Foundational Issues in Touch-Surface Stroke Gesture Design – An Integrative Review synthesizes some of the foundational issues of human motor control complexity, visual and auditory feedback, and memory and learning capacity concerning gesture user interfaces.

9front is a fork of the Plan 9 from Bell Labs operating system. This publication is a print edition of the 9front Dash 1 manual. It is very likely outdated.

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel’s hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion – toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest – home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

If you are a JIRA administrator managing small-to-medium JIRA instances and want to learn how to manage enterprise-scale instances, then this book will help you expand your knowledge and equip you with advanced skills. Prior understanding of JIRA core concepts is required.

Offers a collection of true facts about animals, food, science, pop culture, outer space, geography, and weather.

In this book I give you my honest views on the good and dark sides of Windows 11. There are more features, issues, hacks and tricks hiding in Windows 11 than most people will ever know. I unveiled some of them in this book. I’ve been a Windows user for over 20 years, and after further exploring two early builds of Windows 11, at first I had to admit that it looks rather nice, and is better than Windows 10. But I soon discovered there’s a lot more than meets the eye. So I strongly advise you read this book first to help you decide if you should install or upgrade your OS to Windows 11. There are some of what you’ll learn in this book: The new features and major changes since the Windows 11 insider preview was released. Why Microsoft’s system health-check application, and the hardware constraints they plan to include in Windows 11 are shameful, and how they can affect your system and you. Why I suspect the rollout of Windows 11 will be relatively slow, and why it will take quite a long time before lots of people start using it. Apps experiencing troubles with Windows 11 and why Microsoft is unable to find a fix. 8 Windows 11 troubles Microsoft is currently investigating The Microsoft’s policy and how it will affect Windows 11 users when Windows 10 support ends on October 14th, 2025. How to quickly and reliably check if your system can run Windows 11. Two methods to install Windows 11 step by step (for Windows and Linux-based systems with backup and restore options for programs and files). A work around to install Windows 11 on non-supported hardware. How to dual boot your PC with Windows 11 and 10 step by step. And so much more...

Presents a guide for beginners on the fundamentals of computer programming using the Python language.

The Race for Perfect: Inside the Quest to Design the Ultimate Portable Computer

Benevolency Universe

*Finally—a book that shows marketers how to truly achieve real results from their websites. Brian Massey, The Conversion Scientist, takes the mystery out of how to create high-performing sites. By walking the reader through five online formulas-aka “customer creation equations”—he shows you how to determine the best formula your own particular business structure and how to optimize it for stellar results. Key to this process is setting up a “digital conversion lab,” and Brian shows you how. Jam-packed with easy-to-understand equations for things like increasing your conversion rate and decreasing your abandonment rate-as well as practical strategies for attracting prospects, turning buyers into triers, and morphing buyers into loyal brand advocates-this book will enable anyone to stop hoping for success and start enjoying higher profits. The Advanced Curriculum in Visitor Studies gives readers additional guidance on how to really understand their targets and customers-an understanding that is at the heart of all successful websites, and businesses, everywhere.*

*PERSONAL computing has reshaped economies and industries, and is transforming how we express ourselves and relate to one another. The most personal of personal computers are the portables. We carry these gadgets with us wherever we go, whether they’re laptops, smartphones, or the coolest new Web-surfing devices. The Race for Perfect tells the story of two generations of entrepreneurs, designers, and engineers as they have struggled to make ever-better portables. Steve Hamm takes the reader into a world where inspiration, design, engineering, and marketing collide to produce the most innovative products that we love to talk about and use. From the earliest days of portable computing, 40 years ago, entrepreneurs and designers have pushed forward relentlessly in a quest to create the perfect device. Their efforts have produced a few fabulous successes and many failures. But they never give up. They’re driven by the basic rule of the tech industry: innovate or die. In addition to a fascinating read, The Race for Perfect offers valuable lessons for business people in any industry, revealing how they must INNOVATE constantly to differentiate their products CREATE design principles that are timeless INTEGRATE design and engineering so products are both useful and fun to use IMPROVE quality and convenience without compromise TAP social networks to turn customers into fans At the center of this tale is the story of a single product, Lenovo’s ThinkPad X300 laptop. Lenovo, the first Chinese company to seek to establish a global consumer brand, bought IBM’s PC division in 2005 primarily to get the company’s storied ThinkPad laptops. The X300 was conceived as a “halo” product that would draw customers to Lenovo’s entire line. Woven through The Race for Perfect is a case study of how this ambitious company, with teams in Japan, the United States, and China, marshaled its resources to pursue laptop perfection. As X300 came close to the finish line, it collided head-on with Apple’s super-slim MacBook Air—with surprising results.*

