Recounts the journey into the western United States conducted by explorers Lewis and Clark, outlining their routes, personal experiences, and encounters with the Native Americans. Between 1803 and 1806, Meriwether Lewis and William Clark co-captained the most famous expedition in American history. But while Lewis ended his life just three years later, Clark, as the highest-ranking Federal official in the West, spent three decades overseeing its consequences: Indian removal and the destruction of Native America. In a rare combination of storytelling and scholarship, best-selling author Landon Y. Jones presents for the first time Clark's remarkable life and influential career in their full complexity. Like every colonial family living on Virginia's violent frontier, the Clarks killed Indians and acquired land; acting on behalf of the United States, William would prove successful at both. Clark's life was spent fighting in America's fifty-year running war with the Indians (and their European allies) over the Western borderlands. The struggle began with his famed brother George Roger's western campaigns during the American Revolution, continued through the vicious battles of the War of 1812, and ended with the Black Hawk War in the 1830s. In vividly depicting Clark's life, Jones memorably captures not only the dark and bloody ground of America's early West, but also the qualities of character and courage that made him an unequalled leader in America's grander enterprise: the shaping of the West. No one played a larger part in that accomplishment than William Clark. William Clark and the Shaping of the West is an unforgettable human story that encompasses in a single life the sweep of American history from colonial Virginia to the conquest of the West.

Before Lewis and Clark relates the extraordinary saga of the Chouteaus, the dynastic family that guarded the gates to the West for three generations. From their St. Louis base, the Chouteaus, patrician and French in their origins, made their fortunes along the two-thousand-mile length of the Missouri River. Led by the brothers Auguste and Pierre, the family not only engaged in land speculation, finance, and the fur trade but also acted as suppliers and advisers to expeditions and enterprises between the Mississippi River and the Rocky Mountains—including the famous expedition of Meriwether Lewis and William Clark from 1804 to 1806. This is the story of the Old World meeting the New, of the eastern United States discovering the West, and of a wealthy, powerful, charming, and manipulative family that dominated business and politics in the Louisiana Purchase territory before and after the Lewis and Clark expedition.

An explorer and his nephew set out to beat Lewis & Clark to the Pacific in this humorous historical novel by the author of A Stranger in the Kingdom. In the spring of 1804, Private True Teague Kinneson—schoolmaster, inventor, playwright, and explorer—sets out with his nephew, Ticonderoga, to race Meriwether Lewis and William Clark to the Pacific. Along the way True and Ti encounter Daniel Boone and his six-foot-two spinster daughter, Flame Danielle; fight and trick a renegade army out to stop Lewis's expedition; invent baseball with the Nez Perce; hold a high-stakes rodeo with Sacagawea's Shoshone relatives; and outwit True's lifelong adversary, the Gentleman from Vermont, a.k.a. the Devil himself. And when a beautiful and mysterious Blackfoot girl named Yellow Sage Flower Who Tells Wise Stories enters the tale, things start to get really interesting . . . When Meriwether Lewis, William Clark, and the "Corp of Discovery" left St. Louis, Missouri, on May 21, 1804, their mission was to explore the vast, unknown territory acquired a year earlier in the Louisiana Purchase. The travelers hoped to find a waterway that crossed the western half of the United States. They didn't. However, young readers will love this true-life adventure tale of the two-year journey that finally brought the explorers to the Pacific Ocean.

The journals of Meriwether Lewis and William Clark remain the single most important document in the history of American exploration. Through these tales of adventure, edited and annotated by American Book Award nominee Landon Jones, we meet Indian peoples and see the Great Plains, the Rocky Mountains, and western rivers the way Lewis and Clark first observed them -- majestic, pristine, uncharted, and awe-inspiring.

A Dog's Tale

Lewis and Clark Among the Indians (Bicentennial Edition)

When the Corps of Discovery left the vicinity of St. Louis in 1804 to explore the American West, they had only sketchy knowledge of the terrain that they were to cross—existing maps often contained large blank spaces and wild inaccuracies. William Clark painstakingly mapped every mile of the journey, drawing from both direct observation and from the reports of Indians and a few fur traders. On their return Lewis and Clark directed the execution of new maps detailing with remarkable accuracy the features of the country that they had traversed.

"Thomas Jefferson's Corps of Discovery included Captains Lewis and Clark and a crew of 28 men to chart a route from St. Louis to the Pacific Ocean. All the crew but one volunteered for the mission. York, the enslaved man taken on the journey, did not choose to go. Slaves did not have choices. York's contributions to the expedition, however, were invaluable. The captains came to rely on York's judgement, determination, and peacemaking role with the American Indian nations they encountered. But as York's independence and status rose on the journey, the question remained what status he would carry once the expedition was over. This is his story."--Provided by publisher.

Describes the lives of William Clark and Meriwether Lewis, emphasizing their expedition across North America to explore the uncharted territory of the Northwest United States to the Pacific Ocean.

Working alongside free men, William Clark's slave, York, performed many important duties--such as hunting for food, building forts, and improving relations with the Indians--that helped make the expedition such a great success.

The Story of the Chouteaus, the French Dynasty That Ruled America's Frontier

Preserving America's Wild Places

Meriwether Lewis and William Clark

Exciting narrative follows a band of courageous men as they explore the American Northwest in the early 1800s, threading their way through Indian territory, the Rocky Mountains, the Great Divide, and descending the Pacific slope.

