section for clues to the likely diagnosis. Section B gives core knowledge & clinical advice on the major tropical infections such as malaria and leprosy. The final section covers other serious tropical diseases, grouped by

main body system of presentation, which includes cholera, hepatitis and scabies amongst others. Additionally, this edition includes new chapters that broaden the traditional scope of 'tropical medicine'. These include a

Bookmark File PDF Lecture Notes On Clinical Medicine

chapter on HIV & Aids which reflects the impact that these have had on the tropics, a chapter on non-communicable diseases and their management, as well as a new chapter on refugee health that covers humanitarian
