

Loyola College Autonomous Chennai 600 034

The seminar was conducted to highlight the vital role of Direct and Indirect Taxes: • In mobilizing revenue for the government and being progressive in nature, helps to remove disparities in income. • To inculcate a platform where the experts, delegates, academicians as well as the student community, can interact and exchange their ideas and knowledge pertaining to the emerging issues and challenges in the field of Direct and Indirect Taxes. • To promote economic growth, generate employment opportunities and create economic stability.

There is continuing interest in natural products as sources of potentially new and exciting chemical compounds. This book brings together the knowledge, perspectives and research findings of a varied group of scientists on a wide range of topics, from microarrays, genetics and bioinformatics to yeast-based technologies and enzyme studies. Scientists and clinicians in life science research will find useful information on new research techniques and tools. For the agriculturist, there is interesting information on the potential and problems of natural-based pesticides. The cancer researcher will find several plant sources with potential anti-cancer and immunomodulating compounds, as well as a report on two new modalities in cancer therapy ? photosensitization with hypericin and immunotherapy. Latest developments of Chinese herbal extracts reported in this book may offer a new alternative therapy in the treatment of cardiovascular diseases. In addition, the later chapters awaken the would-be entrepreneur to the opportunities and challenges of research and development in the natural product industry, with the concluding chapter providing helpful insights into Intellectual Property Law.

An Epidemiological Update on COVID-19

Journal of the Indian Chemical Society

Crop Genome Editing Using CRISPR/Cas9: Theory and Practice is a highly useful reference for implementing genome engineering technologies, particularly CRISPR related projects in agricultural crops and other plants. This book provides an introduction to CRISPR's basic science and applied aspects, along with detailed protocols. It presents a detailed workflow, beginning with genome sequence retrieval and then mutation analysis in genome edited events using sequencing tools. The book helps those in the field methodically plan, design and conduct experiments. This practical guide will dramatically help researchers in accelerating conventional plant breeding programs. Offers a detailed review of literature on genome editing tools, with special

emphasis paid to CRISPR/Cas9 and its advancements Contains step-by-step guidelines for single guide RNA design, CRISPR vector construction, protoplast transformation, mutation analysis and Agrobacterium-based regeneration of mutant plants Includes detailed troubleshooting tips during various steps

An Epidemiological Update on COVID-19 Bentham Science Publishers

This book is a pioneering work presenting Christian themes in Indian art from the beginnings of Christianity in India till today. The authors have, in the main, dealt with paintings and sculptures, but have supplemented this with one chapter on architecture, particularly that of church buildings, and one on popular art, including stamps. Over 1,100 rare coloured illustrations make this publication a unique reference book. It is the first complex treatment of the theme done in the last 25 years. Special emphasis is given to artists who as Hindus, Muslims and Parsees have chosen to paint Biblical themes. Already in the 16th century the encouraging and surprising encounter between European Christian prints and Indian miniature paintings took place. The Muslim Emperor Akbar invited three Jesuit missions from Goa to the Mogul court. Fascinated by European Madonnas and engravings, especially with Christian themes, he ordered his paintings to copy them in various ways. This was the start of a revolutionary fusion in Indian miniatures.

FACETS OF CONTEMPORARY HISTORY

A Power Governments Cannot Suppress is Howard Zinn's major new collection of essays on American history, class, immigration, justice, and ordinary citizens who have made a difference.

'People should not leave looking-glasses hanging in their rooms any more than they should leave open cheque books or letters confessing some hideous crime.' 'If she concealed so much and knew so much one must prize her open with the first tool that came to hand - the imagination.' Virginia Woolf's writing tested the boundaries of modern fiction, exploring the depths of human consciousness and creating a new language of sensation and thought. Sometimes impressionistic, sometimes experimental, sometimes brutally cruel, sometimes surprisingly warm and funny, these five stories describe love lost, friendships formed and lives questioned. This book includes The Lady in the Looking Glass, A Society, The Mark on the Wall, Solid Objects and Lappin and Lapinova.

Collection of critical essays about issues related to Anne Frank's diary.

By combining engaging readings and practical instruction, this textbook integrates journalism theory and practice. Students are guided through the craft while enhancing their critical thinking skills and overall understanding of the field of journalism.

An Epidemiological Update on COVID-19 brings recent findings about the pandemic to the forefront. The reference is a compilation of eleven chapters contributed by expert scholars in epidemiology and medicine that cover topics of interest to anyone interested in COVID-19 monitoring and response measures. The topics also indicate some clinical areas of interest to COVID-19 researchers that have received attention due to the pandemic. It covers basic knowledge about respiratory conditions associated with SARS-CoV-2 infection and COVID-19 epidemiology. These topics are complemented with chapters detailing the symptoms and biochemical mechanisms of novel coronavirus infections intended for readers with an advanced level of understanding of life sciences and medicine. Special topics such as the immune response to Sars-CoV-2, and, recombinant drugs for COVID-19, are also covered in this book. Each chapter is organized in a reader-friendly format and includes a list of references.

