Updated for a new generation of bike lovers, Ultimate Harley Davidson is a visually stunning and comprehensive history of Harley-Davidson that charts the company and its bikes decade by decade. From the moment the first model rolled out of a backyard shed in Milwaukee, through Harley's postwar golden age, to the sought-after bikes that distinguish the company today, Ultimate Harley-Davidson presents seventy of the most beautiful and coveted Harleys of all time. Whether it's the 1911 V-Twin or the 1999 X1 Lightning, the seventy Harley-Davidson bikes examined are presented in minute detail, with close-ups of the engines and in-depth technical specifications.

"This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

Motorcycle Electrical Systems

PHP & MySQL: The Missing Manual

For Marine Engineers and ETOs

God: the illustrated edition

A motorcycle's electrical system can be daunting to even the most adept home mechanic. And yet, the more complex these systems become—and the more important to a motorcycle's function—the more useful, even critical, it will be to know something about them. That's where this book comes in with a user-friendly guide to understanding, diagnosing, and fixing the electrical systems and components that make a bike run . . . or falter. Veteran technician Tracy Martin explains the principles behind motorcycle electrical systems and how they work. He details the various tools, such as multimeters and test lights, that can be used to evaluate and troubleshoot any vehicle's electrical problem. And in several hands-on projects, he takes readers on a guided tour of their vehicle's electrical system, along the way giving clear, step-by-step instructions for

diagnosing specific problems.

Moral and political questions are vitally relevant to the issue of survival in the nuclear age. Ethics has much to teach us about the meaning of national defence and civic responsibility in the nuclear state. For instance, those in NATO who argue for increased spending on such weapons do so with the intention of defending the values of the West. They must therefore be absolutely sure that they are not - as the contributors to this

volume, originally published in 1984, powerfully suggest - undermining or destroying those values by the very means they adopt to preserve them. With the continued success of nuclear deterrence itself in question, responsible citizens feel an urgent need to assess the clash between personal doubts, cherished principles and their governments' loudly voiced moral certainties. In Objections to Nuclear Defence, professional philosophers of widely varying persuasions provide new analyses of these problems. They spell out clearly and vividly the moral and political objections - objections to the concrete nuclear policies of the Western governments today. Often impassioned but always rational, the book will be of special interest to students of international affairs, peace studies and applied philosophy as well as to the general reader who is trying to choose between political parties in Europe or North America.

At thirty-two, Marine Vandale is still waiting for true love. The kind of love that takes your breath away, knocks you on the ground, and makes you scared and crazy all at once. "You're certainly not going to find it if you spend all your time with three guys," her mother likes to remind her. It's just that Marine, her ex Laurent, Jeff her roommate, and their best friend Julien are inseparable. Together, they're trying to navigate the troubled waters of their thirties, become real adults and tame love. But what used to seem like child's play is becoming less and less of a game, and today's mistakes are not as meaningless as the ones they made in their twenties. But each one in his or her own way continues to hope. And from date to date, from man to man, through a thousand situations she describes as "summer stock theatre," Marine persists in believing that one day she'll prove to her mother that you can't fight love.