*An introductory text that gives its reader a strong understanding of the dimensions of tourism, the industries of which it is comprised, the issues that affect its success, and the management of its impact on destination economies, environments and communities. Now in a full colour design, the new edition features a clear focus on the issues affecting 21st century tourism, providing students with extensive coverage on the effects of globalisation and global conflict; sustainability and climate change; developments in digital technology and the rise of the sharing economy. International case-studies and snapshots (mini-case studies) are used throughout and have been taken from around the globe, including the US, China, Russia, Gambia, Bhutan, Cuba, Singapore, New Zealand, Australia, Caribbean, Canada and the UK, and from companies including TUI, Airbnb and Marriot. The accompanying Online Resources include PowerPoint slides and an Instructor’s Manual for lecturers and additional case studies, useful video links, and web links for students. Suitable for students new to tourism studies.*

*“Casino Healthcare is not a theoretical policy book for the elite, but a book that penetrates the blanket of fog surrounding a major - and growing - household expense. With the research and style of an investigative journalist, the book is easy to understand and accessible by every American” -- Back cover.*

Total Training for Young Champions

The ThinkPad notebook computer has been at the center of the digital revolution that has transformed millions of lives around the world, allowing users to obtain access to their documents, pictures and other personal data from virtually anywhere at any time. More than 100 million ThinkPads have been sold since they were introduced in 1992, some twenty-five years ago. ThinkPads played a prominent role in NASA’s space exploration and at the International Space Station. They accompanied explorers who traversed the entire length of the Nile River and conquered Mount Everest. ThinkPads also played a major role in changing the very architecture of how humanity’s knowledge is stored and made available. In this book, Arimasa Naitoh, the father of the ThinkPad, collaborates with American business journalist and author William J. Holstein to write candidly about the incredible technological and personal struggles he and fellow engineers faced. And he offers his vision of the future of mobile computing—because this revolution is not even close to being finished.

This text is highly recommended for managers and serious students of quality. Major US companies issue this architecture and training manual to all managers during their quality training. This volume is also very valuable as a stand-alone reference on using statistics with a business and quality perspective.

Low-tech Magazine underscores the potential of past and often forgotten technologies and how they can inform sustainable energy practices. Sometimes, past technologies can be copied without any changes. More often, interesting possibilities arise when older technology is combined with new knowledge and new materials, or when past concepts and traditional knowledge are applied to modern technology. Inspiration is also to be found in the so-called “developing” world, where resource constraints often lead to inventive, low-tech solutions. Contains 159 images in black and white.

The four-volume set LNCS 8012, 8013, 8014 and 8015 constitutes the proceedings of the Second International Conference on Design, User Experience, and Usability, DUXU 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCI12 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCI12 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 282 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 67 papers included in this volume are organized in the following topical sections: cross-cultural and intercultural user experience; designing for the learning and culture experience; designing for the health and quality of life experience; and games and gamification.

Weird But True!, Level 1

An Introduction

The Tetris Effect

Low-tech Magazine

*Join Captain Marvel’s pet, Chewie, as she wreaks havoc in the lives of Marvel’s most popular characters! Gain a new perspective on beloved favorites such as Spider-Man and Iron Man, formidable villains including Thanos and Galactus, and antiheroes like Deadpool, as they all become the playthings of this capricious “cat” creature. Originally shared on Marvel’s official Instagram, these comic strips have been collected with all-new content into a gift book that will delight Marvel and cat enthusiasts alike! -- VIZ Media*

*Here is a story about a brave football... However, all the pictures are gone. None on the cover, and none here on the back. Except my picture... but who really wants to know what the author looks like? Can you figure out why the pictures are gone?*

*The Lenovo Way to Profitability and Growth In 2005, the Chinese corporation Lenovo acquired what was seen as a sacred American icon-IBM’s personal computer business. It has since grown to become the world’s biggest PC company and is now rapidly growing in the global mobile space. The Lenovo Way reveals practical methods for managing a truly diverse workforce operating around the world, drawn from both China and the United States. Gina Qiao is Senior Vice President of HR at Lenovo. Yolanda Conyers is Vice President of HR Operations and Chief Diversity Officer at Lenovo.*

*The definitive story of a game so great, even the Cold War couldn’t stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominos, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world’s first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game’s growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who’s ever played the game—which is to say everyone.*

Hello World!

