Describes various cruise lines; provides information on dining, shopping, and attractions at ports of call; and offers tips on selecting and booking European cruises and planning shore excursions.

This book is written in a simple, easy-to-understand format with lots of screenshots and step-by-step explanations. This book is geared toward developers that have a familiarity with Delphi or Free Pascal and would like to start using the open source Lazarus Integrated Development Environment. You should have knowledge of creating a console and GUI applications as well as creating basic components. Example source code and projects are provided to help learn the differences between Delphi and Lazarus projects.

On 2 March 1908, Lazarus Averbuch, a young Russian Jewish immigrant to Chicago, tried to deliver a letter to the city's Chief of Police. He was shot dead. After the shooting, it was claimed he was an anarchist assassin and an agent of foreign operatives who wanted to bring the United States to its knees. His sister, Olga, was left alone and bereft in a city seething with tension. A century later, two friends become obsessed with the truth about Lazarus and decide to travel to his birthplace. As the stories intertwine, a world emerges in which everything and nothing has changed . . . Prose this powerful could wake the dead! Fifty common pet ailments and the natural methods and remedies optimal to support their treatment are arranged in alphabetical order. The book includes a thorough discussion of several natural healing modalities and how they are used for pets. The methods of treatment include nutrition, naturopathy, vitamins and minerals, herbs, homeopathy, acupuncture/acupressure, flower essences, and gemstones. Each method is discussed for each of the fifty illnesses. Many people use natural healing for themselves, but wonder how to use it for their dogs and cats. This book is a comprehensive answer to that question. Use it with Diane Stein's books Natural Healing for Dogs and Cats and The Holistic Puppy.

*This exciting ebook bundle comprises five practical self-help programmes based on cognitive behavioural therapy (CBT) from the bestselling Overcoming series. Perfect for anyone experiencing problems with low mood or depression and associated problems such as low self-esteem, anger or sleep problems. This is also the perfect resource for therapists. Each book includes: -Case studies -Practical exercises -Monitoring sheets Overcoming Depression - 3rd edition If you suffer from depression you are far from alone. Depression is very common, affecting over 300 million people around the world. Written by Professor Paul Gilbert OBE, internationally recognised for his work on depression, this highly acclaimed self-help book has been of benefit to thousands of people including sufferers, their friends and families, and those working in the medical profession. This fully revised third edition has been extensively updated and rewritten to reflect over ten years of new research on understanding and treating depression, particularly the importance of developing compassionate ways of thinking, behaving and feeling. Overcoming Mood Swings Most people know what it is like to experience high or low spirits. For some individuals, however, emotional extremes can seriously disrupt their lives, either because they happen too frequently or because the mood swings are intense and are accompanied by other symptoms of depression or mania (often referred to as bipolar disorder). This practical self-help guide provides background information on depression and mania and offers tried and tested techniques that will help the reader identify and manage their mood more effectively, and achieve a more stable emotional state. Overcoming Low Self-Esteem A self-help classic, winning acclaim for its practical and user-friendly approach and now recommended on the National Health Service's self-help scheme known as Books on Prescription. This book will aid readers to understand what has caused their low self-esteem and, with this knowledge, break out of the vicious circle of negative self-image, learn the art of self-acceptance and alter their lives for the better. Overcoming Anger and Irritability An invaluable self-help guide to managing a widespread behavioural problem. This is a practical self-help programme for those who find that they are spoiling the lives of both themselves and those around them with their almost constant irritability and flashes of bad temper. It will help the reader understand why such behaviour occurs and what can be done to prevent it. Overcoming Insomnia Extensive research conducted over 25 years has established Cognitive Behavioural Therapy (CBT) as the treatment of choice for insomnia. For the first time, proven CBT principles have been brought together by a world-renowned expert on insomnia in a comprehensive self-help manual. In a clear step-by-step approach, new patterns of relaxation, sleeping and waking are quickly learnt. Based on clinically proven techniques.*

Having been involved in the shipping industry for more than 20 years in different roles, I have been wanting to publish a book on the complex subject of ship building contract. My association with Norwegian shipping companies who constantly upgraded their fleet of ships made the subject all the more interesting with first hand experience at various shipyards. The thought of the development taking place around the Indian coast and the Government of India focus on developing the maritime sector prompted me to write this book. This book guides on the various aspects of a ship building contract.

A Comprehensive Guide to Toxicology in Preclinical Drug Development is a resource for toxicologists in industry and regulatory settings, as well as directors working in contract resource organizations, who need a thorough understanding of the drug development process. Incorporating real-life case studies and examples, the book is a practical guide that outlines day-to-day activities and experiences in preclinical toxicology. This multi-contributed reference provides a detailed picture of the complex and highly interrelated activities of preclinical toxicology in both small molecules and biologics. The book discusses discovery toxicology and the international guidelines for safety evaluation, and presents traditional and nontraditional toxicology models. Chapters cover development of vaccines, oncology drugs, botanic drugs, monoclonal antibodies, and more, as well as study development and personnel, the role of imaging in preclinical evaluation, and supporting materials for IND applications. By incorporating the latest research in this area and featuring practical scenarios, this reference is a complete and actionable guide to all aspects of preclinical drug testing. Chapters written by world-renowned contributors who are experts in their fields includes the latest research in preclinical drug testing and international guidelines Covers preclinical toxicology in small molecules and biologics in one single source

ÉIf my present reader happens to be a Boy Scout or a scout-master who wants the scouts to build a tower for exhibition purposes, he can do so by following the directions here given, but if there is real necessity for haste in the erection of this tower, of course we cannot build one as tall as we might where we have more time. With a small tower all the joints may be quickly lashed together with strong, heavy twine, rope, or even wire; and in the wilderness it will probably be necessary to bind the joints with pliable roots, or cordage made of bark or withes; but as this is not a book on woodcraft we will suppose that the reader has secured the proper material for fastening the joints of the frame of this signal-tower and he must now shoulder his axe and go to the woods in order to secure the necessary timber. First let him cut eight straight polesÑthat is, as straight as he can find them. These poles should be about four and one half inches in diameter at their base and sixteen and one half feet long. After all the branches are trimmed off the poles, cut four more sticks each nine feet long and two and a half or three inches in diameter at the base; when these are trimmed into shape one will need twenty six or seven more stout sticks each four and one half feet long for braces and for flooring for the platform.

Patients with neurosurgical conditions are almost always referred from either primary care physicians, neurologists, internist or a specialist in family medicine. This guide will answer commonly asked questions about common neurosurgical conditions related to brain and spinal cord, in an attempt to fill in the gap and answer numerous questions that arises after a diagnosis is made on the loved ones. There are over 1500 academic and private hospitals in USA who have dedicated tertiary Neurosurgery services and cater millions of people in need, in addition to numerous centers that have level I and II trauma care. We aim to reach these centers and the families of the patients undergoing neurosurgical procedures. This book has been specially written and illustrated for families of patients undergoing neurosurgical procedures. It is straightforward, with non-technical language explaining the basics of neurosurgical diseases and their management including legal, ethical and financial issues.
