

Leksikon Hrvatskih Prezimena

Pt. 1 (pp. 15-134), "Genocide - an International Crime", presents a history of genocide from antiquity to the present and a history of the development of the judicial notion of genocide, and surveys socio-psychological and philosophical theories of genocide. Pt. 2 (pp. 137-438), "Genocide of the Serbs, Jews and Gypsies in Yugoslavia", focuses on the extermination of Serbs in the German-, Bulgarian- and Hungarian-occupied areas of Yugoslavia, especially in the puppet state of Croatia in 1941-44, but mentions also the genocide of Jews. Pp. 331-342, "The System of

Concentration Camps", deal with Jasenovac and other concentration camps in Yugoslavia. Concentrates, essentially, on the perpetrators of genocide; contends that the guilt must be placed not only on Germany but also on Croatia and other forces. LUDWIG THE SECOND KING OF BAVARIA

dramatic progress in the field of Natural Language Processing (NLP). This hitherto largely academic discipline has found itself at the center of an information revolution ushered in by the Internet age, as demand for human-computer communication and information access has exploded. Emerging applications in computer-assisted information production and dissemination, automated understanding of news, understanding of spoken language, and processing of foreign languages have given impetus to research that resulted in a new generation of robust tools, systems, and commercial products. Well-positioned government research funding, particularly in the U. S. , has helped to advance the state-of-

the art at an unprecedented pace, in no small measure thanks to the rigorous 1 evaluations. This volume focuses on the use of Natural Language Processing in Information Retrieval (IR), an area of science and technology that deals with cataloging, categorization, classification, and search of large amounts of information, particularly in textual form. An outcome of an information retrieval process is usually a set of documents containing information on a given topic, and may consist of newspaper-like articles, memos, reports of any kind, entire books, as well as annotated image and sound files. Since we assume that the information is primarily encoded as text, IR is also a natural language processing problem: in order to

students, academics and the community whereby all become teaching resources, problem solvers and partners. In addition to enhancing academic and real-world learning, the overall purpose of service learning is to instil in students a sense of civic engagement and responsibility and work towards positive social change within society.

Embedding Service Learning in European Higher Education promotes service learning as a pedagogical approach that develops civic engagement within higher education. It both describes and assesses the most recent developments and

contextual positioning of service learning in European higher education and considers if and how the pedagogy is responding to European Union policy and the strategy of higher education institutions and towards engagement with broader societal issues. With case studies from 12 universities across Europe, this book draws on existing practice, shares knowledge and develops best practice to provide conceptual and practical tools for teaching, researching and practising service learning. This book: exposes service learning as a key approach in terms of

embedding a culture of political and civic literacy within higher education; considers service learning in Europe, an area of growing research in service learning practice; explores the issue of university social responsibility; presents chapters from leaders in the service learning movement at a national and international level. Practical and engaging, Embedding Service Learning in European Higher Education is a fascinating read for anyone working in service learning as well as those working at universities with an interest in social and civic engagement
