Catalogue of the Public Documents of the ... Congress and of All Departments of the Government of the United States for the Period from ... to ...

America is no longer a "government by the people and for the people." According to information retrieved from the "Council on Foreign Relations" website, "in 1921 a group of diplomats, financiers, generals, and lawyers concluded that Americans needed to be better prepared for significant responsibilities and decision making in world affairs, with this in mind they founded the "Council on Foreign Relations." In other words, a group of elites created a government independent of our elected government. Diplomats, financiers, generals, and lawyers created their own government in 1921 which continues to operate and circumvent our elected government to this very day. Readers will learn from this book that the Council on Foreign Relations, the Establishment, the Deep State, and the Shadow Government are all one and the same. Their goal is a corporate controlled one world government, and it appears as if the majority of our representatives are serving them. Many Americans are just recently becoming aware of and thus concerned with the establishments GREEN NEW DEAL and are totally unaware that it is already "the law of the land" via Executive Order No. 12852. In 1993 President Bill Clinton DAMNED the United States with the creation of the "President's Council on Sustainable Development" which is the original title for the GREEN NEW DEAL.

Modern Mandarin Chinese is a two-year undergraduate course for students with no prior background in Chinese study. Designed to build a strong foundation in both the spoken and written language, it develops all the basic skills such as pronunciation, character writing, word use, and structures, while placing a strong emphasis on the development of communicative skills. Each level of the course consists of a textbook and workbook in simplified Chinese. A free companion website provides all the audio for the course with a broad range of interactive exercises and additional resources for students' self-study, along with a comprehensive instructor's guide with teaching tips, assessment and homework material, and a full answer key. Key changes to this new edition: An increased number of vocabulary and characters introduced. 255 characters are introduced in this second edition for active production. Dialogues and example sentences are also presented in full-character format for passive recognition, and to provide additional challenge for more advanced students. Additional exercises in the workbooks and online to support the expanded number of words and characters incorporated into the textbooks. New cross-references between the textbooks, workbooks, and companion website facilitate using all the resources in an integrated manner. Greatly enhanced and re-designed website. Retaining its focus on communicative skills and the long-term retention of characters, the text is now presented in simplified characters and pinyin from the outset with a gradual and phased removal of pinyin as specific characters are introduced and learnt. This unique approach allows students to benefit from the support of pinyin in the initial stages as they begin speaking while ensuring they are guided and supported towards reading only in characters.
