Most rational people don't pay \$40 for \$20 items. And yet with wine, it happens all the time. Wine can be an expensive hobby. Founder of the popular site ReverseWineSnob.com, Jon Thorsen is an unapologetic frugal wine consumer. He flips wine snobbery on its head by pushing a \$20 or less mantra. Reverse Wine Snob is designed to help wine drinkers stop wasting money and get the most satisfaction out of their drinking dollars. It reveals Thorsen's Ten Tenets of Reverse Wine Snobbery—ten beliefs that eliminate myths about wine—as well as a unique rating system that includes the cost of the bottle so that there is satisfaction in both taste and price. In Jon's unique system, the more expensive a wine, the better it must taste. Reverse Wine Snob explains: The number one rule all wine drinkers should follow, no matter what the wine snobs say. How to shop for wine at stores like the nation's #1 wine retailer Costco and Trader Joe's. The regions and varieties of wine that give the best value. Why the price of a wine has nothing to do with its taste. Why the distribution system in the US is broken which costs you money and limits your wine choices. Tons of Jon's very favorite wine picks. Jon dapples in every kind of wine from \$10 kitchen sink blends to the \$20 "Saturday Night Splurge," so delicious it's worth twice the price. Reverse Wine Snob brings plain old common sense to the wine industry and encourages wine lovers to explore the world of inexpensive quality wine. The Victorine Exegesis of the Bible in the Light of Its Northern-French Jewish Sources

A business magnate calls on wine expert Benjamin Cooker to kickstart his new wine business in Beaujolais, sparking bitter rivalries. Describes the 400-hundred-year history of wine making in Argentina and how it went from being an unpalatable and famously horrible potable to winning a taste test against the world's top wines from the Napa Valley and Bordeaux in 2001. 13,000 first printing.

In the twentieth century a number of scholars pointed to parallels between the in hebreo or secundum hebreos interpretations in the commentaries of Hugh and Andrew of St. Victor and comments in Latin sources and in twelfth-century Jewish writers of the Northern-French school (Rashi, Joseph Qara, Rashbam, and Bekhor Shor). The scholars suggested various hypotheses on the Victorines' direct or indirect knowledge of the Hebrew text of the Bible and the identity of the Jews on whom the Victorines reportedly drew. Montse Leyra's book offers a systematic work of comparative analysis between the Victorines' in hebreo interpretations and their parallels in the Latin and Jewish sources, and between these interpretations and parallel biblical readings in the textual traditions of the Vetus Latina, the Vulgate, and the Hebrew Masoretic Text. In her analysis, Montse Leyra discusses parallels that have gone unnoticed by previous scholars, identifies which sources were a direct source for the Victorines and which were transmitted via later, intermediary sources, and determines whether the Victorines took up textual biblical variants coming from the Vetus Latina and the Septuagint as literal translations of the Hebrew Masoretic Text or they were transmitting the Masoretic text itself. Finally, by studying the parallels of content and exegetical method between the in hebreo interpretations of the Victorines and surviving interpretations of Rashi, Rashbam, Joseph Qarah, and Bekhor Shor, she ascertains whether we can actually identify and distinguish the exegetes of the Northern-French school whose works have been transmitted to us as direct sources of Hugh and Andrew from other Jewish exegetes of their time.

Joseph Smith, Jr.

*The story of the people who see beyond the stars—an astronomy book for adults still spellbound by the night sky. Humans from the earliest civilizations through today have craned their necks each night, using the stars to orient themselves in the large, strange world around them. Stargazing is a pursuit that continues to fascinate us: from Copernicus to Carl Sagan, astronomers throughout history have spent their lives trying to answer the biggest questions in the universe. Now, award-winning astronomer Emily Levesque shares the stories of modern-day stargazers in this new nonfiction release, the people willing to adventure across high mountaintops and to some of the most remote corners of the planet, all in the name of science. From the lonely quiet of midnight stargazing to tall tales of wild bears loose in the observatory, *The Last Stargazers* is a love letter to astronomy and an affirmation of the crucial role that humans can and must play in the future of scientific discovery. In this sweeping work of narrative science, Levesque shows how astronomers in this scrappy and evolving field are going beyond the machines to infuse creativity and passion into the stars and space and inspires us all to peer skyward in pursuit of the universe's secrets.*

CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.

New York Times bestselling author Bernard Cornwell makes a dramatic departure with this enthralling, action-packed standalone novel that tells the story of the first production of A Midsummer Night's Dream—as related by William Shakespeare's estranged younger brother. Lord, what fools these mortals be . . . In the heart of Elizabethan England, Richard Shakespeare dreams of a glittering career in one of the London playhouses, a world dominated by his older brother,

William. But he is a penniless actor, making ends meet through a combination of a beautiful face, petty theft and a silver tongue. As William's star rises, Richard's onetime gratitude is souring and he is sorely tempted to abandon family loyalty. So when a priceless manuscript goes missing, suspicion falls upon Richard, forcing him onto a perilous path through a bawdy and frequently brutal London. Entangled in a high-stakes game of duplicity and betrayal which threatens not only his career and potential fortune, but also the lives of his fellow players, Richard has to call on all he has now learned from the brightest stages and the darkest alleyways of the city. To avoid the gallows, he must play the part of a lifetime . . .

. Showcasing the superb storytelling skill that has won Bernard Cornwell international renown, *Fools and Mortals* is a richly portrayed tour de force that brings to life a vivid world of intricate stagecraft, fierce competition, and consuming ambition.

This monograph analyses and describes successful educational actions with a specific focus on vulnerable groups (i.e. youth, migrants, cultural groups e.g. Roma, women, and people with disabilities). Concrete data that shows success in school performance in subject matters such as math or language will be provided, as well as children, teachers and families accounts of the impact of this success. Alongside, there is an analysis of the relationship between these children's educational performance with their inclusion or exclusion from different areas of society (i.e. housing, health, employment, and social and political participation). Many studies have already diagnosed and described the causes of educational and social exclusion of these vulnerable groups. This monograph, however, provides solutions, that is, actions for success identified through the INCLUD-ED project, thus providing both, contrasted data and solid theoretical background and development. Some examples of these actions are interactive groups (or heterogeneous grouping in the classroom with reorganisation of human resources), extension of the learning time, homework clubs, tutored libraries, family and community educative participation, family education, or dialogic literary gatherings. All these actions have been defined as successful educational actions, which mean that they lead to both efficiency and equity. Finally, recommendations for policy and practice are included and discussed.

"If you are curious and open to the life around you, if you are troubled as to why, how and by whom political power is held and used, if you sense there must be good intellectual reasons for your unease, if your curiosity and openness drive you toward wishing to act with others, to 'do something,' you already have much in common with the writers of the three essays in this book." — Adrienne Rich With a preface by Adrienne Rich, *Manifesto* presents the radical vision of four famous young rebels: Marx and Engels' Communist Manifesto, Rosa Luxemburg's Reform or Revolution and Che Guevara's Socialism and Humanity.
