The most comprehensive guide to highway diesel engines and their management systems available today, **MEDIUM/HEAVY DUTY TRUCK ENGINES, FUEL & COMPUTERIZED MANAGEMENT SYSTEMS**, Fourth Edition, is a user-friendly resource ideal for aspiring, entry-level, and experienced technicians alike. Coverage includes the full range of diesel engines, from light duty to heavy duty, as well as the most current diesel engine management electronics used in the industry. The extensively updated fourth edition features nine new chapters to reflect industry trends and technology, including a decreased focus on outdated hydromechanical fuel systems, additional material on diesel electric/hydraulic hybrid technologies, and information on the principles and practices underlying current and proposed ASE and NATEF tasks. With an emphasis on today's computer technology that sets it apart from any other book on the market, this practical, wide-ranging guide helps prepare you for

The Lionel Legend

In railway modelling, getting the technical components correct is essential for a realistic-looking layout but, unfortunately, these often present the biggest challenges the hobbyist. Using his own experience as a railway model and electronics engineer, Andrew Duckworth provides a guide suitable for all railway modellers, from beginners to the more experienced. With instructions on how and when to use specialist electronic circuits to enhance your layout this book will help you to achieve a reasonably sophisticated layout. It provides: an overview of the geometry required for building successful model railways; clear explanations of electronics and electrical components; comparisons of direct control and digital command control (DCC); step-by-step instructions for wiring the track, signals, buildings and lighting; reviews of electrical systems, power supplies, wiring

and cable, control panels and switches and finally, it covers detection, testing and troubleshooting tips.

This book is a compilation of my 55 years in the railroad industry. From my beginning to the year 2008, a lot has happened since 2008 until now. My dear wife of 56 years passed away on March 2, 2011 and I'm now going it alone still work as a railroad consultant at a mine in New Mexico and the Border Pacific Railroad on the Mexican border here in Texas, at 77 years old but not steady. Life has been good to me as I still do a lot of photography in this area, hot San Antonio. Next on my agenda to write a railroad novel as a child I used to read all the novels about railroading in my imagination which I could not get enough of. So I'm going to try to see what I can do as my mind seems to be working pretty well at this time. I spend at a maximum of four hours a day on the computer Internet writing friends all over the country, some of the people I communicate with, I used to work for them when I started my career in the railroad industry. E-mailing friends is one of the greatest things that I do. Learning never ends I try to learn the locomotive inside and out as I can't get enough of that either. Living here in San Antonio isn't what it was 23 years ago; today it's crowded with people coming from all over every day to live here. I would like to move back east where I came from in Eastern Pennsylvania as I love the mountains and fewer people.
