Review: "This illustrated A-Z features outstanding type designers from around the world, from Gutenberg to the present day. Arranged alphabetically by designer's name, the book contains over 260 biographical profiles. Entries are illustrated by key typefaces taken from a wide range of sources, including type specimens, original posters, private press editions and magazine covers, and also give a list of work and, where applicable, further reading references and a website address. An essential reference for typographers, graphic designers and students, the book also features a full index and eight short texts by leading typographers - Jonathan Barnbrook, Erik van Blokland, Clive Bruton, John Downer, John Hudson, Jean Francois Porchez, Erik Spiekermann and Jeremy Tankard - that cover a variety of different aspects of type design, including typeface revivals, font piracy, designing fonts for corporate identities and the role of nationality in type design."-BOOK JACKET

A leading American legal scholar offers a surprising account of the incompleteness of prevailing theories of freedom of speech. Robert C. Post shows that the familiar understanding of the First Amendment, which stresses the "marketplace of ideas" and which holds that "everyone is entitled to an opinion," is inadequate to create and preserve the expert knowledge that is necessary for a modern democracy to thrive. For a modern society reliably to answer such questions as whether nicotine causes cancer, the free and open exchange of ideas must be complemented by standards of scientific competence and practice that are both hierarchical and judgmental. Post develops a theory of First Amendment rights that seeks to explain both the need for the free formation of public opinion and the need for the distribution and creation of expertise. Along the way he offers a new and useful account of constitutional doctrines of academic freedom. These doctrines depend both upon free expression and the necessity of the kinds of professional judgment that universities exercise when they grant or deny tenure, or that professional journals exercise when they accept or reject submissions.

Runyon Heights, a community in Yonkers, New York, has been populated by middle-class African Americans for nearly a century. This book—the first history of a black middle-class community—tells the story of Runyon Heights, which sheds light on the process of black suburbanization and the ways in which residential development in the suburbs has been shaped by race and class. Relying on both interviews with residents and archival research, Bruce D. Haynes describes the progressive stages in the life of the community and its inhabitants and the factors that enabled it to form in the first place and to develop solidarity, identity and political consciousness. He shows how residents came to recognize common political interests within the community, how racial consciousness provided an axis for social solidarity as well as partial insulation from racial slights, and how the suburb afforded these middle-class residents a degree of physical and social distance from the ghetto. As Haynes explores the history of Runyon Heights, we learn the ways in which its black middle class dealt with the tensions between the political interests of race and the material interests of class.

An eclectic history of human curiosity, a great feast of ideas, and a memoir of a reading life from an internationally celebrated reader and thinker Curiosity has been seen through the ages as the impulse that drives our knowledge forward and the temptation that leads us toward dangerous and forbidden waters. The question "Why?" has appeared under a multiplicity of guises and in vastly different contexts throughout the chapters of human history. Why does evil exist? What is beauty? How does language inform us? What defines our identity? What is our responsibility to the world? In Alberto Manguel's most personal book to date, the author tracks his own life of curiosity through the reading that has mapped his way. Manguel chooses as his guides a selection of writers who sparked his imagination. He dedicates each chapter to a single thinker, scientist, artist, or other figure who demonstrated in a fresh way how to ask "Why?" Leading us through a full gallery of inquisitives, among them Thomas Aquinas, David Hume, Lewis Carroll, Rachel Carson, Socrates, and, most importantly, Dante, Manguel affirms how deeply connected our curiosity is to the readings that most astonish us, and how essential to the soaring of our own imaginations.

The Politics of Race and Space in a Black Middle-Class Suburb

Allergy is the sixth leading cause of chronic illness in the United States. More than fifty million Americans suffer from allergies, and they spend an estimated \$18 billion coping with them. Yet despite advances in biomedicine and enormous investment in research over the past fifty years, the burden of allergic disease continues to grow. Why have we failed to reverse this trend? Breathing Space offers an intimate portrait of how allergic disease has shaped American culture, landscape, and life. Drawing on environmental, medical, and cultural history and the life stories of people, plants, and insects, Mitman traces how America's changing environment from the late 1800s to the present day has led to the epidemic growth of allergic disease. We have seen a never-ending stream of solutions to combat allergies, from hay fever resorts, herbicides, and air-conditioned homes to numerous potions and pills. But, as Mitman shows, despite the quest for a magic bullet, none of the attempted solutions has succeeded. Until we address how our changing environment—physical, biological, social, and economic—has helped to create America's allergic landscape, that hoped-for success will continue to elude us.

You will never be lost for words in your travels around Spain and the Spanish islands again! Your ideal travel companion will ensure that you can say what you need in Spanish with ease and confidence.

Beato ' s Delhi offers a pictorial history of Delhi, brought vividly to life through the visual virtuosity of Felice A. Beato, the famous nineteenth-century photographer who came to India to record the last embers of the 1857 ' Mutiny ' , and Jim Masselos who, in 1997, retraced Beato ' s footsteps and photographed the same sites as far as possible. By the time Beato reached Delhi in January 1858, the British had already subdued the city, so he could not record the military campaign itself. However, his lens was perhaps the first to capture the battleground and other places of note in that campaign, providing for posterity some unique views of Old Delhi before substantial parts of it were demolished in the aftermath of 1857, or radically redeveloped as the years progressed. Beato ' s luminous views are juxtaposed with Masselos ' s present-day photographs of the bustling metropolis, shedding light on how the face of Delhi has transformed in the intervening 154 years. Supplemented with an illuminating text by Masselos and Narayani Gupta, Beato ' s Delhi is a moving testament to the resilience of this ever-evolving city.
