This book is dedicated
to Aristid

Lindenmayer on the
occasion of his 60th
birthday on November
17, 1985.

Contributions range
from mathematics and
theoretical computer
science to biology.

Aristid Lindenmayer
introduced language-

Online Library Lectobook Verd

theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as Lindenmayer systems.

Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one

Online Library Lectobook Verd

area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the

Online Library Lectobook Verd

first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish

Online Library Lectobook Verd

between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way:

Online Library Lectobook Verd

DO L Indeed,
hundreds of
researchers have
followed this
suggestion. Some of
them appear as
contributors to this
book. Of the many
who could not
contribute, we in
particular regret the
absence of A.

Ehrenfeucht, G.

Online Library Lectobook Verd

Herman and H.A.
Maurer whose
influence in the theory
of L systems has been
most significant.

from Africans during the slave trades. The theory behind this book is that the majority of the slaves that were taken from the west coast of Africa were practicing Muslims, and these Muslims were forced to

convert to Christianity under the strong oppression of slavery. At one time Afro-Americans were the biggest minority in the American society. About 90% of the todays population

of blacks are descendants of slaves that were brought to America for working on plantations since the 16th century. At the beginning of the 19th century most of the so-called Negroes lived in the

plantation areas of the Southern States. After the Civil War and the abolition of slavery it wasnt until the early 1920s and 30s that blacks were beginning to experiment with other faiths. Of all the faiths Islam

Online Library Lectobook Verd

became the fastest growing religion and the most popular. This book by far is in no way a research into black history, instead it covers a more deeper aspect of history in which I call the history behind the

history. It explores
the true Asiatic
origins of the
ancient religions of
Hinduism,
Buddhism well as
the Islamic faith.
Finally It explores
the Masonic
symbolisms of alis
Moorish science
dogma digging

deeper into the
esoteric side of his
Aquarian/Masonic
teaching
explaining their
origins and
discovering an age
old wisdom that
had been kept
hidden from the
human eye. One
would think that

Online Library Lectobook Verd

Africans in the Americas would have rejected the religious tradition of their European oppressors taking into consideration that African religions are far older & they possess more sources of

knowledge &
spiritual salvation.
Yet there are
those who have
turned away from
traditional
Christian
dominated
environments in
order to find a
greater
understanding of

Online Library Lectobook Verd

themselves and the world in which they live. One alternative has been to seek knowledge in the various religious groups that arose in the 20th century.
