The book 'Joseph's Life Story' is a true and honest account compiled by the parents of the life of Joseph L Cunningham, a baby boy born on the 22nd December 2006, weighing 8 pounds and measuring 20 inches long. It also includes the struggle to learn the truth of what happened during labor and their effort to seek justice. The opening chapters give the parents emotional account of the events during labor, the days after while Joseph was in hospital until he died 38 days later and

the account of Joseph's funeral. The book goes onto reveal the effort to seek an explanation as to why Joseph suffered injuries during birth and to have the NHS admit liability. The purpose of this book is to raise awareness on the difficulties that can arise during labour and the need for the correct decisions to be taken at the time. This is to also highlight the effort that was required by the grieving parents in order to learn why such a tragedy occurred, what could have been done to prevent it and to have someone admit fault.

***adaptive, data-driven processes empowers knowledge workers to know in real-time what is happening at the edge points, and to take actions through the combination of rule-driven guidance and their own know-how. It is not a traditionally-automated system but intelligent automation, where technology doesn't merely replace human decision-making but extends the reach of the knowledge worker; making IoT data actionable. As Sandy Kemsley points out in her foreword: As adaptive case management (ACM) systems mature, we are moving beyond simple systems that allow knowledge workers to define ad hoc processes, to creating more intelligent systems that support and guide them.***

***Knowledge workers still need to dynamically add information, define activities and collaborate with others in order to get their work done, but those are now just the table stakes in a world of big data and intelligent agents. To drive innovation and maintain operational efficiencies, we need to augment case work - typically seen as relying primarily on human intelligence - with machine intelligence. In other words, we need intelligent ACM. Highly predictable work is easy to support using traditional programming techniques, while unpredictable work cannot be accurately scripted in advance, and thus requires the involvement of the knowledge workers themselves. The core element of Adaptive Case***

***Management (ACM) is the support for real-time decision-making by knowledge workers. In award-winning case studies covering industries as diverse as law enforcement, transportation, insurance, banking, state services, and healthcare, you will find instructive examples for how to transform your own organization. This important book follows these ground-breaking best-sellers on ACM; Thriving on Adaptability, Empowering Knowledge Workers, Taming the Unpredictable, How Knowledge Workers Get Things Done, and Mastering the Unpredictable and provides important papers by thought-leaders in this field, together with practical examples, detailed ACM case studies and product reviews.***
