Challenging current theories about gender and achievement, this book assesses the issues at stake and analyses the policy drives and changing perceptions of gender on which the 'gender and achievement' debates are based. This new topical book guides the reader through the different theories and approaches, drawing together and reviewing work on gender and educational performance. The authors also highlight the continuing problems experienced by girls in terms of achievement and classroom interaction. The subjects covered include: perspectives on gender and achievement the construction of gender and achievement in education policy evaluating boys' underachievement the future for boys and girls? raising achievement: 'What works in the classroom?' Teachers, education professionals and students engaged in teacher training will welcome the editors' objective yet critical expertise. Adopting a multi-disciplinary approach to the practice of achieving a more acceptable acoustic environment, this book draws on the same basic principles to cover both the outdoors and indoor space. It starts with the fundamentals of sound waves and hearing and goes on to the measurement of noise and vibration, room acoustics, sound absorption, airb

Since human beings have been writing it seems there has been plagiarism. It is not something that sprouted with the advent of the Internet. Teachers have been struggling for years in countries all over the globe to find good methods for dealing with the problem of plagiarizing students. How do we spot plagiarism? How do we teach them not to plagiarize? And how do we deal with those who have been found out to be plagiarists? The purpose of this book is to collect material on the various aspects of plagiarism in education with special attention given to the German problem of dissertation plagiarism. Since there is a wide-spread interest in the German plagiarism situation and in strategies for dealing with it, the book is written in English in order to be accessible to a larger audience.

A Guide to Success in Advanced Clinical Skills Assessment

The Structural Engineer

This is the ultimate guide to study skills, written by million copy bestselling author Stella Cottrell. Her tried and tested approach, based on over 20 years' experience of working with students, has helped over a million students to achieve their potential. When it comes to studying, there is no one-size-fits-all approach. This engaging and accessible guide shows students how to tailor their learning to their individual needs in order to boost their grades, build their confidence and increase their employability. Fully revised for the fifth edition, it contains everything students need to succeed. This

is an invaluable resource for undergraduate students of all disciplines, and is also ideal for postgraduates, mature students and international students. It prepares students for what to expect before, during and after their studies at university. New to this Edition: - Additional material on writing skills, including proofreading, editing and writing for different assignments - New chapters on managing stress and student wellbeing at university, learning in diverse and international contexts and writing essays - More emphasis on reflective learning - Extended guidance on how to balance study with work - More use of visuals to summarise key learning points

This book aims to provide an easily accessible quick reference guide for advanced nursing students preparing to undertake practical examinations to assess advanced clinical practice competence, and students preparing for practical examinations in non-medical prescribing assessment. These examinations are commonly known as objective structured clinical examinations (OSCEs). The book is a preparation and revision tool, designed to be read in conjunction with any recommended core clinical textbooks: however, along with giving students step-by-step instructions on performing well in OSCE scenarios, it also gives guidance to academic staff on preparing to teach and mark OSCEs. This book uses a case study approach to OSCEs in a coherent, consistent, and easily understandable style. Both authors are clinical academic nurse practitioners who regularly work in clinical practice in conjunction with teaching advanced nurse practitioner and non-medical prescribing students.

Reassessing Gender and Achievement

CYBERSECURITY: THE ESSENTIAL BODY OF KNOWLEDGE provides a comprehensive, trustworthy framework of practices for assuring information security. This book is organized to help readers understand how the various roles and functions within cybersecurity practice can be combined and leveraged to produce a secure organization. In this unique book, concepts are not presented as stagnant theory; instead, the content is interwoven in a real world adventure story that runs throughout. In the story, a fictional company experiences numerous pitfalls of cyber security and the reader is immersed in the everyday practice of securing the company through various characters' efforts. This approach grabs learners' attention and assists them in visualizing the application of the content to real-world issues that they will face in their professional life. Derived from the Department of Homeland Security's Essential Body of Knowledge (EBK) for IT Security, this book is an indispensable resource dedicated to understanding the framework, roles, and competencies involved with information security. To perform better in any situation - in your career, hobbies, relationships, or in any facet of your life - it is critical to develop psychological skills, which, just like physical abilities, can be taught, learned, and practiced. Both as individuals and as groups, we can tone these psychological skills and use them to heighten awareness, foster talents and technical abilities, and reach peak performance. Mental preparedness and psychological awareness are the keys to thriving in any environment. Few understand the importance of psychological skills better than the internationally recognized professor Michael Bar-Eli. As both a sports and organizational psychologist for more than 35 years, Bar-Eli has not only researched the science of performance but has also worked directly with elite athletes, coaches, and teams to help them improve their success on the court or field. Boost! takes the lessons he's learned from sports psychology and translates them for leaders and managers at any stage in their career. With prescriptive advice, Bar-Eli illustrates how anyone can apply these lessons to better support and inspire co-workers and employees and create a sustainable, successful working environment and business. Boost! breaks down the complex behavioral science of getting ahead. Through original scientific research, unique case studies, and anecdotes from the world of sports and beyond, Bar-Eli explains the psychological underpinnings of human behavior and how we can harness this knowledge to perform at our highest levels, succeeding in our careers and personal lives.

