Music and loud voices echo through the woods surrounding her. Wiping her tears, she hears the rustle of leaves close by. Footsteps. She has no time to scream before a hand covers her mouth and her entire world goes black. In a patch of forest on the outskirts of a small town, five teenage school friends prepare to spend a night away from home. Carrying their tents and sleeping bags, they laugh and joke as they make their way into the darkest part of the woods, away from prying eyes. But as the sun rises the following morning, only four are left alive. Devastated, Leah ’ s friends all swear they didn ’ t see or hear anything. Her best friend sobs as she recounts what she remembers from that night — dancing, roasting marshmallows, sipping warm cans of beer by the fire — but is it grief, or is she hiding something? What happened to Naomi in the hour that no one can account for? And what troubled past lies behind the perfect manners of the boy who organised the trip, and who is prepared to lie to keep it buried? As the cracks in their stories grow, it ’ s clear one of them is lying, and one of them is next... While teaching at an all-black middle school in Atlanta, Meira Levinson realized that students’ individual self-improvement would not necessarily enable them to overcome their profound marginalization within American society. This is because of a civic empowerment gap that is as shameful and antidemocratic as the academic achievement gap targeted by No Child Left Behind. No Citizen Left Behind argues that students must be taught how to upend and reshape power relationships directly, through political and civic action. Drawing on political theory, empirical research, and her own on-the-ground experience, Levinson shows how de facto segregated urban schools can and must be at the center of this struggle. Recovering the civic purposes of public schools will take more than tweaking the curriculum. Levinson calls on schools to remake civic education. Schools should teach collective action, openly discuss the racialized dimensions of citizenship, and provoke students by engaging their passions against contemporary injustices. Students must also have frequent opportunities to take civic and political action, including within the school itself. To build a truly egalitarian society, we must reject myths of civic sameness and empower all young people to raise their diverse voices. Levinson’s account challenges not just educators but all who care about justice, diversity, or democracy.

*Krakauer’s page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of Into the Wild. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interst that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Mesmerizing, heartbreaking, Into the Wild is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page.*

*"Based on the fieldwork at two elementary schools in northeastern China, the monograph details how local schools enacted the New Mathematics Curriculum Reform that was launched in early 2000. The trajectory of the reform implementation at each school was plotted out. Both schools resorted to the long-standing quality control mechanism and teaching norms to operationalize the reform ideas. The mechanism functioned by placing teachers under reform-aligned, measurable supervision and evaluation. The schools responded to the reform out of school people's practical concerns as well as the established school culture. Merits School arrived at a two-faces strategy to cope with the reform. Pioneer School managed to maintain a balance between promoting reform pedagogy and maintaining good test rankings. Both schools marginally involved parents in the implementation of the reform. This study suggests that to achieve success, reformers need to place equal emphasis on the transformation of teachers as well as local policymakers. This book enriches the existing literature on the implementation of mathematics curriculum reform at the school level and brings insights into the schools' implementation decisions, which will appeal to policy makers, curriculum researchers and administrators"--*

So in late 1969, when handsome Chase Andrews is found dead, the locals immediately suspect Kya Clark, the so-called Marsh Girl. But Kya is not what they say. Sensitive and intelligent, she has survived for years alone in the marsh that she calls home, finding friends in the gulls and lessons in the sand. Then the time comes when she yearns to be touched and loved. When two young men from town become intrigued by her wild beauty, Kya opens herself to a new life—until the unthinkable happens. Where the Crawdads Sing is at once an exquisite ode to the natural world, a heartbreaking coming-of-age story, and a surprising tale of possible murder. The belief that with hard work and determination, all children have the opportunity to succeed in life is a cherished part of the American Dream. Yet, increased inequality in America has made that dream more difficult for many to obtain. In Too Many Children Left Behind, an international team of social scientists assesses how social mobility varies in the United States compared with Australia, Canada, and the United Kingdom. Bruce Bradbury, Miles Corak, Jane Waldfogel, and Elizabeth Washbrook show that the academic achievement gap between disadvantaged American children and their more advantaged peers is far greater than in other wealthy countries, with serious consequences for their future life outcomes. With education the key to expanding opportunities for those born into low socioeconomic status families, Too Many Children Left Behind helps us better understand educational disparities and how to reduce them. Analyzing data on 8,000 school children in the United States, the authors demonstrate that disadvantages that begin early in life have long lasting effects on academic performance. The social inequalities that children experience before they start school contribute to a large gap in test scores between low- and high-SES students later in life. Many children from low-SES backgrounds lack critical resources, including books, high-quality child care, and other goods and services that foster the stimulating environment necessary for cognitive development. The authors find that not only is a child’s academic success deeply tied to his or her family background, but that this class-based achievement gap does not narrow as the child proceeds through school. The authors compare test score gaps from the United States with those from three other countries and find smaller achievement gaps and greater social mobility in all three, particularly in Canada. The wider availability of public resources for disadvantaged children in those countries facilitates the early child development that is fundamental for academic success. All three countries provide stronger social services than the United States, including universal health insurance, universal preschool, paid parental leave, and other supports. The authors conclude that the United States could narrow its achievement gap by adopting public policies that expand support for children in the form of tax credits, parenting programs, and pre-K. With economic inequalities limiting the futures of millions of children, Too Many Children Left Behind is a timely study that uses global evidence to show how the United States can do more to level the playing field.

Continues the story of the Tribulation Force at near one-fourth of the way through their effort to battle evil.

"The latest novel in the Joanne Kilbourn Shreve series opens in the month of May, a time of beginnings when all things seem possible. Joanne's husband, Zack, recently elected mayor of Regina, is optimistic that he can garner the public support necessary to make Regina a city that works--not just for the few, but for the many. Their oldest son Peter is marrying Maisie Crawford, a woman as clever and forthright as she is lovely. Their lakeside wedding is a dream come true, but when a former lover of a member of the bridal party shows up, the dream becomes a nightmare. Before the bride's bouquet has wilted, there's an act of sickening cruelty; soon afterwards, there's a murder"--Provided by Publisher.