On May 14, 1804, Captains Meriwether Lewis and William Clark set off to explore a vast wilderness of 825,000 square miles purchased from the French. 45 hand-drawn and rendered illustrations recapture highpoints of expedition.

An investigation into the discoveries of Lewis and Clark and other early explorers of America and the terrible acts committed to suppress them • Provides archaeological evidence of giants, the fountain of youth, and descriptions from Lewis's journals of a tribe of "nearly white, blue-eyed" Indians • Uncovers evidence of explorers from Europe, Christopher Columbus and of ancient civilizations in North America and the Caribbean • Investigates the Smithsonian conspiracy to cover up Lewis and Clark's discoveries and Lewis's murder Meriwether Lewis discovered far more than the history books tell--ancient civilizations, strange monuments, "nearly white, blue-eyed" Indians, and the fact that the American continent was visited long before the first European settlers arrived. And he was murdered to keep it all secret. Examining the shadows and cracks behind the official version of history, Xaviant Haze and Paul Schrag propose that the America of old taught in schools is not the America that was discovered by Lewis and Clark and other explorers. Investigating the discoveries of Spanish conquistadors and Olmec stories of contact with European-like natives, the authors uncover evidence of exploration in Asia prior to Columbus, sophisticated ancient civilizations in North America and the Caribbean, the fountain of youth, and a long-extinct race of giants. Verifying Lewis and Clark's journals with modern archaeological finds, geological studies, 18th- and 19th-century newspapers, and accounts of the world in the days of Columbus, the authors reveal how Clark's finds infuriated powerful interests in Washington--including the Smithsonian Institution--culminating in the murder of Meriwether Lewis.

Now that the secret of their expedition is out, the Corps of Discovery is at a crossroads. They may not be good men...but are they monsters?

Let this graphic novel be your time machine—experience history like never before! Our past is only the beginning with History Comics. In this volume, The National Parks: Preserving America's Wild Places, turn back the clock to 1872, when Congress established Yellowstone National Park as an area of unspoiled beauty for the "benefit and enjoyment of the people." Meet the visionaries, artists, and lovers of the American wilderness who fought against corruption and self-interest to carve out and protect these spaces for future generations. See for yourself how the idea of National Parks began, how they've changed, and how they continue to define America.

Here is the whole story as summarized by Biddle: encounters with dozens of Indian tribes; descriptions of their political and social organization, dress, living habits and ways; personal anecdotes of courage and stamina; vivid descriptions of staggering natural wonders that no white man had ever seen. Here, too, is all the material that Coues added: chapter synopses; critical footnotes that clarify hundreds of obscure references, add important biological data, provide modern locations of camp and exploration sites, bring into account additional material from the manuscript journal, and correct countless errors; a bibliographical introduction; brief Memoirs of Clark and the expedition's sergeant, Patrick Gass; a modern map to supplement Lewis and Clark's originals; and a much-needed index.

An exciting and hilarious new middle grade story for anyone who likes (or doesn't like) vampires! Buffy Summers is just like any other student...except for the part where she's also a secret vampire slayer. In every generation, one girl is granted great strength to stand against the forces of darkness. Of course, power doesn't matter when it comes to eating lunch alone, getting picked on by the popular kids, or having way too much homework. Luckily, Buffy finds her way with a can-do attitude, a weird Watcher, and new besties, Sarafina and Alvaro—who might just have powers of their own. But will any of it be enough to turn the tide when an army of villainous vampires invade town? Can Buffy save herself, let alone the world? Like Star Wars: Jedi Academy and DC Comics' Secret Hero Society, this action-packed and fun-filled story is told through comics, journal entries, class notes, doodles, text messages, and other in-world artifacts.

The Journals of the Lewis and Clark Expedition

Seaman, Meriwether Lewis's Newfoundland dog, describes Lewis and Clark's expedition, which he accompanied from St. Louis to the Pacific Ocean.

In this epic graphic novel, follow the dramatic story of the Lewis and Clark expedition. In 1804, these two explorers, along with their "Corps of Discovery," traversed the unmapped American West, leading to scientific discoveries, interactions with Native nations, and route to the Pacific Ocean. Dramatic illustrations and fast-paced text provide a "you-are-there" experience. With extensive back matter, including a bibliography, extended reading list, glossary, and further Internet sources, young readers will gobble up this action-packed comic book about one of history's most compelling moments.

The Lewis and Clark expedition is both one of the greatest geographical adventures undertaken by Americans and one of the best documented at the time. The University of Nebraska Press edition of the Journals of Lewis and Clark now reaches volume 10 of the projected 13 that will contain the complete record of the expedition. In order that the fullest record possible be kept of the expedition, captains Lewis and Clark required their sergeants to keep journals to compensate for possible loss of the captains' own accounts. The sergeants' accounts extend and corroborate the journals of Lewis and Clark and contribute to the full record of the expedition. Volume 10 contains the journal of expedition member Sergeant Patrick Gass. Gass was promoted to sergeant on the expedition to fill the place of the deceased Charles Floyd. His journal was subsequently published and proved quite popular: it went through six editions in six years. A skilled carpenter, Gass was almost certainly responsible for supervising the building of Forts Mandan and Clatsop; his records of those forts are particularly detailed and useful. Gass was to live until 1870, the last survivor of the expedition and the one who lived to see transcontinental communication fulfill the promise of the expedition. Gary E. Moulton is a professor of history at the University of Nebraska-Lincoln and recipient of the J. Franklin Jameson Award of the American Historical Association for the editing of these journals.
