The Economy of Ireland (14th edition) takes a holistic examination of the Irish Economy in light of events including the Celtic Tiger boom, recession, recovery and a global pandemic. The textbook considers the evolution of the Irish economy over time; the policy priorities for a small regional economy in the eurozone; the role of the state in policy making; taxation and regulatory policy; and the challenge of sustainable development. This provides a framework for analysing policy issues at a national level, including the Irish labour market and migration, inequality and poverty, and the care economy. The book then considers issues at a sectoral level, from agriculture and trade to the education and health sectors. Packed with the latest available data, contemporary examples and analysis of topical issues, this is an ideal text for students studying modules on Irish Economics.
