the practical application. The book discusses existing theories of leadership, analyzes strengths of individual theories, and their weaknesses in providing a holistic view of leadership, leading to a need for a holistic approach to leadership. The book builds up a holistic model and plugs in the existing theories to develop a bigger picture. The cardinals of the holistic model are then discussed as individual chapters from theoretical as well as practical aspects of leadership. The discussion of individual cardinals is finally translated into an applied leadership model that presents a

This book examines numerous topic areas that are considered to be especially relevant for making a strategic leader development investment. The topics covered are areas that have theoretical and empirical connections to important aspects of growth, change, adult development, and underlying abilities, skills, and competencies needed to lead effectively in times of great complexity. In addition, these are investment areas identified by the U.S. Army--a world-class organization faced with the need for radical transformation--as particularly relevant for success and survival. This book identifies key concerns in developing leaders

and leadership, and in transforming organizations to better meet the challenges of a complex world. There are two aspects of this book that distinguish it from the numerous existing volumes on leadership in the scholarly and popular-press literatures. Most important, the overarching focus of the present book is on development. There are many offerings on the topic of leadership, but relatively few that focus on leader development--especially from a scholarly, academic perspective. Also, this volume offers a unique perspective in examining those underlying psychological competencies and processes that are viewed as

especially relevant for leader development. The chapters that are collected in this edited volume were originally commissioned by the U.S. Army Research Institute as "white papers" to better help Army officers and researchers understand important issues in leader development. The present organization of the papers is around four central themes: a) Accelerating Leader Development, b) Cognitive Skills Development, c) Developing Practical and Emotional Intelligence, and d) Enhancing Team Skills.

Based on years of original research, this book controversially counters almost every existing leadership model and approach. It shows how as leaders rise to senior levels, their roles become less about doing things that directly drive results and more about directing and supporting others to achieve objectives. Using case studies and research insights the authors reveal how leadership success is thus not so much about having the right core capabilities, but about creating the right environment. Using the analogy of a smartphone operating system (OS), the book presents a new way of thinking about leadership. The authors provide a clear

- How to diagnose the impact you have as a leader and understand the OS you create**
- How famous business and societal leaders have created effective - and sometimes ineffective - OSs**
- How to optimise your OS to produce the best results**
- How to get people working together effectively, and be a high-performing leader**
