If you could bring back just one animal from the past, what would you choose? It can be anyone or anything from history, from the King of the Dinosaurs, T. rex, to the King of Rock 'n' Roll, Elvis Presley, and beyond. De-extinction – the ability to bring extinct species back to life – is fast becoming reality. Around the globe, scientists are trying to de-extinct all manner of animals, including the woolly mammoth, the passenger pigeon and a bizarre species of flatulent frog. But de-extinction is more than just bringing back the dead. It's a science that can be used to save species, shape evolution and sculpt the future of life on our planet. In Bring Back the King, scientist and comedy writer Helen Pilcher goes on a quest to identify the perfect de-extinction candidate. Along the way, she asks if Elvis could be recreated from the DNA inside a pickled wart, investigates whether it's possible to raise a pet dodo, and considers the odds of a 21st century Neanderthal turning heads on public transport. Pondering the practicalities and the point of de-extinction, Bring Back the King is a witty and wry exploration of what is bound to become one of the hottest topics in conservation – if not in science as a whole – in the years to come. READ THIS BOOK – the King commands it.

The Dinosaur Who Asked What For?

Daisy the dinosaur is off on a camping trip with the rest of the Raptor Scout troop. But she's so lazy, she can't see the point of all the activities. It's up to Sid and Daisy's fellow scouts to help her change her ways. This addition to the Dinosaur Tales series illustrates to children the benefits of joining in and helping others. Easy to read, rhyming text is brilliant for reading aloud and helps beginner readers to engage with the story.

Cat loves to nap. If only he could find a good resting place to hide from playful (and wide awake) Kitten! Opposites and hide-and-seek make this a fun story for nap time -- or anytime.

Jack Denham, grandson of moviemaker Carl Denham (who brought Kong to New York in 1933) clashes with a ruthless business magnate, Carlton Hemming, as both attempt to clone the giant ape, Kong, from blood samples discovered by a high-steel worker in 1999. Succeeding beyond their wildest dreams, it is quickly apparent the cloned ape belongs back in his native wilderness and not the wilds of New York. The final life-and-death struggle is played out on Skull Island—a lost world in the Indian ocean, full of monstrous creatures—where the original Kong was found over 70 years ago.

Winner of the Samuel Johnson Prize An unprecedented, groundbreaking history of China's Great Famine that recasts the era of Mao Zedong and the history of the People's Republic of China. "Between 1958 and 1962, China descended into hell. Mao Zedong threw his country into a frenzy with the Great Leap Forward, an attempt to catch up to and overtake Britain in less than 15 years The experiment ended in the greatest catastrophe the country had ever known, destroying tens of millions of lives." So opens Frank Dik ö tter's riveting, magnificently detailed chronicle of an era in Chinese history much speculated about but never before fully documented because access to Communist Party archives has long been restricted to all but the most trusted historians. A new archive law has opened up thousands of central and provincial documents that "fundamentally change the way one can study the Maoist era." Dik ö tter makes clear, as nobody has before, that far from being the program that would lift the country among the world's superpowers and prove the power of Communism, as Mao imagined, the Great Leap Forward transformed the country in the other direction. It became the site not only of "one of the most deadly mass killings of human history,"--at least 45 million people were worked, starved, or beaten to death--but also of "the greatest demolition of real estate in human history," as up to one-third of all housing was turned into rubble). The experiment was a catastrophe for the natural world as well, as the land was savaged in the maniacal pursuit of steel and other industrial accomplishments. In a powerful mesghing of exhaustive

research in Chinese archives and narrative drive, Dik ötter for the first time links up what happened in the corridors of power-the vicious backstabbing and bullying tactics that took place among party leaders-with the everyday experiences of ordinary people, giving voice to the dead and disenfranchised. His magisterial account recasts the history of the People's Republic of China.