This latest volume lists all the major research projects being undertaken in Britain during the latter months of 1992, the whole of 1993 and the early months of 1995.

Self-disgust (viewing the self as an object of abhorrence) is somewhat of a novel subject for psychological research and theory, yet its significance is increasingly being recognised in the clinical domain. This edited collection of articles represents the first scholarly attempt to engage comprehensively with the concept of self-directed disgust as a potentially discrete and important psychological phenomenon. The present work is unique in addressing the idea of self-disgust in depth, using novel empirical research, academic review, social

commentary, and informed theorising. It includes chapters from pioneers in the field of psychology, and other selected authorities who can see the potential of using self-disgust to inform their own areas of expertise. The volume features contributions from a distinguished array of scholars and practising clinicians, including international leaders in areas such as cognition and emotion, psychological therapy, mental health research, and health and clinical psychology.

This book offers the latest research and new perspectives on Interactive Collaborative Learning and Engineering Pedagogy. We are currently witnessing a significant transformation in education, and in order to face today's real-world challenges, higher education has to find innovative ways to quickly respond to these new needs. Addressing these aspects was the chief aim of the 21st International Conference on Interactive Collaborative Learning (ICL2018), which was held on Kos Island, Greece from September 25 to 28, 2018. Since being founded in 1998, the conference has been devoted to new approaches in learning, with a special focus on collaborative learning. Today the ICL conferences offer a forum for exchanging information on relevant trends and research results, as well as sharing practical experiences in learning and engineering pedagogy. This book includes papers in the fields of: * New Learning Models and Applications * Pilot Projects: Applications * Project-based Learning * Real-world Experiences * Remote and Virtual Laboratories * Research in Engineering Pedagogy * Technical Teacher Training It will benefit a broad readership, including policymakers, educators, researchers in pedagogy and learning theory, school teachers, the learning industry, further education lecturers, etc.

More and more educational scenarios and learning landscapes are developed using blogs, wikis, podcasts and e-portfolios. Web 2.0 tools give learners more control, by allowing them to easily create, share or reuse their own learning materials, and these tools also enable social learning networks that bridge the border between formal and informal learning. However, practices of strategic innovation of

universities, faculty development, assessment, evaluation and quality assurance have not fully accommodated these changes in technology and teaching. Ehlers and Schneckenberg present strategic approaches for innovation in universities. The contributions explore new models for developing and engaging faculty in technology-enhanced education, and they detail underlying reasons for why quality assessment and evaluation in new – and often informal – learning scenarios have to change. Their book is a practical guide for educators, aimed at answering these questions. It describes what E-learning 2.0 is, which basic elements of Web 2.0 it builds on, and how E-learning 2.0 differs from Learning 1.0. The book also details a number of quality methods and examples, such as self-assessment, peer-review, social recommendation, and peer-learning, using illustrative cases and giving practical recommendations. Overall, it offers a step-by-step guide for educators so that they can choose their own quality assurance or assessment methods, or develop their own evaluation methodology for specific learning scenarios. The book addresses everyone involved in higher education – university leaders, chief information officers, change and quality assurance managers, and faculty developers. Pedagogical advisers and consultants will find new insights and practices for the integration and management of novel learning technologies in higher education. The volume fosters in lecturers and teachers a sound understanding of the need and strategy for change, and it provides them with practical recommendations on competence and quality methodologies.

