Global Directions in Inclusive Education pushes the conceptual boundaries of 'inclusive education' and explores new ways to research and envision inclusion and diversity in education for all children. This pioneering book problematizes 'inclusive education' as a global currency, as another form of deficit-thinking, and as a universal application. The expert team of international contributors argue that much of the field of inclusive education needs a reinvigoration of new ideas, critical introspection, and ways of knowing that can overcome the well-worn deficit paths of inclusive education study, namely: 'barriers' to inclusion, teacher attitudes, policy-practice gaps, lack of resources, and lack of teacher training. Seeking diverse ways forward that represent new visions and innovations from around the world, this text features voices and ideas from both early career and established scholars, to enliven debate and promote a more positive and productive dialogue. Global Directions in Inclusive Education is ideal for students, researchers, and scholars of inclusive education; development practitioners seeking new ideas; and practitioners seeking to gain a deeper and more global understanding of inclusive education both in theory and in practice.

This book investigates and explores the complex dynamics of youth in contemporary society, especially in troubled and crisis-ridden contexts. On the one hand, teenagers and young adults experience social suffering, marginalisation, gender and ethnic bias, and an increased risk to be radicalised and involved in extremism and related violence. On the other hand, it is shown that young people are resilient, and they have a remarkable ability to adapt and cope with extremely difficult situations. This interesting ambivalence is vividly illustrated by a number of studies in countries as varied as Ethiopia, Zambia, South Africa, Botswana, Brazil, Hong Kong, Kuwait, India, Israel, Britain, Italy, Malta, Spain, Portugal and Cyprus. Each of the 16 chapters throws a different light on the impact of destabilising circumstances and how youths cope with them in order to gain positive self-esteem and sense of a meaningful life. Overall, the experiences of young people are a distillation of the particular traumas and challenges that their society faces. Understanding those experiences and how they are coped with helps to make sense of all societies. This book was originally published as a special issue of Contemporary Social Science.

Sexuality, Society and Pedagogy problematizes some of the prevailing assumptions that frame this area of study. In doing so, it aims to make visible the challenges of teaching sexuality education in South African schools, while demonstrating its potential for reshaping our conceptions of the social and cultural representations thereof. Although the book is largely situated in experiences and perspectives within the South African context, it is hoped that the questions raised, reflections, analyses and arguments will contribute to thinking about sexuality education in diverse contexts, in particular more developing contexts.
