Wayne May has done more work and research on the North American setting for the Book of Mormon than any single individual. The evidence he has compiled is overwhelming as a witness not only to the setting of this book of scripture, but also to the reality of the Book of Mormon as a historical record. Hugh Nibley remarked that "...one may well ask what kind of remains the Nephites would leave us from their more virtuous days. A closer approximation to the Book of Mormon picture of Nephite culture is seen in the earth and palisade structures of the Hopewell and Adena culture areas than in the later stately piles of stone in Mesoamerica." (Hugh Nibley, *The Prophetic Book of Mormon* [Salt Lake City and Provo: Deseret Book Co., Foundation of Ancient Research and Mormon Studies, 1989], 271.) The Hopewell culture, discussed in Wayne May's, *This Land*, is the only civilization in the Western Hemisphere that corresponds directly, in time and space, to the events described in the Book of Mormon and the statements of the prophet and translator, Joseph Smith. The evaporation of the Hopewell Culture has taken place as the expansion of the settlements and population centers have grown since the early 1800's. The best preserved details, drawings, and explanations of this culture can only be found in the records of eyewitness accounts and those who were present during the many excavations undertaken before the twentieth century. In this fourth volume of *This Land*, Wayne has brought together the works of early scholars and archaeologists as well as contemporary authors that have been exploring these settlements, monuments, and mounds of North America in a way that should have been done decades ago. Any serious student of the Nephite record must read *This Land* before coming to any conclusion about the geographical setting of the Book of Mormon. The evidence contained in *This Land* stands as another witness and testimony of this important scripture.

"More than any other book that I can think of, *Bronze Inside and Out* puts a human face on Western art - indeed, all art. It invites us to ponder the very nature of the creative process." - From the foreword by Brian W. Dippie, University of Victoria *Bronze Inside and Out: A Biographical Memoir of Bob Scriver* is a literary biography of sculptor Bob Scriver, written by his wife, Mary Strachan Scriver. Bob Scriver is best known for his work in bronze and for his pivotal role in the rise of "cowboy art." Living and working on the Montana Blackfeet Reservation, Scriver created a bronze foundry, a museum, and a studio - an atelier based on classical methods, but with local Blackfeet artisans. His importance in the still-developing genre of "western art" cannot be overstated. Mary Strachan Scriver lived and worked with Bob Scriver for over a decade and was instrumental in his rise to international acclaim. Working alongside her husband, she became intimately familiar with the man, his work, and his process. Her frank, uncensored, and highly entertaining biography reveals details that give the reader a unique picture of Scriver both as man and as artist. *Bronze Inside and Out* also provides a fascinating look into the practice of bronze casting, cleverly structuring the story of Bob Scriver's life according to the steps in this complicated and temperamental process.

Build Your Own Human Skeleton – Life Size!

Introduction to: Esoteric Anatomy - Part 1 This is an essential reference book for the seeker of Truth and spiritual progress. It takes a detailed look at the physical structures in you that underlie your spiritual nature, as well as the effects of spiritual awakening on the physiology. H. P. Blavatsky, Alice A. Bailey and others attempted in the words of their era, to help us understand what we truly are. They veiled much of it in mystic terms to protect those who might misuse this knowledge. Over one hundred images, diagrams and charts in this book, many in colour, will help you to understand this vast and important subject. In this first of the two part work, Dr. Baker draws on his training as a medical doctor to reveal in masterly fashion the exoteric (physical) and esoteric (less dense/higher) function and interactions within our nature. Many diseases are discussed and their karmic causes explained, making this volume a "must have" for those interesting in healing and for those wanting to "KNOW THY SELF".

The Skeletal System

This classic in forensic anthropology has been thoroughly updated and greatly expanded for the new Third Edition. The result presents the state of the medicolegal art of investigating human skeletal remains. The third edition follows more than 25 years after the second edition. During this time, considerable changes occurred in the field and Forensic Anthropology became a distinct specialty in its own right. Included in the book are detailed discussions on crime scene investigation, including excavation techniques, time interval since death, human or animal remains, mass graves, and preparation of remains. Existing chapters, all dramatically revised, bring readers in line with the current concepts of skeletal age; determination of sex; assessment of ancestry; calculation of stature; factors of individualization; superimposition and restoration of physiognomy. There is also a section on dental analysis examining such topics as dental anatomy, nomenclature, estimation of age in subadults and adults, determination of sex and ancestry, and pathological conditions. New additions are chapters on skeletal pathology and trauma assessment. A new chapter has also been added on "Forensic Anthropology of the Living." Although all of the sections of the book have been updated significantly, the authors have retained some sense of history to recognize the many pioneers that have shaped the discipline. The text will assist forensic anthropologists and forensic pathologists who have to analyze skeletons found in forensic contexts. This book has a global perspective in order to make it usable to practitioners across the world. Where possible, short case studies have been added to illustrate the diverse aspects of the work.

Time, Tradition and Society in Greek Archaeology is an innovative volume which examines the relevance of archaeological theory to classical archaeology. It offers a wideranging overview of classical archaeology, from the Bronze Age to the Classical period and from mainland Greece to Cyprus. Within this framework Spencer examines many of the issues which have become important in the study of archaeology in recent years - time, the past, gender, ideology, social structure and group identity. The papers in this collection cover such diverse topics as the rural landscape, classical art and scientific methodologies. Over the last century the study of classical archaeology has been orthodox and static. The essays in this collection examine it in the light of current theoretical archaeology and anthropology, making it more relevant and valuable to the study of archaeology in the 1990s. This is a diverse and topical collection, of great value to classicists, ancient historians, anthropologists and everyone interested in new approaches to archaeology.