The author of the “diabolically clever” *A Matter of Blood returns with another gritty supernatural thriller featuring hard-boiled homicide detective Cass Jones... A devastating terrorist attack has crippled London. To find a perpetrator who is more than human, Special Branch turns to Detective Inspector Cass Jones. Cass is already investigating a series of student suicides, but saying no to Special Branch isn't an option—even when he's hit with a much more personal and deeply disturbing mystery: a message left for him by his murdered brother revealing that Cass's nephew was stolen at birth. Cass's investigations and his search for the boy lead him down a dark labyrinth to the shadowy Mr. Bright and his otherworldly allies—and into the middle of an ancient and deadly feud, with no less than the fate of humanity hanging in the balance... *F. Paul Wilson

The four-volume set LNCS 11746–11749 constitutes the proceedings of the 17th IFIP TC 13 International Conference on Human-Computer Interaction, INTERACT 2019, held in Paphos, Cyprus, in September 2019. The total of 111 full papers presented together with 55 short papers and 48 other papers in these books was carefully reviewed and selected from 385 submissions. The contributions are organized in topical sections named: Part I: accessibility design principles; assistive technology for cognition and neurodevelopment disorders; assistive technology for mobility and rehabilitation; assistive technology for visually impaired; co-design and design methods; crowdsourcing and collaborative work; cyber security and e-voting systems; design methods; design principles for safety/critical

systems. Part II: e-commerce; education and HCI curriculum I; education and HCI curriculum II; eye-gaze interaction; games and gamification; human-robot interaction and 3D interaction; information visualization; information visualization and augmented reality; interaction design for culture and development I. Part III: interaction design for culture and development II; interaction design for culture and development III; interaction in public spaces; interaction techniques for writing and drawing; methods for user studies; mobile HCI; personalization and recommender systems; pointing, touch, gesture and speech-based interaction techniques; social networks and social media interaction. Part IV: user modelling and user studies; user experience; users' emotions, feelings and perception; virtual and augmented reality I; virtual and augmented reality II; wearable and tangible interaction; courses; demonstrations and installations; industry case studies; interactive posters; panels; workshops. The chapter 'Experiencing Materialized Reading: Individuals' Encounters with Books' is open access under a CC BY 4.0 license at link.springer.com. The chapter 'What Is Beautiful Continues to Be Good: People Images and Algorithmic Inferences on Physical Attractiveness' is open access under a CC BY 4.0 license at link.springer.com.

In recent decades the development of unsaturated soil mechanics has been remarkable, resulting in momentous advances in fundamental knowledge, testing techniques, computational procedures, prediction methodologies and geotechnical practice. The advances have spanned the full spectrum of theory and practice. In addition, unsaturated materials exhibiting complex behaviour such as residual soils, swelling soils, compacted soils, collapsing soils, tropical soils and solid wastes have been integrated in a common understanding of shared behaviour features. It is also noteworthy that unsaturated soil mechanics has proved surprisingly fruitful in expanding to other neighbouring areas such as swelling rocks, rockfill mechanics, and freezing soils. As a consequence, geotechnical engineering involving unsaturated soils can be now approached from a more rational and systematic perspective leading towards an improved and more effective practice. Unsaturated Soils contains the papers presented at the 5th International Conference on Unsaturated Soil (Barcelona, Spain, 6-8 September 2010). They report significant advances in the areas of unsaturated soil behaviour, testing techniques, constitutive and numerical modelling and applications. The areas of application include soil-atmosphere interaction, foundations, slopes, embankments, pavements, geoenvironmental problems and emerging topics. They are complemented by three keynote lectures and three general reports covering general issues of modelling, testing and applications. Unsaturated Soils is a comprehensive record of the state-of-the-art in unsaturated soil mechanics and a sound basis for further progress in the

future. The two volumes will serve as an essential reference for academics, researchers and practitioners interested in unsaturated soils.

Vol. 1, containing the main report, is also available (ISBN 9780215035868)

This book presents over 100 papers from the 3rd Engineering & Product Design Education International Conference dedicated to the subject of exploring novel approaches in product design education. The theme of the book is "Crossing Design Boundaries" which reflects the editors' wish to incorporate many of the disciplines associated with, and integral to, modern product design and development pursuits. Crossing Design Boundaries covers, for example, the conjunction of anthropology and design, the psychology of design products, the application of soft computing in wearable products, and the utilisation of new media and design and how these can be best exploited within the current product design arena. The book includes discussions concerning product design education and the cross-over into other well established design disciplines such as interaction design, jewellery design, furniture design, and exhibition design which have been somewhat under represented in recent years. The book comprises a number of sections containing papers which cover highly topical and relevant issues including Design Curriculum Development, Interdisciplinarity, Design Collaboration and Team Working, Philosophies of Design Education, Design Knowledge, New Materials and New Technologies in Design, Design Communication, Industrial Collaborations and Working with Industry, Teaching and Learning Tools, and Design Theory.

The Educational Hopes and Ambitions of Left-Behind Children in Rural China

The Forgotten Gods: Book Two

The future sustainability of the higher education sector

Passing Your Advanced Nursing OSCE

Black British Culture and Society

The Linguist

First Published in 1993. Routledge is an imprint of Taylor & Francis, an informa company.

