Physical impacts of climate change, such as sea-level rise and extreme inundation events, pose a considerable threat to coastal settlements and the coastal ecosystems that provision and support them. Anthropogenically induced global climate change has profound implications for marine ecosystems and the economic and social systems that depend upon them. Monitor Publishing Company is well known as the publisher of The Federal Yellow Book, The Congressional Yellow Book, and The Corporate 1000. **A Directory of/Who Runs The World's 1000 Leading Corporations. The directory was designed to help you identify and contact the senior executives who lead and manage these companies. Accordingly, you will find extensive, valuable detail about who does what, and how to reach them, but you will find little financial or statistical data. We have designed the book in this way because we believe there is a great need for an accurate and current executive directory, whereas a wealth of financial data is already available from many different sources.
