, Hard Case Crime is proud to give that novel its first publication ever, together with a brand new afterword by one of the movie producers describing the project's genesis, and to give fans their first taste of the Westlake-scripted Bond that might have been.

The moving image has become a key marketing tool for luxury fashion, central in enabling brands to shape their visual codes and extend their brand awareness. Fashion Film is the first detailed study of the shifting shape of fashion imagery in the digital age, investigating the role of the moving image in the promotion, communication and spectacle of contemporary fashion. Combining interdisciplinary analysis of cinema and digital culture, this ground-breaking book traces the emergence of fashion film in the 21st century through its historical roots in pre-digital forms of photography, experimental cinema, mass-media advertising and documentary film-making, right up to today's visual spread of contemporary fashion on video blogs, online magazines and live-streamed catwalk shows. Examining collaborations between fashion designers and pioneering image-makers such as Guy Bourdin, Jean-Paul Goode, William Klein and Nick Knight, the book highlights the critical tension between the fashion film conceived as a creative endeavour and as commercial enterprise. Fashion Film also includes a parallel focus on factual representations of fashion through the recent rise of documentary fashion film that goes behind the scenes to follow the processes and personalities involved in making fashion. Accessible and well-illustrated, Fashion Film will appeal to students and scholars of fashion, film, media, photography, celebrity, sociology and cultural studies.

Art of the Cut provides an unprecedented look at the art and technique of contemporary film and television editing. It is a fascinating "virtual roundtable discussion" with more than 50 of the top editors from around the globe. Included in the discussion are the winners of more than a dozen Oscars for Best Editing and the nominees of more than forty, plus numerous Emmy winners and nominees. Together they have over a thousand years of editing experience and have edited more than a thousand movies and TV shows. Hullfish carefully curated over a hundred hours of interviews, organizing them into topics critical to editors everywhere, generating an extended conversation among colleagues. The discussions provide a broad spectrum of opinions that illustrate both similarities and differences in techniques and artistic approaches. Topics include rhythm, pacing, structure, storytelling and collaboration. Interviewees include Margaret Sixel (Mad Max: Fury Road), Tom Cross (Whiplash, La La Land), Pietro Scalia (The Martian, JFK), Stephen Mirrione (The Revenant), Ann Coates (Lawrence of Arabia, Murder on the Orient Express), Joe Walker (12 Years a Slave, Sicario), Kelley Dixon (Breaking Bad, The Walking Dead), and many more. Art of the Cut also includes in-line definitions of editing terminology, with a full glossary and five supplemental web chapters hosted online at www.routledge.com/cw/Hullfish. This book is a treasure trove of valuable tradecraft for aspiring editors and a prized resource for high-level working professionals. The book's accessible language and great behind-the-scenes insight makes it a fascinating glimpse into the art of filmmaking

for all fans of cinema.

A wisecracking foreign correspondent recounts her experiences in Afghanistan and Pakistan while sharing cautionary observations about the region in its first post-Taliban years and the responsibilities of the U.S. and NATO.

All the science in Breaking Bad—from explosive experiments to acid-based evidence destruction—explained and analyzed for authenticity. Breaking Bad's (anti)hero Walter White (played by Emmy-winner Bryan Cranston) is a scientist, a high school chemistry teacher who displays a plaque that recognizes his “contributions to research awarded the Nobel Prize.” During the course of five seasons, Walt practices a lot of ad hoc chemistry—from experiments that explode to acid-based evidence destruction to an amazing repertoire of methodologies for illicit meth making. But how much of Walt's science is actually scientific? In The Science of “Breaking Bad,” Dave Trumbore and Donna Nelson explain, analyze, and evaluate the show's portrayal of science, from the pilot's opening credits to the final moments of the series finale. The intent is not, of course, to provide a how-to manual for wannabe meth moguls but to decode the show's most head-turning, jaw-dropping moments. Trumbore, a science and entertainment writer, and Nelson, a professor of chemistry and Breaking Bad's science advisor, are the perfect scientific tour guides. Trumbore and Nelson cover the show's portrayal of chemistry, biology, physics, and subdivisions of each area including toxicology and electromagnetism. They explain, among other things, Walt's DIY battery making; the dangers of Mylar balloons; the feasibility of using hydrofluoric acid to dissolve bodies; and the chemistry of methamphetamine itself. Nelson adds interesting behind-the-scenes anecdotes and describes her work with the show's creator and writers. Marius Stan, who played Bogdan on the show (and who is a PhD scientist himself) contributes a foreword. This is a book for every science buff who appreciated the show's scientific moments and every diehard Breaking Bad fan who wondered just how smart Walt really was.