*After moving from Chicago to Grand River, Michigan, fifth grader Yolonda, big and strong for her age, determines to prove that her younger brother is not a slow learner but a true musical genius.*

*People often believe that we can overcome the profound environmental and climate crises we face by smart systems, green innovations and more recycling. However, the quest for complex technological solutions, which rely on increasingly exotic and scarce materials, makes this unlikely. A best-seller in France, this English language edition introduces readers to an alternative perspective on how we should be marshalling our resources to preserve the planet and secure our future. Bihouix skillfully goes against the grain to argue that ‘high’ technology will not solve global problems and envisages a different approach to build a more resilient and sustainable society.*

Presents a guide to creating illustrated meeting notes which diagram important ideas and people, with tips on drawing techniques.

*This paper discusses key findings of the Report on the Observance of Standards and Codes for the Republic of Korea. Responsibilities, objectives, and powers related to banking supervision are clearly defined in the Republic of Korea. The legal framework currently in place reasonably provides the necessary powers to authorize the establishment of banks, conduct ongoing supervision, address compliance with laws and regulations, as well as undertake corrective actions to address safety and soundness concerns. Authorization processes are generally thorough but there is room to require formal approval for certain activities.*

An Overview

Text Mining and Analysis

A superintelligence called the Benevolence has ruled humanity for over three thousand years. Under its guidance we have spread amongst the stars and experienced an unprecedented age of peace, prosperity, and technological advancement. All of that is about to change. While on a covert mission to spy on the Krixis, a telepathic alien race, Empathic Services agent Eyana Ora uncovers a plot to destroy all mankind. She launches a desperate bid to stop a group of insurgents from obtaining a secret super-weapon stored within an Ancient outpost on world sacred to the Krixis. Gav Gendin is an archaeologist obsessed with the Ancients, an extinct race of highly advanced aliens. After years of searching, he locates one of their temples on an abandoned Krixis world. But when it turns out the system is guarded, his research expedition becomes a gamble that could cost him his life. Neither one of them has a hope of accomplishing their missions without Silky, a snarky neural-Interfacing AI companion. It’s his job to piece together the secrets they each unearth, secrets that will shape humanity’s future.

ARCHIE 3000 is the complete collection featuring the classic series. This is presented in the new higher-end format of Archie Comics Presents, which offers 200+ pages at a value while taking a design cue from successful all-ages graphic novels. Travel to the 31st Century with Archie and his friends! In the year 3000, Riverdale is home to hoverboards, intergalactic travel, alien life and everyone’s favorite space case, Archie! Follow the gang as they encounter detention robots, teleporters, wacky fashion trends and much more. Will the teens of the future get in as much trouble as the ones from our time?

Big data: It’s unstructured, it’s coming at you fast, and there’s lots of it. In fact, the majority of big data is text-oriented, thanks to the proliferation of online sources such as blogs, emails, and social media. However, having big data means little if you can’t leverage it with analytics. Now you can explore the large volumes of unstructured text data that your organization has collected with Text Mining and Analysis: Practical Methods, Examples, and Case Studies Using SAS. This hands-on guide to text analytics using SAS provides detailed, step-by-step instructions and explanations on how to mine your text data for valuable insight. Through its comprehensive approach, you’ll learn not just how to analyze your data, but how to collect, cleanse, organize, categorize, explore, and interpret it as well. Text Mining and Analysis also features an extensive set of case studies, so you can see examples of how the applications work with real-world data from a variety of industries. Text analytics enables you to gain insights about your customers’ behaviors and sentiments. Leverage your organization’s text data, and use those insights for making better business decisions with Text Mining and Analysis. This book is part of the SAS Press program.

In The Logic of Life, bestselling author Tim Harford quite simply makes sense of this world. Life often seems to defy logic. The receptionist is clearly smarter than the boss who earns fifty times her salary. Arbitrary lines starkly divide the desirable districts of the city from the dangerous ones. Voters flock to the polling booths to elect candidates who’ll rip them off to favour special interests. None of it makes logical sense — or does it? Economist and acclaimed author Tim Harford thinks it does. By weaving stories from locations as diverse as a Vegas casino to a barroom speed date, Harford aims to persuade you that people are, in fact, surprisingly logical. When a street prostitute agrees to unprotected sex, or a teenage criminal embarks on a burglary — perhaps especially when a racist employer disregards a black job applicant — we would seem to be a million miles from rational behaviour. Harford shows that, discomfitingly, we are not. It turns out that the unlikeliest of people are complying with the logic of economics and responding to future costs and benefits, often without realizing it; and socially tragic outcomes can have their roots in individually rational decisions. Brilliantly reasoned, always entertaining and often provocative, The Logic of Life is a book to help you understand yourself and the world around you.

