

Life Science Paper 1 June Examination 2013

Working with Paper builds on a growing interest in the materials of science by exploring the gendered uses and meanings of paper tools and technologies, considering how notions of gender impacted paper practices and in turn how paper may have structured knowledge about gender. Through a series of dynamic investigations covering Europe and North America and spanning the early modern period to the twentieth century, this volume breaks new ground by examining material histories of paper and the gendered worlds that made them. Contributors explore diverse uses of paper—from healing to phrenological analysis to model making to data processing—which often occurred in highly gendered, yet seemingly divergent spaces, such as laboratories and kitchens, court rooms and boutiques, ladies' chambers and artisanal workshops, foundling houses and colonial hospitals, and college gymnasiums and state office buildings. Together, they reveal how notions of masculinity and femininity became embedded in and expressed through the materials of daily life. Working with Paper uncovers the intricate negotiations of power and difference underlying epistemic practices, forging a material history of knowledge in which quotidian and scholarly practices are intimately linked.

This book is an interdisciplinary collection shedding light on human-animal relationships and interactions around the world. The book offers a predominantly empirical look at social and cultural practices related to companion animals in Mexico, Poland, the Netherlands, Japan, China and Taiwan, Vietnam, USA, and Turkey among others. It focuses on how dogs, cats, rabbits and members of other species are perceived and treated in various cultures, highlighting commonalities and differences between them.

Reveals how boosters, bureaucrats, and engineers--not grassroots protesters--were truly the ones responsible for spearheading the passage of the Clean Water Act of 1972. How these unlikely protagonists helped to pass the era's most far-reaching regulatory law gives us rare insight into how Congress was able to take the lead in addressing those concerns, namely in the form of water quality issues.

Grants

A comprehensive collection of original essays by leading medical sociologists from around the world, fully updated to reflect contemporary research and global health issues The Wiley Blackwell Companion to Medical Sociology is an authoritative overview of the most recent research, major theoretical approaches, and central issues and debates within the field. Bringing together contributions from an international team of leading scholars, this wide-ranging volume summarizes significant new developments and discusses a broad range of globally-relevant topics. The Companion's twenty-eight chapters contain timely, theoretically-informed coverage of the coronavirus pandemic and emerging diseases, bioethics, healthcare delivery systems, health disparities associated with migration, social class, gender, and race. It also explores mental health, the family, religion, and many other real-world health concerns. The most up-to-date and comprehensive single-volume reference on the key concepts and contemporary issues in medical sociology, this book: Presents thematically-organized essays by authors who are recognized experts in their fields Features new chapters reflecting state-of-the-art research and contemporary issues relevant to global health Covers vital topics such as current bioethical debates and the global effort to cope with the coronavirus pandemic Discusses the important relationship between culture and health in a global context Provide fresh perspectives on the sociology of the body, biomedicalization, health lifestyle theory, doctor-patient relations, and social capital and health The Wiley Blackwell Companion to Medical Sociology is essential reading for advanced undergraduate and graduate students in medical sociology, health studies, and health care, as well as for academics, researchers, and practitioners wanting to keep pace with new developments in the field.

How the NSF became an important yet controversial patron for the social sciences, influencing debates over their scientific status and social relevance. In the early Cold War years, the U.S. government established the National Science Foundation (NSF), a civilian agency that soon became widely known for its dedication to supporting first-rate science. The agency's 1950 enabling legislation made no mention of the social sciences, although it included a vague reference to "other sciences." Nevertheless, as Mark Solovey shows in this book, the NSF also soon became a major--albeit controversial--source of public funding for them.

Grants are available from thousands of sources, both private and public. To the grantseeker, however, this wealth of sources appears like an impenetrable jungle. "Where are the grants I need and what do I need to do to submit my ideas and proposals?" This book is designed to answer these questions by aiming the grantseeker to both the grant givers and by providing a bibliography of book for further research.

