The Little Green Book on Breastfeeding is a pocket-sized guide to breastfeeding, written for medical professionals, assuming no previous experience with breastfeeding. It is not intended to be "everything to everybody," but just a concise, simple resource with references to find more detailed information if needed. Author Gail Hertz, MD, IBCLC, FAAP, covers the basics of breastfeeding, the first 100 hours and beyond, and mother and baby issues related to breastfeeding. Mom, baby, and feeding evaluation questions are provided in the resource section, along with information on milk banking and how to teach reverse pressure softening in one minute or less. Simple and to the point, this book answers basic questions on breastfeeding a busy healthcare provider might run across in a typical day, plus it fits in your lab coat pocket, so it is easy to access! In its 5th edition, this Little Green Book has already been a ready reference for many medical professionals. This new, updated version will be an invaluable addition to your resource library.

Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! The picture book inspiration for the Academy Award-winning film The Green Book Ruth was so excited to take a trip in her family's new car! In the early 1950s, few African Americans could afford to buy cars, so this would be an adventure. But she soon found out that black travelers weren't treated very well in some towns. Many hotels and gas stations refused service to black people. Daddy was upset about something called Jim Crow laws . . . Finally, a friendly attendant at a gas station showed Ruth's family The Green Book. It listed all of the places that would welcome black travelers. With this guidebook—and the kindness of strangers—Ruth could finally make a safe journey from Chicago to her grandma's house in Alabama. Ruth's story is fiction, but The Green Book and its role in helping a generation of African American travelers avoid some of the indignities of Jim Crow are historical fact.

As we confront the challenges of climate change, author James George calls us to wake up and stop our careless treatment of our planet before it's too late. At the same time, he shares his own practice towards waking up—the practice of Presence, known to all spiritual paths and simply and eloquently presented in this book.From [1]The Little Green book on Awakening/[1]: To become aware of the omnipresence of Consciousness may be the next great leap in human evolution and the foundation of the new paradigm in which both science and spirituality can find common ground. For consciousness is the field that connects—not separates—everything with everything, at all levels, and everything with the All, in one Wholeness.

Wit, craft, and maxims from the Emerald Isle’s most famous descendants including JFK, Ronald Reagan, St. Patrick, William Butler Yeats, Oscar Wilde, George Carlin, Brendan Behan, Michael Collins, de Valera, Tug McGraw, and many more! In this lively and wide-reaching collection Dermot McEvoy gathers together some of Ireland’s most famous lines from its most famous (and infamous) residents. But just who are the Irish, exactly? They are freedom fighters (the British call them “terrorists”), slave-owners, master politicians, relentless defenders of their religions, gay, straight, liberal, reactionary, victims of a famine, and mercenaries in the name of imperialism. They are expert businessmen, singers, outlaws, movie stars, writers, poets, priests, highwaymen, beggars, gypsies, gangsters and athletes. They are drunkards, teetotalers, modest, extravagant, and always shocked by the whole thing. They are inspirational and infuriating. They are funny and they are cynical. They are extraordinarily talented and remarkably venal. They are tough, adaptable, and the ultimate survivors. They are bewildering. They are infuriating. And whatever they are, there is a certain wisdom to it all. So give in and discover new lines and classic quotes from your favorite Irish men and women!

“An invaluable guide for both professionals in the health field and the general public.” —Deepak Chopra, MD The evidence is in: you can reduce cancer risk and support treatment by focusing on six key areas of health and wellness. The scientific data on the link between lifestyle, environmental factors, and cancer risk has been accumulating at an accelerated rate over the past decade: Every week we learn something more that we can do as individuals to decrease the risk of cancer and improve the likelihood of long-term survival. Many of us—patients and doctors included—do not realize that changes in our daily choices and habits can improve quality of life, increase the chances of survival, and aid in the healing process for those with a diagnosis. These ideas were pioneered in David Servan-Schreiber’s Anticancer: A New Way of Life, and became the basis for a research study developed by Lorenzo Cohen and Servan-Schreiber at The University of Texas MD Anderson Cancer Center. Introducing the concept of the “Mix of Six,” Cohen and Alison Jefferies make an informed case that building social and emotional support; managing stress; improving sleep, exercise, and diet; and minimizing exposure to environmental toxins work together to promote an optimal environment for health and well-being. While each plays an independent role, the synergy created by all six factors can radically transform health; delay or prevent many cancers; support conventional treatments; and significantly improve quality of life—as many testimonies and stories of those in the anticancer community eloquently show. Anticancer Living provides an accessible, prescriptive guide to wellness based on the latest scientific findings and clinical trials, and it showcases the community of doctors, researchers, caregivers, and patients who have been inspired to create change.

"Hungry? Check the Green Book. Tired? Check the Green Book. Sick? Check the Green Book." In the late 1930s when segregation was legal and Black Americans couldn't visit every establishment or travel everywhere they wanted to safely, a New Yorker named Victor Hugo Green decided to do something about it. Green wrote and published a guide that listed places where his fellow Black Americans could be safe in New York City. The guide sold like hot cakes! Soon customers started asking Green to make a guide to help them travel and vacation safely across the nation too. With the help of his mail carrier co-workers and the African American business community, Green's guide allowed millions of African Americans to travel safely and enjoy traveling across the nation. In the first picture book about the creation and distribution of The Green Book, author Keila Dawson and illustrator Alleanna Harris tell the story of the man behind it and how this travel guide opened the road for a safer, more equitable America.

Depth Psychology and Climate Change offers a sensitive and insightful look at how ideas from depth psychology can move us beyond psychological overwhelm when facing the ecological disaster of climate change and its denial. Integrating ideas from disciplines including anthropology, politics, spirituality, mythology and philosophy, contributors consider how climate change affects psychological well-being and how we can place hope and radical uncertainty alongside rage and despair. The book explores symbols of transformation, myths and futures; and is structured to encourage regular reflection. Each contributor brings their own perspective – green politics, change and loss, climate change denial, consumerism and our connection to nature – suggesting responses to mental suffering arising from an unstable and uncertain international outlook. They examine how subsequent changes in consciousness can develop. This book will be essential reading for analytical psychologists, Jungian analysts and psychotherapists, as well as academics and students of Jungian and post-Jungian studies. It will also be of great interest to academics and students of the politics and policy of climate change, anthropology, myth and symbolism and ecopsychology, and to anyone seeking a new perspective on the climate emergency.

The Little Green Book is a collection of fatawah handed down by the most prominent and arguably one of the most influential Muslim clerics in modern history; the Grand Ayatollah Seyyed Ruhollah Mosavi Khomeini, commonly known as the Ayatollah Khomeini. Fatawah (the plural of fatwah) are Islamic religious decrees sent down by Muslim religious leaders. Since Islam demands that Muslims abide by Sharia - Islamic law as individuals and as a society, these fatawah are not simply religious insights or advice. They are legal pronouncements, and define the law of the land in an Islamic country. In his unrivaled role as Iran's Supreme Leader and the highest-ranking cleric for Shi'a Muslims, the Ayatollah Khomeini's fatawah guided the lives of more Shi'a Muslims than did any other Islamic leader throughout history
