Book Join in the adventure with Princess Tessa and her tiny purple key. What castle door will it open? What will be behind the magic door? An engaging tale for boys and girls about the value of kindness in our diverse world.

When novelists Deeanne Gist and J. Mark Bertrand first met in a Houston critique group, they never expected where friendship would take them. She wrote romance; he wrote crime novels. But growing respect for each other's work culminated in the decision to try blending their talents into this wonderfully engaging story merging romance and mystery. Rylee Monroe walks dogs in old-money Charleston, a part of the city recently targeted by a daring thief. Logan Woods works the crime beat for the local paper but dreams of a life as a nonfiction writer. When the string of robberies takes a strange twist, Logan sees the making of a once-in-a-lifetime book that seems to circle around this charming, eye-catching dogwalker. But pursuing the truth means ignoring that he seems to be falling for her. And what is she hiding in her past that could crack the story wide open?

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Becausestudents who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. Theauthors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging,race/racism and health, mental health, and healers and healing.
