Oxford Guide to Metaphors in CBT

This book chronicles artist Sanford Wurmfeld's now legendary color class, which he seeded, developed, and taught at Hunter College in New York City for more than two decades. The "Color Seminar" was geared to both artists and art historians alike, and Wurmfeld taught it each semester for twenty-five years, with his last class taking place in the spring of 2012, the year he retired. All told, more than 500 individuals participated in his elective course, and its extensive and continuing impact on contemporary art discourse, and on abstract painting in particular, cannot be overstated. From studios to classrooms, former students, now established artists in their own right, have been teaching their own interpretations of this course for years now in visual arts and curatorial programs across the country. Wurmfeld's new book begins with a discussion of afterimages and related experiments concerning the nature of color experience. It then works its way through theoretical ideas about color and the phenomenology of perception, finally ending with a discussion of color as content in 20th and 21st century abstraction -- what Wurmfeld terms presentational art -- with its emphasis on artists crafting the viewer experience through an active analysis of color. The book concludes with an exhaustive bibliography of additional resources for readers to continue their own self-directed research into color history and experience.

Examines general Cartesian coordinates, the cross product, Einstein's special theory of relativity, bases in general coordinate systems, maxima and minima of functions of two variables, line integrals, integral theorems, and more. 1963 edition.

More than ever, Christians are bombarded with tough faith questions from their pluralistic friends and neighbors. Many of these emerge as "anti-truth claims" and slogans we are all familiar with: • Why not just look out for yourself? • Do what you want--just as long as you don't hurt anyone • Miracles violate the laws of nature • Aren't people born gay? Paul Copan has been answering questions like these for many years. In When God Goes to Starbucks, he offers readers solid and caring Christian responses to these and many other concerns that are being discussed in Starbucks, shopping malls, youth groups, and schools. Each chapter provides succinct answers and points for countering the cultural questions believers are faced with today.

Quantum Leadership: Transdisciplinary leadership in complex systems Quantum Leadership: Building Better Partnerships for Sustainable Health, Fourth Edition skillfully prepares graduate students to thrive in a world of healthcare reform, complexity, and essential caring service. The Fourth Edition focuses on the current concepts of leadership, data, and research related to the complexities of leadership. The text also emphasizes the importance of principle-driven approaches and minimizes specific procedure-based solutions. This text is a seminal work around the complexity leadership as it applies to healthcare. There are very few other references that have the clarity, depth, and detail essential to enumerate this topic in healthcare organizations. It is especially valuable for graduate programs and DNP programs as it provides a foundation for contemporary leadership and emphasizes the characteristics necessary to lead complex organizations. The Fourth Edition features an additional chapter on the complexity of leadership in health care reform in an effort to incorporate the newest requirements of the Patient Protection Affordable Care Act in a manner that is relevant to leadership development and capacity. Case studies found within each chapter help reinforce translational work while new application exercises found in the "The Quantum Workbook" are an excellent supplement for learning. Additional updates to the text include: chapter podcasts, additional translational and learning material related to chapter case studies. Lastly, all references have been revised and updated to reflect the most current evidence around learning leadership.
