How Nations Remember draws on multiple disciplines in the humanities and social sciences to examine how a nation's account of the past shapes its actions in the present. National memory can underwrite noble aspirations, but the volume focuses largely on how it contributes to the negative tendencies of nationalism that give rise to confrontation. Narratives are taken as units of analysis for examining the psychological and cultural dimensions of remembering particular events and also for understanding the schematic codes and mental habits that underlie national memory more generally. In this account, narratives are approached as tools that shape the views of members of national communities to such an extent that they serve as co-authors of what people say and think. Drawing on illustrations from Russia, China, Georgia, the United States, and elsewhere, the book examines how "narrative templates," "narrative dialogism," and "privileged event narratives" shape nations' views of themselves and their relations with others. The volume concludes with a list of ways to manage the disputes that pit one national community against another.

This is a complete "Intro to Airbrushing" course in a workbook form. A classroom in a book! There is only so much an airbrush can do - dots, lines, daggers, and shading. We introduce each skill in a logical and exciting way. In our book, each skill is cumulative, so grasping each technique is easier than tackling them out of order as you would if you were self taught and left to sift through a cluster of internet information that is not necessarily correct. Our method is successful, because we have taken the entire contents of an Intro to Airbrushing class, and made it into a workbook... yes a WORKBOOK! The skills are introduced in an interesting way, and each lesson has a corresponding workbook page that can be practiced over and over until you are proficient at each skill! There has never been anything like this before! With over 50 lessons, you will master each skill and work up to the four beautiful and challenging final projects. We cover all the basics that you need to know to get set up in airbrushing: types of airbrushes, compressors, paint, substrates, etc....even how to properly hold an airbrush and how to clean it. We are so thorough and innovative, we have earned the endorsement of Anest Iwata-Medea, Inc., the maker of the best, and our favorite, airbrushes! A course like this costs hundreds of dollars just for tuition if you were to attend a workshop. With travel and lodging, you can spend thousands of dollars for just ONE course. With this book, you get the same content but are free to take it at your own pace. This is an excellent way to introduce airbrushing into your skill set and develop a life-long passion and income source.

When a doctor tells you there's a one percent chance that an operation will result in your death, or a scientist claims that his theory is probably true, what exactly does that mean? Understanding probability is clearly very important, if we are to make good theoretical and practical choices. In this engaging and highly accessible introduction to the philosophy of probability, Darrell Rowbottom takes the reader on a journey through all the major interpretations of probability, with reference to real-world situations. In lucid prose, he explores the many fallacies of probabilistic reasoning, such as the 'gambler's fallacy' and the 'inverse fallacy', and shows how we can avoid falling into these traps by using the interpretations presented. He also illustrates the relevance of the interpretation of probability across disciplinary boundaries, by examining which interpretations of probability are appropriate in diverse areas such as quantum mechanics, game theory, and genetics. Using entertaining dialogues to draw out the key issues at stake, this unique book will appeal to students and scholars across philosophy, the social sciences, and the natural sciences.

*"The New Gold Standard in Automotive Step-By-Step Books Automotive Cheap Tricks & Special F/X II, the ultimate book of automotive custom painting has been released. Automotive Cheap Tricks & Special F/X II is a compilation of step-by-step instruction by Craig Fraser, one of the greatest forces behind the popularization of automotive custom painting. In fact, Special F/X II far exceeds its predecessor, F/X I, in superior design, nearly double the content (31 chapters, including 11 introductory sub-chapters and a comprehensive glossary), and size (212 pages). The subtitle, Learn How to Paint Cars, Trucks, Motorcycles, Musical Instruments, Surfboards, and R.C. Cars, really says it all, and lives up to its promise with some of the most cutting-edge work dissected for your reference and execution. This amazing visual smorgasbord tutors on how to achieve stunning graphics, special effects, murals, pinstriping, and more for beginners and pros. It's especially fascinating how perceptually difficult effects (bullet holes, fire, water droplets, old school flames, and tons more) and textures (alligator and dragon skin, chrome, cheetah fur, faux f/x, and many others) are so easily rendered with stencils, freehand shields, a variety of tapes, vinyl, and even a torch! It almost seems as if the author gave away too much, like a magician who would surprisingly reveal his secrets with impunity.*

*Fraser was thoughtful enough to include enough editorial and instruction for newbies that includes a Back to Da' Basics chapter, and some great articles on self-promotion, the zen of custom painting, how to photograph your artwork (the importance of this cannot be overstated), the paint and equipment you'll need to get started, and the business of custom painting. In great, painstaking detail throughout, the book also addresses critically essential information on the proper sequences and steps to working with urethanes and clearcoats, among other things. The fact that improper methods can lead to catastrophic results on, say, a \$100,000 vehicle makes this book even more important. Chapters include: Flamin' Out A Killer Skull (skull and flames on a motorcycle tank), Steampunk Guitar (mind-blowing; gorgeous), Formula Drift (classic graphics with stunning results), Dragon Drums, Da Kine Surf-Tiki (Craig proves that you, too, can paint a bitchin' surfboard), Rice Fink (sure to be a big favorite), RC Car (you better read this before you attempt one), Donkey Frog, and Homage A Giger (H.R., that is). Automotive Cheap Tricks & Special F/X II is beautifully printed in full color and on heavy paper stock, and it's obvious that the publisher spared no expense in producing it. At \$34.95 this volume is a steal. And it is, without question, the new gold standard for books on automotive custom painting and will remain so for years to come."*

*Airbrush makeup is sprayed onto the skin using an airbrush instead of being applied with sponges, brushes, fingers, or other methods. An airbrush has 3 parts; a powered compressor, used to create an even and controllable airflow through a medical grade hose. Airbrush makeup gives a flawless coverage by greatly reducing skin imperfections while giving skin a beautiful natural finished result. It is water resistant and will last for up to fifteen hours or more, hence it is perfect for weddings. This guide will teach you pretty much everything you need to know about airbrush; how to effectively use the airbrush makeup for weddings, parties or normal day as well as what to avoid while using the airbrush makeup, the best brand to use and so on... Table of Contents Introduction: Materials: Colors Terms Airbrush and its Mechanism Maintenance and Troubleshooting Basic Airbrush Exercises: Airbrush Exercises: Humpback Whale Red Cap Oranda Goldfishes Dolphin Whale Shark Leafy Seadragon Author Bio Publisher Introduction: Thanks for purchasing this eBook, as you show a genuine interest in the world of Airbrushing "Aquatic Animals". Back when I was learning to draw aquatic animals, I liked watching the wonderful scene inside the aquarium, of my pet "Goldfish". At first I was amazed at the features and colors, but when I kept seeing more details as it moved, an idea struck inside my head. I thought about adding some colors to my drawing. I kept the drawing for a while, since I'm still learning to paint in acrylic, and after a few months of browsing some of my files, I saw my drawing again. I decided to paint it in colors with acrylic using an airbrush, since by that time I already knew how to use an airbrush. I painted it with a very satisfied result, and later on I saw it hung on the wall of my best friend house. I was so glad! I'm not encouraging you to give away your masterpiece, rather the point I'm making is that with your airbrush, you can make limitless fantastic art. If only you could imagine this tool's greatness with its capabilities. So, I made this eBook for you to learn the basics of airbrushing that every beginner needs to know and practice to master it. I made this book also, for an airbrush artist who wants to learn to paint aquatic creatures. We will be using some other materials to complete our artwork like; Watercolor pencils, masking film or other masking materials that are available, and many more.