This monograph highlights the educational experiences of rural children who are 'left behind' by their migrant worker parents in China, analyzing how this situation impacts on their aspirations and self-identity. Via an ethnographic and qualitative case study of a rural school in southwest China, the author presents the real lives of these disadvantaged children along with their challenges and needs, and provides an in depth understanding of how being 'left behind' impacts on their future aspirations. Building on the sociological theories of Pierre Bourdieu, the author makes an original contribution by combining seemingly incompatible disciplinary perspectives, such as cultural capital from sociology, rational action from behavioral economics, and self-efficacy from psychology. Hence, the book endeavors to transfer these Western theories to an Eastern context and demonstrates cultural nuances that are not always captured when applied in the West. The book will attract academic scholars and postgraduate students in the area of

socially disadvantaged children and young people as well as those who are working on youth studies and rural education. "Nothing provides a better foundation for good mental healthcare than access to a range of excellent supervisors and role models. This text is like having a supervisor in your pocket" Roderick McKay, Past Binational Chair, RANZCP Faculty of Psychiatry of Old Age and Adjunct Senior Lecturer, University of New South Wales, Australia This guide is for anyone working with people with mental health conditions, covering the techniques needed for a good psychiatric interview and preparing readers to work with specific groups, presentations, and in different settings. It covers everything from the basics of psychiatric assessment through to in-depth topics and how to approach examinations. This jargon free guide is a practical handbook that can be read quickly and consulted as needed to build confidence. It is ideal for medical students, psychiatric trainees, nurses, and allied health professionals. Practical guidance on writing reports and communicating your findings effectively Starts from first principles to give a sound foundation for all psychiatric interviews Covers all mental health conditions with both DSM-V and ICD-11 classifications Key topics such as risk assessments, managing difficult encounters, home visits, practising safely Insights into how it feels to be interviewed written by a patient Includes an Enhanced eBook version with purchase. The enhanced eBook allows the end user to access all of the text, figures, and references from the book on a variety of devices. The Challenges of the Digital Transformation in Education Imaging Moving Ahead to Future Learning Daily Graphic Journal of the Institute of Linguists international aspects, eighth report of session 2006-07, Vol. 2: Oral and written evidence Teachers spend much of their time on assessment, yet many higher education teachers have received minimal guidance on assessment design and marking. This means assessment can often be a source of stress and frustration. Assessment and Feedback in Higher Education aims to solve these problems. Offering a concise overview of assessment theory and practice, this guide provides teachers with the help they need. Black British Culture and Society brings together in one indispensable volume key writings on the Black community in Britain, from the 'Windrush' immigrations of the late 1940s and 1950s to contemporary multicultural Britain. Combining classic writings on Black British life with new, specially commissioned articles, Black British Culture and Society records the history

of the post-war African and Caribbean diaspora, tracing the transformations of Black culture in British society. *Black British Culture and Society* explores key facets of the Black experience, charting Black Britons' struggles to carve out their own identity and place in an often hostile society. The articles reflect the rich diversity of the Black British experience, addressing economic and social issues such as health, religion, education, feminism, old age, community and race relations, as well as Black culture and the arts, with discussions of performance, carnival, sport, style, literature, theatre, art and film-making. The contributors examine the often tense relationship between successful Black public figures and the media, and address the role of the Black intellectual in public life. Featuring interviews with noted Black artists and writers such as Aubrey Williams, Mustapha Matura and Caryl Phillips, and including articles from key contemporary thinkers, such as Stuart Hall, A. Sivanandan, Paul Gilroy and Henry Louis Gates, *Black British Culture and Society* provides a rich resource of analysis, critique and comment on the Black community's distinctive contribution to cultural life in Britain today.

A Little Gay History of Wales tells the compelling story of Welsh LGBT life from the Middle Ages to the present day. Drawing on a rich array of archival sources from across Britain, together with oral testimony and material culture, this pioneering study is the first to examine the experiences of ordinary LGBT men and women, and how they embarked on coming out, coming together and changing the world. This is the story of poets who wrote about same-sex love and translators who worked to create a language to describe it; activists who campaigned for equality and politicians who created the legislation providing it; teenagers ringing advice lines for guidance on coming out, and revellers in the pioneering bars and clubs on a Friday and Saturday night. It is also a study of prejudice and of intolerance, of emigration and isolation, of HIV/AIDS and Section 28 - all features of the complex historical reality of LGBT life and same-sex desire. Engaging and accessible, absorbing and perceptive, this book is an important advance in our understanding of Welsh history.
