

La Societ Della Mente

The theme of suicide was of paramount importance in Italy in the long nineteenth century, from the French revolution to the outbreak of World War I. A number of writers, intellectuals, politicians, and artists wrote about suicide, and a very high number of people killed themselves, for several reasons. There were suicides for love and for homeland, suicides for despair, and suicides for ennui. In Italy, once a very traditional, Catholic country, where suicide was very uncommon and rarely treated as a subject of moral theology or literature, it suddenly became extremely widespread. This book provides the first interdisciplinary account of this phenomenon, taken from several angles, including literature, the arts, politics, society, and philosophy, as well as sociology. Its authors rank among the best international specialists on suicide, and the figures dealt with include major intellectuals and writers such as Ugo Foscolo, Emilio Salgari, Giuseppe Pellizza da Volpedo, Giacomo Leopardi and Carlo Michelstaedter.

"A bibliography of some works relating to the Huguenot refugees, whence they came, where they settled": v. 1, pp. [130-149].

Mass media e controllo sociale nella società di massa

This volume brings together a selection of the papers on the theme of the Papacy and the Crusades, delivered at the 7th Congress of the Society for the Study of the Crusades and the Latin East. After the introduction by Michel Balard, the first papers examine aspects of crusader terminology. The next section deals with events and perceptions in the West, including papers on the crusades against the Albigensians and Frederick II, and on the situation in the Iberian peninsula. There follow studies on relations between crusaders and the local populations in the Byzantine world after 1204 and Frankish Greece, and in Cilician Armenia, while a final pair looks at papal interventions in Poland and Scandinavia.

New Frontiers of Relational Thinking in Psychoanalysis

L'IMPOSTA DI RICCHEZZA MOBILE NEI RAPPORTI CON LE SOCIETA COMMERCIALI

London, 29th May-3rd June, 1911

Table of contents

Scholarship on pre-university education in Italy before 1500 has been dominated by studies of individual towns or by general syntheses; this work offers not only an archival study of a region but also attempts to discern crucial local variations.

Multi-Chaos, Fractal and Multi-Fractional Artificial Intelligence of Different Complex Systems addresses different uncertain processes inherent in the complex systems, attempting to provide global and robust optimized solutions distinctively through multifarious methods, technical analyses, modeling, optimization processes, numerical simulations, case studies as well as applications including theoretical aspects of complexity. Foregrounding Multi-chaos, Fractal and Multi-fractional in the era of Artificial Intelligence (AI), the edited book deals with multi- chaos, fractal, multifractional, fractional calculus, fractional operators, quantum, wavelet, entropy-based applications, artificial intelligence, mathematics-informed and data driven processes aside from the means of modelling, and simulations for the solution of multifaceted problems characterized by nonlinearity, non-regularity and self-similarity, frequently encountered in different complex systems. The fundamental interacting components underlying complexity, complexity thinking, processes and theory along with computational processes and technologies, with machine learning as the core component of AI demonstrate the enabling of complex data to augment some critical human skills. Appealing to an interdisciplinary network of scientists and researchers to disseminate the theory and application in medicine, neurology, mathematics, physics, biology, chemistry, information theory, engineering, computer science, social sciences and other

far-reaching domains, the overarching aim is to empower out-of-the-box thinking through multifarious methods, directed towards paradoxical situations, uncertain processes, chaotic, transient and nonlinear dynamics of complex systems. Constructs and presents a multifarious approach for critical decision-making processes embodying paradoxes and uncertainty. Includes a combination of theory and applications with regard to multi-chaos, fractal and multi-fractional as well as AI of different complex systems and many-body systems. Provides readers with a bridge between application of advanced computational mathematical methods and AI based on comprehensive analyses and broad theories.

Per la solenne inaugurazione della Società economica di Messina. Orazione parentetica, etc. [With a preface by F. Bisazza.]

Supplemento agli anni 1848 e 1849 contenente le decisioni della Corte regia e del Tribunale di prima istanza di Lucca

Report of the Fourth Congress of the International Musical Society Teachers, Pupils and Schools, c. 1250-1500

Proceedings, American Philosophical Society (vol. 7, 1858-1861)

""With our American Philosophy and Religion series, Applewood reissues many primary sources published throughout American history. Through these books, scholars, interpreters, students, and non-academics alike can see the thoughts and beliefs of Americans who came before us.""

New Frontiers of Relational Thinking in Psychoanalysis aims to take the reader into the depths of their humanity, to promote a creative process that the author calls 'consistency'. Consistency is a quality that enables human subjects to make themselves the starting point of their life, whatever this may be. This book offers a thorough exploration of the place of relational thinking in contemporary psychoanalytic theory and practice. Starting with an analysis of the social and cultural context in which psychoanalysis is currently operating, and of the fragility of the human subject, the author continues by examining the essential assumptions, theoretical strands and key concepts, such as 'consciousness of consciousness', and the I subject, which helps underpin psychoanalysis. New Frontiers of Relational Thinking in Psychoanalysis develops theoretical and clinical ideas through a review of classic references, in light of new scientific and sociological perspectives, to explore and promote the progress of human beings towards their 'consistency'. This book will be of great interest to anyone wanting to understand the place of relational thinking in psychoanalysis now, and how it is likely to develop in the near future, attentive to the challenges of society. It will also be of great value to psychoanalysts, psychologists and other mental health professionals, both in practice and in training.

Actes du VIIe Congrès de la Society for the Study of the Crusades and the Latin East/ Proceedings of the VIIth Conference of the Society for the Study of the Crusades and the Latin East

In the context of debates surrounding the effects of new technologies on our mental faculties, particularly the attention span, this volume addresses the notion of a deterioration of attention, and the related ideas of cognitive overload, an inability to concentrate, and attention deficit disorder. Through a new conceptualization of attention based not on individualistic or universalistic approaches, but centered instead on the cultural and social variability of cognitive processes and the multiplicity of forces and environments that encourage, stimulate, and inhibit certain cognitive mechanisms, the author rejects the idea of a degradation or crisis of attention and proposes an alternative vision of the problem of attention in contemporary societies. Placing cultural conventions, social norms, and ecological environments at the forefront of our understanding of individual and collective attention, Attention and its Crisis in Digital Society will appeal to scholars of sociology, psychology, and philosophy with interests in social theory, cognitive processes, and the criticisms often levelled at digital society and new technologies.

This book examines the social, institutional and cultural setting of medical practices in the medieval town of Montpellier which boasted a famous school of medicine and a large community of barber-surgeons and apothecaries. Their collective fate is studied here.

A Meta-Theory of Being and Becoming

This book explores how women's relationship with food has been represented in Italian literature, cinema, scientific writings and other forms of cultural expression from the 19th century to the present. Italian women have often been portrayed cooking and serving meals to others, while denying themselves the pleasure of the table. The collection presents a comprehensive understanding of the symbolic meanings associated with food and of the way these intersect with Italian women's socio-cultural history and the feminist movement. From case studies on Sophia Loren and Elena Ferrante, to analyses of cookbooks by Italian chefs, each chapter examines the unique contribution Italian culture has made to perceiving and portraying women in a specific relation to food, addressing issues of gender, identity and politics of the body.
