There is a myth that lingers around legal education in many democracies. That myth would have us believe that law students are admitted and then succeed based on raw merit, and that law schools are neutral settings in which professors (also selected and promoted based on merit) use their expertise to train those students to become lawyers. Based on original, empirical research, this book investigates this myth from myriad perspectives, diverse settings, and in different nations, revealing that hierarchies of power and cultural norms shape and maintain inequities in legal education. Embedded within law school cultures are assumptions that also stymie efforts at reform. The book examines hidden pedagogical messages, showing how presumptions about theory's relation to practice are refracted through the obfuscating lens of curricula. The contributors also tackle questions of class and market as they affect law training. Finally, this collection examines how structural barriers replicate injustice even within institutions representing themselves as democratic and open, revealing common dynamics across cultural and institutional forms. The chapters speak to similar issues and to one another about the influence of context, images of law and lawyers, the political economy of legal education, and the agency of students and faculty.

For pure practice at an unbelievable price, you can't beat the 10 Actual series. Each book includes: 10 previously administered LSATs, an answer key for each test, a writing sample for each test, score-conversion tables, and sample Comparative Reading questions and explanations.

**What is the relationship between common-sense, or 'folk', psychology and contemporary scientific psychology? Are they in conflict with one another? Or do they perform quite different, though perhaps complementary, roles? George Botterill and Peter Carruthers discuss these questions, defending a robust form of realism about the commitments of folk psychology and about the prospects for integrating those commitments into natural science. Their focus throughout the book is on the ways in which cognitive science presents a challenge to our common-sense self-image - arguing that our native conception of the mind will be enriched, but not overturned, by science. The Philosophy of Psychology is designed as a textbook for upper-level undergraduate and beginning graduate students in philosophy and cognitive science, but as a text that not only surveys but advances the debates on the topics discussed, it will also be of interest to researchers working in these areas.**

LSAT Logical Reasoning

The world's legal professions have undergone dramatic changes in the 30 years since publication of the landmark three-volume *Lawyers in Society*, which launched comparative sociological studies of lawyers. This is the first of two volumes in which scholars from a wide range of disciplines, countries and cultures document and analyse those changes. The present volume presents reports on 46 countries, with broad coverage of North America, Western Europe, Latin America, Asia, Australia, North Africa and the Middle East, sub-Saharan Africa, and former communist countries. These national reports address: the impact of globalisation and neoliberalism on national legal professions (the relationship of lawyers and their professional associations to the state and tensions between state and citizenship); changes in lawyer demography (rapidly growing numbers and the profession's efforts to retain control, the entry of women and obstacles to full gender equality, ethnic diversity); legal education (the proliferation of institutions and pedagogic innovation); the regulation of lawyers; structures of production (especially the growth of large firms and the impact of technology and paraprofessionals); the distribution of lawyers across roles; and access to justice (state-funded legal aid and pro-bono services). The juxtaposition of the reports reveals the dramatic transformations of professional rationales, labour markets, and working practices and the multiple contingencies of the role of lawyers in societies experiencing increasing juridification within a new geopolitical order.
