In this compelling account, Knockoff exposes the truth behind the fakes and uncovers the shocking consequences of dealing in counterfeit goods. Travelling across the globe, Tim Phillips shows that counterfeiting isn't a victimless crime; it is an illegal global industry undermining the world's economies. Based on interviews with victims, investigators and the people who sell counterfeits, Knockoff reveals the link between what we see as "innocent" fakes and organized crime. Phillips describes in detail how the counterfeiters' criminal network costs jobs, cripples developing countries, breeds corruption and violence, and kills thousands of people every year. He shows that by turning a blind eye to the problem, we become accomplices to theft, extortion and murder.

"Is This Thing On?"

PC Mag

Like a personal trainer for the digital age, Abby Stokes is the hand-holding, motivating expert that newbies—specifically older newbies—turn to when they want to become digitally literate. And her book, *Is This Thing On?*, is as smart, comprehensive, reassuring, and jargon-free as she is: the epitome of user-friendly. And it is now completely revised and updated to keep pace with the fast-changing digital landscape, covering tablets, apps, video streaming, social media, and much more. With the skill and assurance of a teacher who for over 20 years has personally taught computer skills to thousands of seniors and technophobes, Stokes covers it all: How to choose, buy, and start using the computer or tablet that's just right for you, plus how to set everything up for maximum comfort and safety. How to connect to the Internet, sign up for email, understand and use search engines, and get started with essential skills like word processing and text messaging. How to choose, buy, and start using a smartphone. How to take and share digital photographs and videos. How to discover online communities and participate in social media like Facebook, Instagram, Pinterest, Twitter, YouTube, and blogs. How to explore the world of apps, online music, streaming movies, and ebooks. And, importantly, online security—including what to do when things go wrong. Appendices include both Apple and PC keyboard shortcuts and 200 recommended websites and 100 apps; there are FAQs at the end of each chapter and tips and tricks throughout. An all-new companion website—[AskAbbyStokes.com](http://AskAbbyStokes.com)—will include video tutorials explaining the latest technologies.

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly.

*More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.*

*Essentials of Consumer Behavior offers an alternative to traditional textbooks for graduate students. Shorter than competing books, but no less rigorous, it includes unique material on vulnerable consumers and ethics. Balancing a strong academic foundation with a practical approach, Stephens emphasizes that consumer behavior does not simply equate to buyer behavior. She examines the thoughts, feelings, and behaviors that shape consumers' attitudes and motivations in relation to brands, products, and marketing messages. Providing a concise guide to the discipline, the author covers key themes such as vulnerable consumers, new technologies, and collaborative consumption. The book is supported by a rich companion website offering links to videos and podcasts, surveys, quizzes, further readings, and more. It will be a valuable text for any graduate student of consumer behavior or marketing, as well as any interested consumers.*

Unfortunately, many manufacturers of school-related products deserve an "F" for selling items laced with chemicals that lead to developmental and learning problems, among other ailments. Some of these products also take a toll on the health of the planet, adding to the mountains of trash and waste that strain our resources and releasing toxic chemicals that pollute air and water. The good news is that parents, public health leaders, and advocacy groups have been calling for safer products--and listening. So there are more and more options for smart choices that protect your family's health. To help you navigate this confusing array of backpacks, book bags, lunch boxes, art supplies, and other educational accessories--and separate the safe and healthful from the overly hyped--the editors of Rodale Books editors have compiled this unique shopping guide to the safest, kid-friendliest options on the market today. Based on extensive research and interviews and advice from child development, environmental specialists, and concerned parents, Rodale's Nontoxic Back-to-School Shopping Guide covers more than 100 products, provides dozens of creative ideas for materials and sources, and offers important guiding principles for evaluating items you may find on your own. It's the ultimate handbook for equipping your kids to have a safe, healthy, nontoxic back-to-school experience.