'Louise Doughty leads her unnerved readers into dark territory.' Hilary Mantel 'Utterly mesmerizing, with the pace of a thriller and a sense of profound mystery in the most ordinary of settings. I was hooked from its start to its nerve-racking, surprising finish' Deborah Moggach The new novel from Sunday Times bestselling author Louise Doughty Platform Seven at 4am: Peterborough Railway Station is deserted. The man crossing the covered walkway on this freezing November morning is confident he's alone. As he sits on the metal bench at the far end of the platform it is clear his choice is strategic - he's as far away from the night staff as he can get. What the man doesn't realise is that he has company. Lisa Evans knows what he has decided. She knows what he is about to do as she tries and fails to stop him walking to the platform edge. Two deaths on Platform Seven. Two fatalities in eighteen months - surely they're connected? No one is more desperate to understand what connects them than Lisa Evans herself. After all, she was the first of the two to die.

Biotechnology

This book presents select proceedings of the International Conference on Applied Mathematics in Science and Engineering (AMSE 2019). Various topics covered include computational fluid dynamics, applications of differential equations in engineering, numerical methods for ODEs and PDEs, mathematical modeling and analysis of biological systems, optimal control and controllability of

differential equations, fractional calculus and its applications, nonlinear analysis, and functional analysis. This book will be of interest to researchers, academicians and students in the fields of applied sciences, mathematics and engineering.

Pedro Arrupe, 1907-1991, Spanish Jesuit; contributed articles.

Covers the broad vistas of biotechnology, providing students with a sound basis of understanding various aspects of this ever-growing field. It is intended to be comprehensive and to meet the varied needs of different institutions. The book includes a wide coverage of topics needed to appreciate the principles and applied aspects of biotechnology.

Biography of S. Ignacimuthu, Jesuit priest and educationist from Tamil Nadu.

Human Rights which existed as mere theoretical debate during the pre-Second world War have now become a practical goal of many modern Nation-states across the world. Today, the leaders of the world recognized the need to inculcate the indicators of human right protections and practice as an input for development. The multidimensional aspects of human rights are discussed in this book in a lucid manner with appropriate case studies and examples. Imparting human values and human rights culture in every walk of life is the focal points of this book. The scholars from various discipline has contributed their views and thus made the book as multidisciplinary in its outlook. It addresses the challenges of 21st century with regard to the practice of human rights in the context of modern development.

International, national human rights laws and the institution which executed these laws and the practical limitations are critically dealt in his book. Almost all sub-themes of human rights are critically analyzes with possible suggestion and recommendations for further strengtning the practice of good governance and democracy. This edited volume is useful for human rights activists, political leaders at different levels, lawyers, civil servants, research scholars belonging to various disciplines such as sociology, social work, political science, law, criminology, ethics, and other related social sciences. The value-centric approach of this book on various aspects of human rights issues are the most attracting features. It is certainly the most reliable source book for the contemporary issues of human rights.

Sampling Theory and Methods presents in detail several sampling schemes like simple random sampling, unequal probability sampling methods, systematic, stratified, cluster and multistage sampling. In addition to sampling schemes a number of estimating methods which include ratio and regression

estimators are also discussed. The use of superpopulation models is covered in detail along with recent developments including estimation of distribution functions, adaptive sampling schemes etc. New to the Second Edition: *Contents reorganized to establish a coherent link between various concepts *Several numerical examples associated with real life solutions for bringing out the relevance of theory in real life context

With Vocabulary and Notes

This book "Facets of Contemporary History" is a selection of research papers, presented in the International Conference on Contemporary History which was held on 30th and 31st January 2015. This conference was organized by the Department of History, Tourism and Travel Management, Ethiraj College for Women, Chennai. It gives us great pleasure to put together a selection of the papers for the public in the form of a book in the interest of research. Contemporary History refers to the history of the immediate past or that which can be expected to remain in living memory. While there are areas of history which have branched off from contemporary history such as social history and economic history this conference took a very broad look at contemporary events from not just a historical but also a social science perspective. This Book contains 6 Sections namely Political History, Socio-Cultural History, Gender, Economic History, Environment and Tourism. We would like to place on record the Management of the college for the moral and financial support extended in the conduct of the Conference and in the production of the book. Thanks are due to our respected Chairman of the Trust Board, Mr. V.M.Muralidharan for all his support and encouragement. Heartfelt thanks are due to Prof.Dr.Karu. Nagarajan Member Secretary, TAMIL NADU STATE COUNCIL FOR HIGHER EDUCATION for their generous financial Assistance towards the conduct of the Conference. We would be failing in our duty if we do not thank the faculty of the Department of History, Tourism and Travel Management for their support and encouragement in the conduct of the Conference.
