warfare and terrorism in a post 9-11 world, Medical Aspects of Biological Warfare, 2e, addresses the weaponization of biological agents, categorizing potential agents as food, waterborne, or agricultural agents or toxins, and discusses their respective epidemiology. Recent advances in biomedical knowledge are presented that include descriptions of individual agents and the illnesses induced. Authors discuss biotoxins and explain methods for early identification for anthrax, plague, smallpox, alphaviruses, and staphylococcal enterotoxins. Case studies and research on successful management

an invaluable apologetic tool that will help you explore and analyze the relevant facts, research, and theories in light of biblical truth.

Intellectual property (IP) is a key component of the life sciences, one of the most dynamic and innovative fields of technology today. At the same time, the relationship between IP and the life sciences raises new public policy dilemmas. The Research Handbook on Intellectual Property and the Life Sciences comprises contributions by leading experts from academia and industry to provide in-depth analyses of key topics including pharmaceuticals, diagnostics and genes, plant innovations, stem cells, the role of competition law and access to medicines. The Research Handbook focuses on the relationship between IP and the life sciences in Europe

2009 to conduct cross-departmental scrutiny of science and technology. This report summarises the Committee's work of this session. It also reviews the historical landscape of science scrutiny in Parliament across the work of predecessor committees, and documents the impacts they have had on policy and the culture of scientific debate within Westminster. The Committee highlight several inquiries and reports that have had significant impact in informing legislative decisions and holding government to the standard of evidence based policy making.
