**Winner of the 2019 AAAL First Book Award* Racialized Identities in Second Language Learning: Speaking Blackness in Brazil provides a critical overview and original sociolinguistic analysis of the African American experience in second language learning. More broadly, this book introduces the idea of second language learning as "transformative socialization": how learners, instructors, and their communities shape new communicative selves as they collaboratively construct and negotiate race, ethnicity, gender, sexuality, and social class*

identities. Uju Anya's study follows African American college students learning Portuguese in Afro-Brazilian communities, and their journeys in learning to do and speak blackness in Brazil. Video-recorded interactions, student journals, interviews, and writing assignments show how multiple intersecting identities are enacted and challenged in second language learning. Thematic, critical, and conversation analyses describe ways black Americans learn to speak their material, ideological, and symbolic selves in Portuguese and how linguistic action reproduces or resists power and inequity. The book addresses key questions on how learners can authentically and effectively participate in classrooms and target language communities to show that black students' racialized identities and investments in these communities greatly influence their success in second language learning and how successful others perceive them to be.

Are you planning on visiting a Spanish speaking country, but you don't know a word of Spanish? Do you feel like there is just no time in your busy day to learn a new language? Maybe you want to learn Spanish, but you're afraid it will be boring and useless? The thought about traveling to a new country where you can't understand or speak the language can sound scary. But it doesn't have to be. People who think about learning a new language can be filled with dread by the amount of studying and effort that has to be put into it. Learning a new

language the right way can be fun and easy! Meaning you don't have to be hunched over multiple Spanish textbooks, studying multiple hours a day. Instead, this book uses interval training. You can learn vocabulary, grammar, and phrases for just 10 minutes a day. In 2016 a study, called "The Right Time to learn" by Paul Smolen for the NCBI journal, he states, "[studying] with any considerable number of repetitions a suitable distribution of them over a space of time is decidedly more advantageous than the massing of them at a single time." Meaning you should study for 10-minute intervals every day, to maximize your long term Spanish learning goals. In this book, you will find it easy to understand vocabulary, grammar, and everyday phrases. With just 10 minutes a day, Spanish doesn't need to be hard or impossible to understand. In this eye-opening book, you will find: How understanding 2 of these words is essential in everyday Spanish-and how to use them without making a mistake How you can learn enough Spanish in just 45 days using this one simple studying technique How to use feminine and masculine pronouns correctly - even if you find them confusing The absolute worst 5 common mistakes you could be doing right now as a Spanish learning speaker - and how to avoid them at all cost Why these 6 mystery phrases are essential in everyday restaurant conversations - and when to use them without sounding confused The 23 must need phrases if you ever

hope to communicate with Spanish speakers - and when to use them to communicate your wants What native Spanish speakers know about conversing in everyday Spanish by using these 10 simple phrases - and non-native speakers don't Why this crucial mistake on understanding the difference between estar- and ser- could cause you trouble and confusion in social situations - and how to correct yourself in those situations ... and much, much more! Committing to Spanish lessons is hard enough. By understanding the science behind Interval training, you can master the vocabulary, grammar, and everyday phrases used in Spanish. The Way of The Linguist, A language learning odyssey. It is now a cliché that the world is a smaller place. We think nothing of jumping on a plane to travel to another country or continent. The most exotic locations are now destinations for mass tourism. Small business people are dealing across frontiers and language barriers like never before. The Internet brings

different languages and cultures to our finger-tips. English, the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication. But historically periods of cultural and economic domination have never lasted forever. Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures? As citizens of this shrunken world, would we not be better off if we were able to speak a few languages other than our own? The answer is obviously yes. Certainly Steve Kaufmann thinks so, and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia. Why do not more people do the same? In his book *The Way of The Linguist, A language learning odyssey*, Steve offers some answers. Steve feels anyone can learn a language if they want to. He points out some of the obstacles that hold people back. Drawing on his adventures in Europe and Asia, as a student and businessman, he describes the rewards that come from knowing languages. He relates his evolution as a language learner, abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency. Many people have taken on the challenge of language learning but have been frustrated by their lack of

success. This book offers detailed advice on the kind of study practices that will achieve language breakthroughs. Steve has developed a language learning system available online at: www.thelinguist.com.

Magnitude

Fifteen minutes a day for one month is the time factor involved in this selfimprovement guide to correct vocabulary, spelling, pronunciation, and grammar

In the tradition of illustrated science bestsellers, like Thing Explainer and harkening back to the classic film The Powers of Ten, this unique, fully-illustrated, four-color book explores and visualizes the concept of scale in our universe. In Magnitude, Kimberly Arcand and Megan Watzke take us on an expansive journey to the limits of size, mass, distance, time, temperature in our universe, from the tiniest particle within the structure of an atom to the most massive galaxy in the universe; from the speed at which grass grows (about 2 to 6 inches a month) to the speed of light. Fully-illustrated with four-color drawings and infographics throughout and organized into sections including Size and Amount (Distance, Area, Volume, Mass, Time,

Temperature), Motion and Rate (Speed, Acceleration, Density, Rotation), and Phenomena and Processes (Energy, Pressure, Sound, Wind, Computation), Magnitude shows us the scale of our world in a clear, visual way that our relatively medium-sized human brains can easily understand.

Imagine falling in love with someone, but not speaking the same language as their extended family. NATIONAL BESTSELLER • For anyone who wants to learn a foreign

language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of