Movies are not a waste of time if you're intentional about watching the movie you're viewing. Reel Leadership speaks to leaders and movie lovers who want to look at leadership and personal development in a new way. Author Joseph Lalonde wants leaders to enjoy entertainment without feeling guilty. When he began his own personal development journey, Lalonde discovered how leadership gurus try to dissuade people from enjoying regular forms of entertainment because they see it as a waste of time. He fell in line and believed this lie; that entertainment, especially movies, held no real value. Over time, he realized each movie provides a story with a moral premise or leadership lesson. In this book, you'll read about: David Hayter (the writer of X-Men 1 and 2) and how he dealt with a demanding director on set. Daniel Knudsen and how every great movie should have a moral premise. Marty Himmel and how he overcame fear because of the movies he watched. Through Reel Leadership, you'll discover how movies provide more than just a

quick escape. They are powerful tools for communicating leadership principles and how to find their leadership lessons.

When a mother is targeted by a dangerous group of masterminds, she must commit a crime to save her kidnapped daughter—or risk losing her forever—in this "propulsive and original" award-winning thriller (Stephen King). It's something parents do every morning: Rachel Klein drops her daughter at the bus stop and heads into her day. But a cell phone call from an unknown number changes everything: it's a woman on the line, informing her that she has Kylie bound and gagged in her back seat, and the only way Rachel will see her again is to follow her instructions exactly: pay a ransom, and find another child to abduct. This is no ordinary kidnapping: the caller is a mother herself, whose son has been taken, and if Rachel doesn't do as she's told, the boy will die. "You are not the first. And you will certainly not be the last." Rachel is now part of The Chain, an unending and ingenious scheme that turns victims into criminals—and is making someone else very rich in the process. The rules are simple, the moral challenges impossible; find the money fast, find your victim, and then commit a horrible act you'd have thought yourself incapable of just twenty-four hours ago. But what the masterminds behind The Chain know is that parents will do anything for their children. It turns out that kidnapping is only the beginning. "McKinty is one of the most striking and most memorable crime voices to emerge on the scene in years. His plots tempt you to read at top speed, but don't give in: this writing—sharply observant, intelligent and shot through with black humor—should be savored." —Tana French "A masterpiece. You have never read anything quite like The Chain and you will never be able to forget it." —Don Winslow "Diabolical, unnerving, and gives a whole new meaning to the word "relentless". Adrian McKinty just leapt to the top of my list of must-read suspense novelists. He's the real deal." —Dennis Lehane "Pairing an irresistible concept with a winner protagonist, The Chain promises to be your new addiction once you succumb to the first enticing page." —Alafair Burke "A grade-A-first-rate-edge-of-your-seat thriller. I can't believe what went through my mind while reading it." —Attica Locke

Kingsman: The Red Diamond #1

This is the first book describing the glorious geology of Iceland's Golden Circle and four additional excursions: (1) the beautiful valleys and mountains of the fjord of Hvalfjörður, (2) the unique landscape and geothermal fields of the Hengill Volcano, (3) the explosion craters, volcanic fissures, and lava fields of the Reykjanes Peninsula, and (4) the volcanoes (Hekla, Eyjafjallajökull, Katla), waterfalls, sandur plains, and rock columns of South Iceland. The Golden Circle offers a unique opportunity to observe and understand many of our planet's forces in action. These forces move the Earth's tectonic plates, rupture the crust, and generate earthquakes, volcanic eruptions, channels for rivers and waterfalls, and heat sources for hot springs and geysers. The Golden Circle includes the famous rifting and earthquake fracture sites at Thingvellir, the hot springs of the Geysir area, the waterfall of Gullfoss, and the Kerid volcanic crater. As the book is primarily intended for people with no background in geosciences, no geological knowledge is assumed and technical terms are avoided as far as possible (those used are explained in a glossary). With more than 240 illustrations - mostly photographs - explaining geological structures and processes, it is also a useful resource for geoscientists.