Pratiyogita Darpan (monthly magazine) is India's largest read General Knowledge and Current Affairs Magazine. Pratiyogita Darpan (English monthly magazine) is known for quality content on General Knowledge and Current Affairs. Topics ranging from national and international news/ issues, personality development, interviews of examination toppers, articles/ write-up on topics like career, economy, history, public administration, geography, polity, social, environment, scientific, legal etc, solved papers of various examinations, Essay and debate contest, Quiz and knowledge testing features are covered every month in this magazine.

The role of biochar in improving soil fertility is increasingly being recognized and is leading to recommendations of biochar amendment of degraded soils. In addition, biochars offer a sustainable tool for managing organic wastes and to produce added-value products. The benefits of biochar use in agriculture and forestry can span enhanced plant productivity, an increase in soil C stocks, and a reduction of nutrient losses from soil and non-CO2 greenhouse gas emissions. Nevertheless, biochar composition and properties and, therefore, its performance as a soil amendment are highly dependent on the feedstock and pyrolysis conditions. In addition, due to its characteristics, such as high porosity, water retention, and adsorption capacity, there are other applications for biochar that still need to be properly tested. Thus, the 16 original articles contained in this book, which were selected and evaluated for this Special Issue, provide a comprehensive overview of the biological, chemico-physical, biochemical, and environmental aspects of the application of biochar as soil amendment. Specifically, they address the applicability of biochar for nursery growth, its effects on the productivity of various food crops under contrasting conditions, biochar capacity for pesticide retention, assessment of greenhouse gas emissions, and soil carbon dynamics. I would like to thank the contributors, reviewers, and the support of the Agronomy editorial staff, whose professionalism and dedication have made this issue possible.

Are we at a turning point in digital information? The expansion of the internet was unprecedented; search engines dealt with it in the only way possible - scan as much as they could and throw it all into an inverted index. But now search engines are beginning to experiment with deep web searching and attention to taxonomies, and the Semantic Web is demonstrating how much more can be done with a computer if you give it knowledge. What does this mean for the skills and focus of the information science (or sciences) community? Should information designers and information managers work more closely to create computer based information systems for more effective retrieval? Will information science become part of computer science and does the rise of the term informatics demonstrate the convergence of information science and information technology - a convergence that must surely develop in the years to come? Issues and questions such as these are reflected in this monograph, a collection of essays written by some of the most pre-eminent contributors to the discipline. These peer reviewed perspectives capture insights into advances in, and facets of, information science, a profession in transition. With an introduction from Jack Meadows the key papers are: Meeting the challenge, by Brian Vickery The developing foundations of information science, by David Bawden The last 50 years of knowledge organization, by Stella G Dextre Clarke On the history of evaluation in IR, by Stephen Robertson The information user, by Tom Wilson The sociological turn in information science, by Blaise Cronin From chemical documentation to chemoinformatics, by Peter Willett Health informatics, by Peter A Bath Social informatics and sociotechnical research, by Elisabeth Davenport The evolution of visual information retrieval, by Peter Enser Information policies, by Elizabeth Orna Disparity in professional qualifications and progress in information handling, by Barry Mahon Electronic scholarly publishing and open access, by Charles Oppenheim Social software: fun and games, or business tools?, by Wendy A Warr Bibliometrics to webometrics, by Mike Thelwall. This monograph previously appeared as a special issue of the Journal of Information Science, published by Sage. Readership: Reproduced here as a monograph, this important collection of perspectives on a skill in transition from a prestigious line-up of authors will now be available to information studies students worldwide and to all those working in the information science field.

This immensely valuable book of Solved Previous Years' Papers of Joint CSIRUGC NET for Life Sciences is

pecially published for the aspirants of Junior Research Fellowship (JRF) & Lectureship Eligibility Exam. The book comprises several Solved Previous Years' Papers for CSIRUGC NET exams on the subject which are solved by Experts. Detailed Explanatory Answers have also been provided for selected questions in such a manner to be useful for both study and selfpractice from the point of view of the exam. The book will help you understand the recent trends of exam and also serve as a true test of your studies & preparation for the exam. The book is highly recommended to improve your problem solving skills, speed and accuracy, and help you prepare well by practising through these papers to face the exam with Confidence, Successfully.
