The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter

Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Like any American teenager, Brenda Paz spent much of her time with her friends. They would go to parties, listen to music, and show off their cars late into the night. But Brenda and her friends belonged to the Mara Salvatrucha--the MS-13--the most violent gang in America, and in addition to enjoying the things that all teenagers do, her friends were thieves, drug dealers, human traffickers, and murderers. A street gang that began in Los Angeles in the 1980s, the Mara Salvatrucha has spread across the United States and Central America with startling speed, boasting tens of thousands of members. They deal ruthlessly with competing gangs and any members who display disloyalty, often leaving a trail of dismembered corpses in their wake. They are poised to surpass the Mafia as the country's most organized criminal network. And by operating within the insular Central American immigrant communities, the Mara Salvatrucha has been able to easily elude law enforcement. All that changed when Brenda Paz turned informant for the FBI, exposing the incredible scope of the gang's operations. But Brenda's cooperation with the FBI was only the beginning. What followed is an extraordinary story of strength, intelligence, and incredible courage. This Is for the Mara Salvatrucha takes us into a dark and violent world that few people have seen, but is closer than you think.

This book is a compilation of the best papers presented at the 2021 edition of the Singapore Conference of Applied Psychology (SCAP) organised and facilitated by East Asia Research in Singapore. The selection of papers addresses the latest innovations, trends, concerns and practical challenges encountered in the field, and poses practical solutions within the field of applied psychology. The theme for 2021 is psychological well-being, and so the collection covers aspects of clinical and non-clinical psychological well-being in different arenas, from education to the workplace. Following a rigorous peer-review process led by the School of Psychology at the University of Derby, this collection is a valuable resource for academics, researchers and practitioners looking to keep themselves up-to-date with recent research in the field. The book is of interest to educators and practitioners in applied psychology focused on well-being.

Most university teachers have ideas about the typical good or not-so-good student in their classes, but rarely do they share these thoughts with others. By keeping quiet about the preconceptions - or stereotypes - they harbour, teachers put themselves at risk of missing key evidence to help them revise their beliefs; more importantly, they may fail to notice students in real need of their support and encouragement. In this unique work, the authors explore UK and US university teachers' beliefs about their students' performance and reveal which beliefs are well-founded, which are mistaken, which mask other underlying factors, and what they can do about them. So is it true, for instance, that British Asian students find medicine more difficult than their white counterparts, or that American students with sports scholarships take their studies less seriously? Is it the case that students who sit at the front of the lecture hall get better grades than those who sit at the back? By comparing students' demographic data and their actual performance with their teachers' expectations, the authors expose a complex picture of multiple factors affecting performance. They also contrast students' comments about their own study habits with their views on what makes a good learner. For each preconception, they offer clear advice on how university teachers can redesign their courses, introduce new activities and assignments and communicate effective learning strategies that students will be able to put into practice. Finally, the authors explore the ramifications of teachers' beliefs and suggest actions that can be taken at the level of the institution, department or programme and in educational development events, designed to level the playing field so that students have a more equitable chance of success. Ideal for both

educational developers and university teachers, this book: reveals general tendencies and findings that will inform developers' own work with university teachers, provides practical guidance and solutions for university teachers to be able to identify and address students' actual - rather than assumed - needs, explores means of addressing and challenging people's natural tendency to rely on preconceived ideas and stereotypes, and explains an action research method that educational developers can use on their own campuses to unravel some of the local preconceptions that may be hampering student success.

Promoting Human Flourishing in Work, Health, Education, and Everyday Life

Grounded in a critical sociocultural approach, this volume examines issues associated with teaching and learning difficult histories in international contexts. Defined as representations of past violence and oppression, difficult histories are contested and can evoke emotional, often painful, responses in the present. Teaching and learning these histories is contentious yet necessary for increased

dialogue within conflict-ridden societies, reconciliation in post-conflict societies, and greater social cohesion in long-standing democratic nations. Focusing on locations and populations across the globe, chapter authors investigate how key themes—including culture, identity, collective memory, emotion, and multi-perspectivity, historical consciousness, distance, and amnesia—inform the teaching and learning of difficult histories.

This book represents an introduction to spirituality and various psychic phenomenons such as reiki, dj vu, dreams, religion, and spiritual healing etc. This book also attempts to establish comprehensive understanding of these complex phenomenons which are usually linked with spiritual experiences. While trying to unfold some mysteries this book serves as a chance for the contemporary researchers to explore the research areas to fulfill the gap. Written by substantial writers this book puts these less focused aspects altogether to provide them a platform for further research.
