Alex just has to convince his mom to let him have an iguana, so he puts his arguments in writing. He promises that she won't have to feed it or clean its cage or even see it if she doesn't want to. Of course Mom imagines life with a six-foot-long iguana eating them out of house and home. Alex's reassurances: It takes fifteen years for an iguana to get that big. I'll be married by then and probably living in my own house. and his mom's replies: How are you going to get a girl to marry you when you own a giant reptile? will have kids in hysterics as the negotiations go back and forth through notes. And the lively, imaginative illustrations show their polar opposite dreams of life with an iguana.

Using approaches from the Hebrew interpretive tradition to discern the actual events surrounding Jesus' death, Bishop Spong questions the historical validity of literal narrative concerned the Resurrection. He asserts that the resurrection story was born in an experience that opened the disciples' eyes to the reality of God and the meaning of Jesus of Nazareth. Spong traces the Christian origins of anti-Semitism to the Church's fabrication of the ultimate Jewish scapegoat, Judas Iscariot. He affirms the inclusiveness of the Christian message and emphasizes the necessity of mutual integrity and respect among Christians and Jews.

A New York Times Bestseller! A "raucous trip through the odd corners of our alphabet." —The New York Times Let's get real—the English language is bizarre. A might be for apple, but it's also for aisle and aeons. Why does the word "gnat" start with a G but the word "knot" doesn't start with an N? It doesn't always make sense, but don't let these rule-breaking silent letters defeat you! This whimsical, funky book from Raj Haldar (aka rapper Lushlife) turns the traditional idea of an alphabet book on its head, poking fun at the most mischievous words in the English language and demonstrating how to pronounce them. Fun and informative for word nerds of all ages!

I Wanna Iguana

A radical educator's paradigm-shifting inquiry into the accepted, normal demands of school, as illuminated by moving portraits of four young "problem children" In this dazzling debut, Carla Shalaby, a former elementary school teacher, explores the everyday lives of four young "troublemakers," challenging the ways we identify and understand so-called problem children. Time and again, we make seemingly endless efforts to moderate, punish, and even medicate our children, when we should instead be concerned with transforming the very nature of our institutions, systems, and structures, large and small. Through delicately crafted portraits of these memorable

children—Zora, Lucas, Sean, and Marcus—Troublemakers allows us to see school through the eyes of those who know firsthand what it means to be labeled a problem. From Zora's proud individuality to Marcus's open willfulness, from Sean's struggle with authority to Lucas's tenacious imagination, comes profound insight—for educators and parents alike—into how schools engender, exclude, and then try to erase trouble, right along with the young people accused of making it. And although the harsh disciplining of adolescent behavior has been called out as part of a school-to-prison pipeline, the children we meet in these pages demonstrate how a child's path to excessive punishment and exclusion in fact begins at a much younger age. Shalaby's empathetic, discerning, and elegant prose gives us a deeply textured look at what noncompliance signals about the environments we require students to adapt to in our schools. Both urgent and timely, this paradigm-shifting book challenges our typical expectations for young children and with principled affection reveals how these demands—despite good intentions—work to undermine the pursuit of a free and just society. In v.1-8 the final number consists of the Commencement annual.