I can spend more time running my business instead of keeping track of accounts with my various suppliers and manufacturers.\* Jeff Yesensky, Business Owner\*As a busy mom with two kids, I don’t have a lot of time to figure out how to keep my passwords secure. And I worry every time my husband travels overseas that he’ll lose his passport (yet again) because he gives me one less thing to stress about. His quick checklists are perfect for those of us without a lot of extra time to spare.\* Sarah Harris, Mom\*his book is well worth your time. Collects conditioning programs for athletes between the ages of six and eighteen, offering over three hundred exercises for increasing coordination, flexibility, speed, endurance, and strength.

A new but timeless strategy and mindset that should greatly help investors lower downside risk while achieving market outperformance.In The 52-Week Low Formula: A Contrarian Strategy that Lowers Risk, Beats the Market, and Overcomes Human Emotion, wealth manager Luke L. Wiley, CFP examines the principles behind selecting the outstanding companies and great investment opportunities that are being overlooked. Along the way, Wiley offers a melding of the strategies used by Warren Buffett, Michael Porter, Seth Klarman, and Pat Dorsey. His proven formula helps investors get the upper hand by identifying solid companies that are poised for growth but have fallen out of the spotlight. Shows you how to investigate companies and identify opportunities Includes detailed discussions of competitive advantage, purchase value, return on invested capital, and debt levels Presents several case studies to examine companies that have overcome obstacles by trading around the market for investors and financial advisors who want to break through conventional strategies and avoid common mistakes.

We are crossing a new frontier in the evolution of computing and entering the era of cognitive systems. The victory of IBM’s Watson on the television quiz show Jeopardy! revealed how scientists and engineers at IBM and elsewhere are pushing the boundaries of science and technology to create machines that sense, learn, reason, and interact with people in new ways to provide insight and advice. In Smart Machines, John E. Kelly III, director of IBM Research, and Steve Hamm, a leading expert on cognitive systems, introduce the fascinating world of Cognitive systemsO to general audiences and provide a window into the future of computing. Cognitive systems promise to showcase complexity and assist people and organizations in better decision making. They can help doctors evaluate and treat patients, augment the ways we see, anticipate major weather events, and contribute to smarter urban planning. Kelly and Hamm’s comprehensive perspective describes this technology inside and out, and offers a glimpse into the future of computing. Absorbing and impassioned, their book will inspire governments, academics, and the global tech industry to work together to power this exciting wave in innovation.

The Lenovo Way: Managing a Diverse Global Company for Optimal Performance

Smart Machines

The Age of Low Tech

Physics in a New Era

*Seven years ago, IBM didn’t even have a portable computer product. As the story unfolds, Dell and Purdy reveal a rare inside view on how IBM created and made ThinkPad the most successful brand in history.*

*Follows the adventures of Minn, a three-legged snapping turtle, as she slowly makes her way from her birthplace at the headwaters of the Mississippi River to the mouth of river on the Gulf of Mexico.*

*Physics at the beginning of the twenty-first century has reached new levels of accomplishment and impact in a society and nation that are changing rapidly. Accomplishments have led us into the information age and fueled broad technological and economic development. The pace of discovery is quickening and stronger links with other fields such as the biological sciences are being developed. The intellectual reach has never been greater, and the questions being asked are more ambitious than ever before. Physics in a New Era is the final report of the NRC’s six-volume decadal physics survey. The book reviews the frontiers of physics research, examines the role of physics in our society, and makes recommendations designed to strengthen physics and its ability to serve important needs such as national security, the economy, information technology, and education.*

*An astronaut returns to Earth after a ten-year mission and finds a society that he barely recognizes. Stanislaw Lem’s Return from the Stars recounts the experiences of Hal Bregg, an astronaut who returns from an exploratory mission that lasted ten years—although because of time dilation, 127 years have passed on Earth. Bregg finds a society that he hardly recognizes, in which danger has been eradicated. Children are “betritized” to remove all aggression and violence—a process that also removes all impulse to take risks and explore. The people of Earth view Bregg and his crew as “resuscitated Neanderthals,” and pressure them to undergo betritization. Bregg has serious difficulty in navigating the new social mores. While Lem’s depiction of a risk-free society is bleak, he does not portray Bregg and his fellow astronauts as heroes. Indeed, faced with no opposition to his aggression, Bregg behaves abominably. He is faced with a choice: leave Earth again and hope to return to a different society in several hundred years, or stay on Earth and learn to be content. With Return from the Stars, Lem shows the shifting boundaries between utopia and dystopia.*
