

Administration and Mayor of City of Bari for hosting the Conference and for their generous support in enriching the Conference programme. Please do not hesitate to get in touch with us through the conference email (migrationscholar@gmail.com). Ibrahim Sirkeci and Michela C. Pellicani The Migration Conference Chairs The Migration Conference 2019 The Migration Conference is a global venue for academics, policy makers, practitioners, students and everybody who is interested in intelligent debate and research informed discussions on human mobility and its impacts around the world. The Migration Conference 2019 is the 7th conference in the series and co-organised and hosted by the University of Bari "Aldo Moro", Italy and Transnational Press London. The Migration Conferences were launched at the Regent's Centre for Transnational Studies in 2012 when the first large scale well attended international peer-reviewed conference with a focus on Turkish migration in Europe in Regent's Park campus of Regent's University London. The migration conferences have been attended by thousands of participants coming from all around the world in London (2012), London (2014), Prague (2015), Vienna (2016), Athens (2017), Lisbon (2018), and Bari (2019).

Innovative entrepreneurs are the prime movers of the economy. The innovative entrepreneur helps to overcome two types of institutional friction. First, existing firms may not innovate efficiently due to incumbent inertia resulting from adjustment costs, diversification costs, the replacement effect, and imperfect adjustment of expectations. The innovative entrepreneur compensates for incumbent inertia by embodying innovations in new firms that compete with incumbents. Second, markets for inventions may not operate efficiently due to transaction costs, imperfect intellectual property protections, costs of transferring tacit knowledge, and imperfect information about discoveries. The innovative entrepreneur addresses inefficiencies in markets for inventions through own-use of discoveries and adoption of innovative ideas. The Innovative Entrepreneur presents an economic framework that addresses the motivation of the innovative entrepreneur, the innovative advantage of entrepreneurs versus incumbent firms, the effects of competitive pressures on incentives to innovate, the consequences of creative destruction, and the contributions of the innovative entrepreneur to the wealth of nations.

The latest edition of this must-have text book promises an evidence-based and practical approach covering the very latest in cardiorespiratory care. The textbook covers a wide range of cardiorespiratory conditions and discusses treatment of patients in different clinical settings such as critical care, the ward area and out-patient departments. It begins with physiology and pathology and progresses into a detailed patient assessment section and a discussion of specific respiratory and cardiac conditions. The final section covers different groups of people who may require physiotherapy such as infants, children, and adults with specific conditions including a considered section on palliative care. Critical thinking is facilitated by clinical reasoning boxes in the text, and problem-solving is aided by case studies at the end of each chapter. There are also relevant practice tips to enable transfer of learning into the clinical environment. The text is supported by over 280 line drawings and diagrams along with over 70 x-rays and photographs to further illustrate the points under discussion. Q & A case studies, with scans and x-rays Outcome measures for problems and diseases Boxes with learning and practice tips to encourage reflection Tables with definitions, normal values and comparisons Practical techniques described with precision Expanded cardiovascular section Updated practical details on physiotherapy techniques Extra chapters on surgical complications and interventions Comprehensive coverage of Critical Care procedures and rehabilitation Practicalities of the management of children and infants Update on the evaluation of outcomes

Positive psychiatry is a new field, but one with a growing empirical database and a developing literature. Still, for all positive psychiatry's potential to improve outcomes and transform care systems, many clinicians remain unsure as to how to apply these interventions with their patients. It is this uncertainty that makes Positive Psychiatry: A Casebook such an indispensable resource. This guide illustrates how clinicians have successfully combined traditional psychiatry approaches and positive interventions, how positive interventions can enhance the quality of medical care, and how these interventions are employed in educational and coaching settings. The book opens with an overview of the history of the positive in psychiatry, a summary of the effectiveness of positive interventions, and an overarching conceptualization of the field of positive psychiatry. Thirteen extensive, detailed cases follow, organized into three sections: mental health treatment (e.g., schizophrenia and bipolar disorder), medical care (e.g., diabetes and chronic stress in caregivers), and educational and coaching interventions (e.g., medical internships and law school). The clinical cases include a summary, a description of the patient that takes into account his or her strengths and weaknesses, a detailed discussion of the intervention(s), and the outcome of treatment. The examples from the third section on education and coaching provide a unique opportunity to assess the effectiveness of positive interventions in nonclinical settings. All chapters feature "take home points" that summarize the salient concepts and allow for ease of reference. Featuring a wide array of settings unmatched by any other compendium of psychiatric or positive case material, Positive Psychiatry: A Casebook is a must-have reference for any clinician seeking to apply positive interventions to their practice.

Islamic economics, which is a discipline for studying economic behaviour from an Islamic perspective, advocates comprehensive human development defined by advancement and progress in multiple dimensions beyond GDP, income, or standard of living. Not only should socio-economic progress be in all dimensions but it should also have a higher purpose. A society is considered economically and socially developed if adequate protections are provided for faith, life, intellect, progeny, and wealth. This concept of balanced progress itself is an important idea recognized by the sociologists. However, the same has so far not been measured or used in policy making by economists. Similarly, lack of adequate protections in a society along these dimensions indicates poverty which is another way of measuring slack in development. The chapters in this edited volume deal with conceptualization of socio-economic development on these lines, and show how to measure socio-economic development in a comprehensive way. The book will be of interest to academics in the fields of economics, economic development, and Islamic economics. It will also be of interest to policy makers engaged in economic development, social progress, and poverty alleviation.

Economic Effects of Natural Disasters explores how natural disasters affect sources of economic growth and development. Using theoretical econometrics and real-world data, and drawing on advances in climate change economics, the book shows scholars and researchers how to use various research methods and techniques to investigate and respond to natural disasters. No other book presents empirical frameworks for the evaluation of the quality of macroeconomic research practice with a focus on climate change and natural disasters. Because many of these subjects are so large, different regions of the world use different approaches, hence this resource presents tailored economic applications and evidence. Connects economic theories and empirical work in climate change to natural disaster research Shows how advances in climate change and natural disaster research can be implemented in micro- and macroeconomic simulation models Addresses structural changes in countries afflicted by climate change and natural disasters
