***When those you trust the most feel like strangers... In Between Worlds 6: Missing Home, Juliana and Elisabeth unlock painful family memories as they come to understand what absence really means for their families--and how unexpected discoveries can finally fill that void.***

***This book describes the horrors of our family which started during World War II in Germany, and continued for years thereafter because our father abandoned us. After twenty court processes, involving two dozen lawyers and judges, our family lost everything. My little brother, Siggie, and I suffered severe illnesses, starvation and homelessness. When we were about five and seven, our mother forced us to scavenge pig's innards from a manure pile. With the ever-present wire whip that she usually kept pinned to her skirt, she enticed us to eat them. A judge evicted us from our home. On Christmas Eve Day. For one year we squatted in a stranger's attic without water, sewer, heat, power or hope. When we were fourteen and sixteen, our relatives invited us to America. We now thought that our lives would improve: Cowboys and Indians! But when we later arrived on their dairy farms, they enslaved us. I was not allowed to bathe but once a year. At the age of twenty-one, I still lived without water, heat, power, or outhouse. After we finally escaped, Siggie and I worked our way through college, became American citizens and world travelers. For more than a century, scientists have raced to unravel the human family tree and have grappled with its complexity. Now, with an astonishing new discovery, everything we thought we knew about primate origins could change. Lying inside a high-security vault, deep within the heart of one of the world's leading natural history museums, is the so-called find of a lifetime - a perfectly fossilized early primate, older than the previously most famous primate fossil, Lucy, by four million years. A secret until now, the fossil - "Ida" to the researchers who have painstakingly verified her provenance - is the most complete primate fossil ever found. Forty-seven million years old, Ida rewrites what we've assumed about the earliest primate origins. Her completeness is unparalleled - so much of what we understand about evolution comes

partial fossils and even single bones, but Ida's fossilization offers much more than that, from a haunting "skin shadow" to her stomach contents. And, remarkably, knowledge of her discovery and existence almost never saw the light of day. With exclusive access to the first scientist to study her, the award-winning science writer Colin Tudge tells the story of Ida and her place in the world. A magnificent, cutting-edge scientific detective story followed her discovery, and Tudge offers a wide-ranging investigation into Ida and our earliest origins. At the same time, it opens a stunningly evocative window into our past and changes what we know about primate evolution and, ultimately, our own.

***The Secretary-General of the United Nations is a unique figure in world politics. At once civil servant, the world's diplomat, lackey of the UN Security Council, and commander-in-chief of up to a hundred thousand peacekeepers, he or she depends on states for both the legitimacy and resources that enable the United Nations to function. The tension between these roles - of being secretary or general - has challenged every incumbent. This book brings together the insights of senior UN staff, diplomats and scholars to examine the normative and political factors that shape this unique office with particular emphasis on how it has evolved in response to changing circumstances such as globalization and the onset of the 'war on terror'. The difficulties experienced by each Secretary-General reflect the profound ambivalence of states towards entrusting their security, interests or resources to an intergovernmental body.***

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, *Notes from the Hyena's Belly* offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

"...profoundly moving..." -Publishers Weekly  
Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad - the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday. This book is a collection of electronic publications over the past 15 years. These articles are devoted to the political and economic problems of post-Communist Georgia in the XXI century. For Georgia, even before the collapse of the USSR, and especially in the last years of its existence, the priority was a Euro-Atlantic orientation. Georgia's European path of development has not been an easy one. The formation of a European state in post-Communist Georgia is associated with many difficult tasks whose solution is of paramount importance for the future of this country. On June 27, 2014, the EU-Georgia Association Agreement was signed in Brussels. The agreement opened up new opportunities for Georgia to integrate into the EU. At the same time, Georgia still needs to do a lot of work for a real rapprochement with the EU and this will require many years of hard work.
